# SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q80-Q85):

**NEW QUESTION # 80**
What do you control with the business context for an exception code?

- A. The possible workflows that can be triggered
- B. The process that can use the exception code
- C. The internal exception code that is assigned to it
- D. The work environment in which you can use the exception code

**Answer: B**

Explanation:
Comprehensive and Detailed In-Depth Explanation:
The business context in SAP EWM exception handling defines the scope of an exception code's applicability.
Option B ("The process that can use the exception code") is correct because it specifies the process (e.g., picking, putaway) where the code can be applied, configured in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Exception Handling > Define Business Context. Option A (work environment) is too vague, option C (internal code) is a mapping detail, and option D (workflows) is a follow- on action, not the context itself.
