Annual test syllabus is essential to predicate the real D-PDM-DY-23 questions. So you must have a whole understanding of the test syllabus. After all, you do not know the D-PDM-DY-23 exam clearly. It must be difficult for you to prepare the D-PDM-DY-23 exam. Then our D-PDM-DY-23 Study Materials can give you some guidance for our professional experts have done all of these above matters for you by collecting the most accurate questions and answers. And you can have a easy time to study with them.

## EMC D-PDM-DY-23 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                                   |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>PowerProtect Data Manager Integration: This domain focuses on connecting PowerProtect Data Manager with a wide range of workloads including MS-SQL, Oracle, VM, SAP HANA, MS Exchange, Kubernetes, File System, and NAS. It covers the requirements, configuration, backup execution, and restore procedures for each supported platform.</li></ul> |
| Topic 2 | <ul style="list-style-type: none"><li>PowerProtect Data Manager Deployment and Initial Configuration: This domain covers the core components of PowerProtect Data Manager and the steps required to deploy, configure, and upgrade it in an environment. Candidates are expected to understand system requirements and the overall deployment process.</li></ul>                          |
| Topic 3 | <ul style="list-style-type: none"><li>PowerProtect Data Manager Administration: This domain addresses the ongoing management of PowerProtect Data Manager, including setting up protection policies, SLA compliance, reports, and disaster recovery. It also covers monitoring the environment and using built-in tools to identify and resolve issues.</li></ul>                         |

## D-PDM-DY-23 Interactive Course, Latest D-PDM-DY-23 Dumps Book

To help you pass D-PDM-DY-23 exam is recognition of our best efforts. In order to achieve this goal, we constantly improve our D-PDM-DY-23 exam materials, allowing you to rest assured to use our dumps. If you have any question about our products and services, you can contact our online support in our FreeCram website, and you can also contact us by email after your purchase. If there is any update of D-PDM-DY-23 software, we will notify you by mail.

## EMC Dell PowerProtect Data Manager Deploy 2023 Exam Sample Questions

## (Q66-Q71):

### NEW QUESTION # 66

An Oracle administrator is preparing an RMAN recovery script using PowerProtect Data Manager. What is the default installation location of the DD Boost library file?

- A. \$ORACLE\_HOME/lib
- B. \$RMAN\_AGENT\_HOME/lib
- C. \$ORACLE\_AGENT\_HOME/lib
- D. \$RMAN\_AGENT/lib

**Answer: B**

Explanation:

In Dell PowerProtect Data Manager (PPDM), protecting Oracle databases involves the use of the PowerProtect Data Manager Oracle RMAN agent. This agent facilitates the communication between the Oracle Recovery Manager (RMAN) and the PowerProtect DD (Data Domain) system.

\* The Library File: To enable the RMAN " SBT\_TAPE " device to communicate with the protection storage via the DD Boost protocol, a specific library file (usually libddobk.so on Linux or libddobk.dll on Windows) must be referenced in the RMAN script.

\* Path Variable: During the installation of the RMAN agent, a set of environment variables is established. The root directory where the agent is installed is referred to as \$RMAN\_AGENT\_HOME (typically /opt/dpsapps/rmanagent on Linux).

\* Location: The library files required for the RMAN configuration are stored in the libsubdirectory.

Therefore, the correct path to provide in the SBT\_LIBRARY parameter of the RMAN script is \$RMAN\_AGENT\_HOME/lib.

Ensuring the correct path is used is vital for the RMAN channel allocation to succeed, allowing PPDM to manage the backup and recovery metadata while the data flows directly to the DD system.

### NEW QUESTION # 67

An administrator wants to design a PowerProtect Data Manager solution for a Kubernetes cluster. What are the design considerations?

- A. A Kubernetes namespace resides on both CSI and non-CSI-based storage and can be backed up.
- B. Kubernetes namespace can be discovered and backed up.
- C. Kubernetes cluster can be discovered and backed up.

**Answer: B**

Explanation:

In Dell PowerProtect Data Manager, the primary unit of protection for Kubernetes is the Namespace. While the Kubernetes cluster itself is added as an Asset Source, the discovery process identifies the individual namespaces within that cluster as protectable assets.

\* Discovery and Protection: Once the Kubernetes cluster is connected using the discovery IP and credentials, PPDM communicates with the API server to list all namespaces. Administrators can then create protection policies targeting specific namespaces.

\* Storage Requirements: A critical design consideration is that PPDM requires Container Storage Interface (CSI) drivers to facilitate volume snapshots. If a namespace contains volumes residing on non-CSI storage, those specific volumes cannot be backed up by PPDM. Therefore, ensuring the application uses CSI-compliant storage is a prerequisite for successful namespace protection.

### NEW QUESTION # 68

For PowerProtect Data Manager, what is a major consideration when setting up protection policies for SAP HANA?

- A. Log-based data replication
- B. Database indexing strategy
- C. In-memory data storage
- D. Multi-tenant database container structure

**Answer: C**

### NEW QUESTION # 69

What does the Step Log display?

Response:

- A. A list of steps that are completed or are in progress for the Application Host Configuration
- **B. A list of steps that are completed or are in progress for the job or task**
- C. A list of steps that are completed or are in progress for the System Jobs

**Answer: B**

### NEW QUESTION # 70

Which cloud provider is supported with Cloud Disaster Recovery?

- A. ECS
- B. AVS
- **C. Azure**
- D. ICOS

**Answer: C**

### NEW QUESTION # 71

.....

If you haplessly fail the D-PDM-DY-23 exam, we treat it as our responsibility then give you full refund and get other version of D-PDM-DY-23 practice material for free. That is why we win a great deal of customers around the world. Especially for those time-sensitive and busy candidates, all three versions of D-PDM-DY-23 Exam Questions can be chosen based on your preference. Such as app version of our D-PDM-DY-23 learning guide, you can learn it using your phone without the limitation of place or time.
