

100% Pass Quiz AI-102 - Designing and Implementing a Microsoft Azure AI Solution Useful Real Exam

P.S. Free & New AI-102 dumps are available on Google Drive shared by Easy4Engine: <https://drive.google.com/open?id=1nabbB7w76-pOnAbWeijFCGLafqhPIAg>

We are specializing in the AI-102 exam material especially focus on the service after sales as a leader in this field. In order to provide the top service on our AI-102 study engine, our customer agents will work in 24/7. So after purchase, if you have any doubts about the AI-102 learning guide you can contact us. We Promise we will very happy to answer your question with more patience and enthusiasm and try our utmost to help you on the AI-102 training questions.

Microsoft AI-102 (Designing and Implementing a Microsoft Azure AI Solution) exam is designed for individuals who want to test their skills and knowledge in designing and implementing AI solutions using Microsoft Azure. AI-102 exam tests the candidate's ability to design and implement AI algorithms, machine learning models, natural language processing solutions, and computer vision solutions on the Microsoft Azure platform. Candidates are expected to have a good understanding of Azure services and tools for AI, including Azure Cognitive Services, Azure Machine Learning, and Azure Bot Service.

AI-102 Valid Exam Papers - AI-102 Relevant Questions

AI-102 test guide is an examination material written by many industry experts based on the examination outlines of the calendar year and industry development trends. Its main purpose is to help students who want to obtain the certification of AI-102 to successfully pass the exam. Compared with other materials available on the market, the main feature of AI-102 exam materials doesn't like other materials simply list knowledge points. It allows students to find time-saving and efficient learning methods while memorizing knowledge points. With AI-102 study braindumps, learning from day and night will never happen. You can learn more with less time. You will become a master of learning in the eyes of others. With AI-102 study braindumps, successfully passing the exam will no longer be a dream.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q30-Q35):

NEW QUESTION # 30

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft

Statements	Yes	No
Normalization involves eliminating relationships between database tables.	<input type="radio"/>	<input type="radio"/>
Normalizing a database reduces data redundancy.	<input type="radio"/>	<input type="radio"/>
Normalization improves data integrity.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Microsoft

Statements	Yes	No
Normalization involves eliminating relationships between database tables.	<input type="radio"/>	<input checked="" type="radio"/>
Normalizing a database reduces data redundancy.	<input checked="" type="radio"/>	<input type="radio"/>
Normalization improves data integrity.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Answer Area

Microsoft

Statements	Yes	No
Normalization involves eliminating relationships between database tables.	<input type="radio"/>	<input checked="" type="radio"/>
Normalizing a database reduces data redundancy.	<input checked="" type="radio"/>	<input type="radio"/>
Normalization improves data integrity.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION # 31

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area	 Microsoft													
	<table><tr><th>Statements</th><th>Yes</th><th>No</th></tr><tr><td>Platform as a service (PaaS) database offerings in Azure require less setup and configuration effort than infrastructure as a service (IaaS) database offerings.</td><td><input type="radio"/></td><td><input type="radio"/></td></tr><tr><td>Platform as a service (PaaS) database offerings in Azure provide end users with the ability to control and update the operating system version.</td><td><input type="radio"/></td><td><input type="radio"/></td></tr><tr><td>All relational and non-relational platform as a service (PaaS) database offerings in Azure can be paused to reduce costs.</td><td><input type="radio"/></td><td><input type="radio"/></td></tr></table>	Statements	Yes	No	Platform as a service (PaaS) database offerings in Azure require less setup and configuration effort than infrastructure as a service (IaaS) database offerings.	<input type="radio"/>	<input type="radio"/>	Platform as a service (PaaS) database offerings in Azure provide end users with the ability to control and update the operating system version.	<input type="radio"/>	<input type="radio"/>	All relational and non-relational platform as a service (PaaS) database offerings in Azure can be paused to reduce costs.	<input type="radio"/>	<input type="radio"/>	
Statements	Yes	No												
Platform as a service (PaaS) database offerings in Azure require less setup and configuration effort than infrastructure as a service (IaaS) database offerings.	<input type="radio"/>	<input type="radio"/>												
Platform as a service (PaaS) database offerings in Azure provide end users with the ability to control and update the operating system version.	<input type="radio"/>	<input type="radio"/>												
All relational and non-relational platform as a service (PaaS) database offerings in Azure can be paused to reduce costs.	<input type="radio"/>	<input type="radio"/>												

Answer:

Explanation:

Answer Area

Statements

	Yes	No
Platform as a service (PaaS) database offerings in Azure require less setup and configuration effort than infrastructure as a service (IaaS) database offerings.	<input checked="" type="radio"/>	<input type="radio"/>
Platform as a service (PaaS) database offerings in Azure provide end users with the ability to control and update the operating system version.	<input type="radio"/>	<input checked="" type="radio"/>
All relational and non-relational platform as a service (PaaS) database offerings in Azure can be paused to reduce costs.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION # 32

You are building an app that will perform translations by using the Azure AI Translator service.

You need to ensure that the app will translate user-inputted text.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```

while (true)
{
    Console.WriteLine("Enter text to translate or 'exit':");
    string input = Console.ReadLine();
    if (input.ToLower() == "exit") break;

    Response<IReadOnlyList<TranslatedTextItem>> translationResponse =
        await client.TranslateAsync(
            TranslateAsync(targetLanguage, input),
            Translate(targetLanguage, input),
            TranslateAsync(targetLanguage, input),
            TranslationRecognition);

    IReadOnlyList<TranslatedTextItem> translations = translationResponse.Value;
    TranslatedTextItem translation = translations[0];
    string sourceLanguage = translation?.DetectedLanguage?.Language;
    Console.WriteLine($"'{input}' translated from {sourceLanguage} to {translation?.Translations[0].To} as
}
  
```

Options for the first dropdown (await client.TranslateAsync):

- ☒ TranslateAsync(targetLanguage, input)
- ☐ Translate(targetLanguage, input)
- ☐ TranslateAsync(targetLanguage, input)
- ☐ TranslationRecognition

Options for the second dropdown (translation?.Translations[0].To):

- ☐ (translation?.Translations[0].Text)."
- ☐ translations.Value."
- ☐ translations[0].text."
- ☐ (translations.Text)."
- ☒ (translation?.Translations[0].Text)."

Answer:

Explanation:

Answer Area

```

while (true)
{
    Console.WriteLine("Enter text to translate or 'exit':");
    string input = Console.ReadLine();
    if (input.ToLower() == "exit") break;

    Response<IReadOnlyList<TranslatedTextItem>> translationResponse =
        await client.TranslateAsync(
            TranslateAsync(targetLanguage, input),
            Translate(targetLanguage, input),
            TranslateAsync(targetLanguage, input),
            TranslationRecognition);

    IReadOnlyList<TranslatedTextItem> translations = translationResponse.Value;
    TranslatedTextItem translation = translations[0];
    string sourceLanguage = translation?.DetectedLanguage?.Language;
    Console.WriteLine($"'{input}' translated from {sourceLanguage} to {translation?.Translations[0].To} as
}
  
```

Options for the first dropdown (await client.TranslateAsync):

- ☒ TranslateAsync(targetLanguage, input)
- ☐ Translate(targetLanguage, input)
- ☐ TranslateAsync(targetLanguage, input)
- ☐ TranslationRecognition

Options for the second dropdown (translation?.Translations[0].To):

- ☐ (translation?.Translations[0].Text)."
- ☐ translations.Value."
- ☐ translations[0].text."
- ☐ (translations.Text)."
- ☒ (translation?.Translations[0].Text)."

Explanation:

```

Answer Area

while (true)
{
    Console.WriteLine("Enter text to translate or 'exit':");
    string input = Console.ReadLine();
    if (input.ToLower() == "exit") break;
    Response<IReadOnlyList<TranslatedTextItem>> translationResponse =
        await client.TranslateAsync(TranslateAsync(targetLanguage, input)).ConfigureAwait(false);
    IReadOnlyList<TranslatedTextItem> translations = translationResponse.Value;
    TranslatedTextItem translation = translations[0];
    string sourceLanguage = translation?.DetectedLanguage?.Language;
    Console.WriteLine($"{input} translated from {sourceLanguage} to {translation?.Translations[0].To} as '
        (translation?.Translations?[0]?.Text);";
}

```

In the Azure AI Translator .NET SDK (Azure.AI.Translation.Text), the TextTranslationClient exposes TranslateAsync overloads that accept a target language (e.g., "fr") and an input string to translate. The call returns a Response<IReadOnlyList<TranslatedTextItem>>. Each TranslatedTextItem includes the automatically detected source language (DetectedLanguage.Language) and a collection of translations in Translations. To print the translated text for the first target language, read translation.Translations[0].Text.

Therefore:

- * Use TranslateAsync(targetLanguage, input) to perform the translation.
- * Output translation.Translations[0].Text to display the translated result.

NEW QUESTION # 34

Select the answer that correctly completes the sentence.

Answer:

Explanation:

Explanation

NEW QUESTION # 35

.....

If you fail in the exam with our AI-102 quiz prep we will refund you in full at one time immediately. If only you provide the proof which include the exam proof and the scanning copy or the screenshot of the failure marks we will refund you immediately. If any problems or doubts about our AI-102 exam torrent exist, please contact our customer service personnel online or contact us by mails and we will reply you and solve your doubts immediately. The AI-102 Quiz prep we sell boost high passing rate and hit rate so you needn't worry that you can't pass the exam too much. But if you fail in please don't worry we will refund you. Take it easy before you purchase our AI-102 quiz torrent.
