Salesforce Certified Platform Foundations Sample Questions (Q99-Q104):

NEW QUESTION # 99

Get Cloudy Consulting (GCC) wants to integrate its financial system with its Salesforce environment. After searching the AppExchange and reviewing documentation for its financial system, GCC did not find anything. What should be used to build this integration?

- A. Financial Services
- B. Commerce Cloud
- **C. MuleSoft**

Answer: C

Explanation:

The tool that GCC should use to build an integration between its financial system and its Salesforce environment is MuleSoft. MuleSoft is a platform that enables companies to connect any application, data, or device using APIs. MuleSoft helps GCC to create and manage integrations between Salesforce and other systems, such as its financial system, without writing any code. MuleSoft also provides prebuilt connectors, templates, and best practices to speed up the integration process.

NEW QUESTION # 100

A Salesforce associate at Get Cloudy Consulting needs a list of all active contacts grouped by Account. What is the first step in building this report?

- A. Create a Contacts report with a filter on Account.
- **B. Create a new report using the Contacts & Accounts report type.**
- C. Create a joined report with accounts and contacts.

Answer: B

Explanation:

The first step in building a report that shows all active contacts grouped by account is to create a new report using the Contacts & Accounts report type. The report type determines the objects and fields that are available for the report. The Contacts & Accounts report type allows users to report on contacts and their related accounts, as well as account fields such as industry, annual revenue, and number of employees.

NEW QUESTION # 101

Get Cloud Consulting (GCC) has started to use Salesforce for its sales and service divisions. GCC would like to automate a process and understands this can be done through declarative and programmatic solutions. Which approach should GCC explore first?

- A. A programmatic approach, unless there is a lack of resources
- **B. A declarative approach, as it allows for quicker and simpler problem resolution**
- C. A programmatic approach, as it is more customizable.

Answer: B

Explanation:

The approach that GCC should explore first to automate a process is a declarative approach, as it allows for quicker and simpler problem resolution. A declarative approach means that GCC can use point-and-click tools and drag-and-drop interfaces to create and modify applications, workflows, rules, and logic, without writing any code. This makes it easier and faster for GCC to build and customize solutions that meet its business needs, without requiring any programming skills or resources.

NEW QUESTION # 102

A salesforce associate at get Cloudy Consulting has been asked to analyze Service Cloud data to determine how many individuals

have called in to the support center.

Which relationship on Case should the associate use?

- **A. Contact**
- B. Owner
- C. Account

Answer: A

Explanation:

The contact relationship on case is used to indicate the individual who has called in to the support center. The contact field on case is a lookup field that allows the user to select a contact from the related account or any other account. The owner relationship on case is used to indicate the user who is responsible for working on the case. The account relationship on case is used to indicate the company or organization that the case is related to.

NEW QUESTION # 103

A Salesforce associate is asked to add a new employee record to their client. Get Cloudy Consulting.

To which object should they add this record?

- A. Accounts
- B. Leads
- **C. Contacts**

Answer: C

Explanation:

The Contact object is where the associate should add the new employee record. The Contact object is used to store information about individuals who are associated with an account, such as name, phone, email, title, and role. The Contact object has a lookup relationship with the Account object, which allows the user to select an account that the contact is related to. The Accounts object is used to store information about companies or organizations that are customers, partners, or competitors. The Accounts object does not store information about individual employees. The Leads object is used to store information about potential customers who have shown interest in a product or service, but have not yet been qualified. The Leads object does not store information about existing employees.

NEW QUESTION # 104

.....
