If you have the doubts or the questions about our product and the purchase procedures you can contact our online customer service personnel at any time. We provide the discounts to the old client and you can have a free download and tryout of our FCP_FAZ_AN-7.4 Test Question before your purchase. So there are many merits of our product. Read the introduction of the characteristics and the functions of our FCP_FAZ_AN-7.4 practice test as follow carefully before you purchase our product.

Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q17-Q22):

NEW QUESTION # 17

What is the purpose of a predefined template on the FortiAnalyzer?

- A. It can be edited and modified as required
- B. It specifies the report layout which contains predefined texts, charts, and macros
- C. It contains predefined data to generate mock reports
- D. It specifies report settings which contains time period, device selection, and schedule

Answer: B

NEW QUESTION # 18

What is the recommended method of expanding disk space on a FortiAnalyzer VM?

- A. From the VM host manager, expand the size of the existing virtual disk and use the # execute format disk command to reformat the disk
- B. From the VM host manager, expand the size of the existing virtual disk
- C. From the VM host manager, add an additional virtual disk and rebuild your RAID array
- D. From the VM host manager, add an additional virtual disk and use the #execute lvm extend <disk number> command to expand the storage

Answer: D

NEW QUESTION # 19

What FortiView tool can you use to automatically build a dataset and chart based on a filtered search result?

- A. Chart Builder
- B. Export to Report Chart
- C. Dataset Library
- D. Custom View

Answer: B

NEW QUESTION # 20

What are event handlers?

- A. Specific matched conditions in the raw logs
- B. SNMP traps
- C. Alert notifications
- D. Threats identified by FortiGuard

Answer: A

NEW QUESTION # 21

Which log will generate an event with the status Unhandled?

- A. A WebFilter log will action=dropped.
- B. An AV log with action=quarantine.
- C. An AppControl log with action=blocked.
- D. An IPS log with action=pass.

Answer: D

Explanation:

In FortiOS 7.4.1 and FortiAnalyzer 7.4.1, the "Unhandled" status in logs typically signifies that the FortiGate encountered a security event but did not take any specific action to block or alter it. This usually occurs in the context of Intrusion Prevention System (IPS) logs.

IPS logs with action=pass: When the IPS engine inspects traffic and determines that it does not match any known attack signatures or violate any configured policies, it assigns the action "pass". Since no action is taken to block or modify this traffic, the status is logged as "Unhandled." Let's look at why the other options are incorrect:

An AV log with action=quarantine: Antivirus (AV) logs with the action "quarantine" indicate that a file was detected as malicious and moved to quarantine. This is a definitive action, so the status wouldn't be "Unhandled." A WebFilter log will action=dropped:

WebFilter logs with the action "dropped" indicate that web traffic was blocked according to the configured web filtering policies.

Again, this is a specific action taken, not an "Unhandled" event.

An AppControl log with action=blocked: Application Control logs with the action "blocked" mean that an application was denied access based on the defined application control rules. This is also a clear action, not "Unhandled."

NEW QUESTION # 22

.....

FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) Practice exams (desktop and web-based) are designed solely to help you get your FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) certification on your first try. Our Fortinet FCP_FAZ_AN-7.4 mock test will help you understand the FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) exam inside out and you will get better marks overall. It is only because you have practical experience of the FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) exam even before the exam itself.
