Maybe you have set a series of to-do list, but it's hard to put into practice for there are always unexpected changes during the SC-100 exam. Here we recommend our SC-100 test prep to you. With innovative science and technology, our study materials have grown into a powerful and favorable product that brings great benefits to all customers. Under the support of our SC-100 Study Materials, passing the SC-100 exam won't be an unreachable mission.

Microsoft Cybersecurity Architect Sample Questions (Q17-Q22):

NEW QUESTION # 17

You need to design a solution to provide administrators with secure remote access to the virtual machines. The solution must meet the following requirements:

- * Prevent the need to enable ports 3389 and 22 from the internet.
- * Only provide permission to connect the virtual machines when required.
- * Ensure that administrators use the Azure portal to connect to the virtual machines.

Which two actions should you include in the solution? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Enable Just Enough Administration (JEA).
- **B. Enable just-in-time (JIT) VM access.**
- C. Enable Azure Active Directory (Azure AD) Privileged Identity Management (PIM) roles as virtual machine contributors.
- D. Configure Azure VPN Gateway.
- **E. Configure Azure Bastion.**

Answer: B,E

Explanation:

NEW QUESTION # 18

Your company has offices in New York City and Los Angeles.

The New York City office contains an on-premises app named App1.

You have an Azure subscription. The subscription is linked to a Microsoft Entra tenant that is hosted in North America.

You plan to manage access to App1 for the users in the Los Angeles office by using Microsoft Entra Private Access. You will deploy Private Access by performing the following actions:

- * Provision an ExpressRoute circuit from the New York City office to the closest peering location.
- * Create an Azure virtual network named VNet1 in the East US Azure region.
- * Deploy a Microsoft Entra application proxy connector to VNet1.

You need to optimize the network for the planned deployment. The solution must meet the following requirements:

- * Maximize redundancy for connectivity to App1.
- * Minimize network latency when accessing App1.
- * Minimize complexity.
- * Minimize costs.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 19

You have an Azure SQL database named DB1 that contains customer information.

A team of database administrators has full access to DB1.

To address customer inquiries, operators in the customer service department use a custom web app named App1 to view the customer information.

You need to design a security strategy for D81. The solution must meet the following requirements:

* When the database administrators access DB1 by using SQL management tools, they must be prevented from viewing the content of the Credit Card attribute of each customer record.

* When the operators view customer records in App1, they must view only the last four digits of the Credit Card attribute.

What should you include in the design? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 20

Your company has Microsoft 365 E5 licenses and Azure subscriptions.

The company plans to automatically label sensitive data stored in the following locations:

* Microsoft SharePoint Online

* Microsoft Exchange Online

* Microsoft Teams

You need to recommend a strategy to identify and protect sensitive data.

Which scope should you recommend for the sensitivity label policies? To answer, drag the appropriate scopes to the correct locations. Each scope may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 21

You need to recommend a strategy for App Service web app connectivity. The solution must meet the landing zone requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

a. NOTE Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 22

.....
