### SAP Certified Associate - Validating Business Transformation Sample Questions (Q23-Q28):

#### NEW QUESTION # 23

Which of the following are strategies used in the Design phase to enable effective business process transformation with SAP

Signavio?

(3 correct answers)

- A. Collaborating with IT
- **B. Process performance benchmarking**
- C. Using best practice content
- **D. Value discovery**
- **E. Involving the stakeholders**

**Answer: B,D,E**

Explanation:

In the Design phase of a transformation project, SAP Signavio plays a central role in shaping how business processes are evaluated, redesigned, and aligned to organizational objectives. Value discovery is one of the fundamental strategies used during this phase. It involves identifying improvement opportunities by analyzing existing processes, determining where inefficiencies occur, and uncovering areas where automation, optimization, or standardization can bring measurable business benefits. SAP Signavio provides process insights and performance indicators that support this discovery work.

Another essential strategy is involving stakeholders. Effective process transformation requires input from business users, process owners, managers, and IT teams to ensure that redesigned processes reflect operational realities and strategic priorities. Signavio's collaboration features—such as commenting, sharing models, and approving workflows—facilitate this engagement. Stakeholder involvement helps ensure alignment and increases adoption success after deployment.

Process performance benchmarking is also a critical strategy. SAP Signavio allows organizations to compare their internal process performance with industry standards or peer benchmarks. This evaluation highlights underperforming areas and guides prioritization in the design phase. While collaborating with IT and best practice use are helpful activities, they are not formalized as the three primary strategies emphasized in the Signavio design methodology.

#### NEW QUESTION # 24

Which SAP service offering provides enhanced business transformation support with proactive insights and service SLAs?

- A. SAP Partner Connect
- B. SAP Customer Engagement Initiative
- C. SAP Influence
- **D. SAP Preferred Success**

**Answer: D**

Explanation:

SAP Preferred Success is an advanced support program designed to strengthen cloud transformation outcomes. It provides proactive guidance, insight-driven recommendations, continuous adoption monitoring, and defined service-level agreements. These services help ensure that customers achieve value realization and maintain stable solution operations. The other programs focus on partner networks, feedback channels, or collaborative influence—not transformation-focused support with SLAs.

#### NEW QUESTION # 25

Which SAP LeanIX product helps organizations understand their current application landscape?

- A. SAP LeanIX Architecture and Road Map Planning
- **B. SAP LeanIX Application Portfolio Management**
- C. SAP LeanIX Landscape Management
