Qualified Nutanix NCA-6.10 Dumps - Best Way To Clear The Exam

Our Nutanix NCA-6.10 practice materials are suitable to exam candidates of different levels. And after using our NCA-6.10 learning prep, they all have marked change in personal capacity to deal with the Nutanix NCA-6.10 Exam intellectually. The world is full of chicanery, but we are honest and professional in this area over ten years.

Nutanix Certified Associate v6.10 Sample Questions (Q11-Q16):

NEW QUESTION # 11

What minimum number of clusters must be registered to Prism Central to open a support case from the UI?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

The correct answer is B. 1

Nutanix Prism Central provides the ability to create and manage support cases directly from the UI, but this functionality requires at least one cluster to be registered to Prism Central. The Support option becomes active once one or more clusters are managed.

Important distinctions:

* Zero clusters (Option A): With no clusters registered, Prism Central is effectively disconnected from any environment and thus cannot associate logs or telemetry with a support case.

* One cluster (Option B): Enables access to support features, including log bundle generation and direct case submission.

* Options C and D (2 or 3 clusters) are incorrect; they are not a requirement for enabling support case functionality.

Prism Central UI Navigation Path:

Settings (gear icon) > Support > Create Support Case

Official Reference:

* Nutanix Prism Central Guide - Support Integration Section

* Excerpt: "To open a support case through Prism Central, ensure at least one cluster is registered.

Support features become available once a cluster is connected."

Conclusion: Only one cluster is required to activate the support case workflow in Prism Central.

NEW QUESTION # 12

An administrator wants to change from Redundancy Factor 2 to 3, but it is not allowed.

What must the administrator check?

- **A. Check that the cluster has five or more nodes.**
- B. Check AOS version and upgrade, if needed.
- C. Check hardware availability of the nodes.
- D. Check that the cluster has been properly licensed.

Answer: A

Explanation:

Redundancy Factor 3 (RF3) requires a minimum of five nodes in the cluster to ensure that data can be distributed across enough nodes to tolerate the failure of two nodes. If the cluster has fewer than five nodes, RF3 cannot be enabled.

* A. Check that the cluster has been properly licensed: Licensing is not directly related to enabling RF3.

* B. Check that the cluster has five or more nodes: Correct, as RF3 requires at least five nodes.

* C. Check hardware availability of the nodes: While hardware health is important, it does not determine RF3 eligibility.

* D. Check AOS version and upgrade, if needed: RF3 requirements are not specific to an AOS version.

NEW QUESTION # 13

After starting LCM updates, an administrator would like to see a detailed view of each update as it progresses.

Which Prism Element dashboard should the administrator use to monitor the LCM updates?

- A. Analysis
- **B. Tasks**
- C. Hardware
- D. Alerts

Answer: B

Explanation:

The Tasks dashboard in Prism Element provides detailed visibility into the progress of all ongoing and completed tasks, including Life

Cycle Manager (LCM) updates. Administrators can monitor the step-by-step status of LCM operations, track failures, and identify bottlenecks.

- * A. Analysis: Incorrect, as this is used for performance monitoring, not task progress.
- * B. Tasks: Correct, as it displays detailed progress for updates and other operations.
- * C. Hardware: Incorrect, as this focuses on the state and configuration of hardware components.
- * D. Alerts: Incorrect, as this shows system alerts and issues, not detailed task progress.

NEW QUESTION # 14

An administrator needs to configure a solution that ensures VMs automatically power on in a specific order at the DR site in the event of a disaster.

Which feature will achieve this?

- **A. Recovery Plan**
- B. Category
- C. Resource Scheduling
- D. Protection Policy

Answer: A

Explanation:

The feature that ensures VMs automatically power on in a specific order at the DR site during a disaster is a Recovery Plan.

Recovery Plans are part of Nutanix's DR functionality and allow administrators to define startup sequences, dependencies, and priorities for VMs during failover scenarios.

Steps:

- * Create a Recovery Plan in Prism Central under the DR section.
- * Configure the VM power-on sequence and dependency rules.
- * Test the Recovery Plan to ensure it operates as intended.

NEW QUESTION # 15

Which Nutanix Disaster Recovery component or feature provides the best Recovery Time Objective (RTO)?

- **A. Metro Availability**
- B. Availability Zone
- C. NearSync
- D. Async

Answer: A

NEW QUESTION # 16

.....

Applying the international recognition third party for payment for NCA-6.10 exam cram, and if you choose us, your money and account safety can be guaranteed. And the third party will protect the interests of you. In addition, NCA-6.10 learning materials are edited and verified by professional experts who possess the professional knowledge for the exam, and the quality can be guaranteed.

We are pass guarantee and money back guarantee and if you fail to pass the exam, we will give you full refund. We provide free update for 365 days for NCA-6.10 Exam Materials for you, so that you can know the latest information for the exam, and the update version will be sent to your email automatically.
