

Reliable Salesforce-MuleSoft-Developer-I Test Pattern - New Salesforce-MuleSoft-Developer-I Exam Book

BONUS!!! Download part of DumpsFree Salesforce-MuleSoft-Developer-I dumps for free: <https://drive.google.com/open?id=1gO84gPdoL5l2cAH5BAS0tT28D2VvtPZy>

Our Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) exam dumps are useful for preparation and a complete source of knowledge. If you are a full-time job holder and facing problems finding time to prepare for the Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) exam questions, you shouldn't worry more about it. One of the main unique qualities of the DumpsFree Salesforce Exam Questions is its ease of use. Our practice exam simulators are user and beginner friendly. You can use Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) PDF dumps and Web-based software without installation. Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) PDF questions work on all the devices like smartphones, Macs, tablets, Windows, etc. We know that it is hard to stay and study for the Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) exam dumps in one place for a long time. Therefore, you have the option to use Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) PDF questions anywhere and anytime.

Though there are three versions of the Salesforce-MuleSoft-Developer-I training braindumps: the PDF, Software and APP online. I like the Software version the most. This version of our Salesforce-MuleSoft-Developer-I training quiz is suitable for the computers with the Windows system. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and the users can practice and learn our Salesforce-MuleSoft-Developer-I learning guide at any time.

Efficient Salesforce - Salesforce-MuleSoft-Developer-I - Reliable Salesforce Certified MuleSoft Developer (Mule-Dev-201) Test Pattern

Our company has spent more than 10 years on compiling Salesforce-MuleSoft-Developer-I study materials for the exam in this field, and now we are delighted to be here to share our study materials with all of the candidates for the exam in this field. There are so many striking points of our Salesforce-MuleSoft-Developer-I Preparation exam. If you just free download the demos of the Salesforce-MuleSoft-Developer-I learning guide, then you can have a better understanding of our products. The demos are a little part of the exam questions and answers for you to check the quality and validity.

Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.

Topic 2	<ul style="list-style-type: none"> Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.
Topic 3	<ul style="list-style-type: none"> Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.
Topic 4	<ul style="list-style-type: none"> Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.
Topic 5	<ul style="list-style-type: none"> Designing APIs: Designing APIs involves describing the lifecycle of the modern API and using RAML to define various aspects of an API. It includes identifying when to use query parameters vs URI parameters, and defining API parameters.
Topic 6	<ul style="list-style-type: none"> Using Connectors: It focuses on retrieving data from REST services using HTTP Request or REST Connector. Moreover, the topic covers using a Web Service Consumer connector for SOAP web services and the Transform Message component.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q153-Q158):

NEW QUESTION # 153

A Scatter-Gather processes three separate HTTP requests. Each request returns a Mule event with a JSON payload. What is the final output of the Scatter-Gather?

- A. An Array of the three Mule event Objects
- B. An Array of the three JSON payload Objects
- C. An Object containing all three Mule event Objects
- D. An Object containing all three JSON payload Objects

Answer: C

Explanation:

Correct answer is An Object containing all three Mule event Objects

The Scatter-Gather component is a routing event processor that processes a Mule event through different parallel processing routes that contain different event processors. Each route receives a reference to the Mule event and executes a sequence of one or more event processors. Each of these routes uses a separate thread to execute the event processors, and the resulting Mule event can be either the same Mule event without modifications or a new Mule event with its own payload, attributes, and variables. The Scatter-Gather component then combines the Mule events returned by each processing route into a new Mule event that is passed to the next event processor only after every route completes successfully.

The Scatter-Gather component executes each route in parallel, not sequentially. Parallel execution of routes can greatly increase the efficiency of your Mule application and may provide more information than sequential processing.

Sample output is as below

Table Description automatically generated with low confidence

MuleSoft Documentation reference :<https://docs.mulesoft.com/mule-runtime/4.3/scatter-gather-concept>

NEW QUESTION # 154

Refer to the exhibits.

A Mule application contains a Choice router. What is logged when the flow completes?

- A. "REGION"
- B. EU
- C. ["US", "EU"]
- D. US

Answer: D

NEW QUESTION # 155

Refer to the exhibits.

This main mule application calls a separate flow called as ShippingAddress which returns the address corresponding to the name of the user sent to it as input. Output of this ShippingAddress is stored in a target variable named address.

Next set of requirement is to have a setPayload transformer which will set below two values

- 1) orderkey which needs to set to be equal to the order element received in the original request payload.
 - 2) addressKey which needs to be set to be equal to the address received in response of ShippingAddress flow
- What is the straightforward way to properly configure the Set Payload transformer with the required data?

A mule application is being developed which will process POST requests coming from clients containing the name and order information. Sample request is as below

- A. 1. 1. {
2. 2. orderkey: "attributes.order",
3. 3. addresskey: "vars.address"
4. }
- B. 1. 1. {
2. 2. orderkey: "payload.order",
3. 3. addresskey: "address"
4. }
- C. 1. 1. {
2. 2. orderkey: "attributes.shippingaddress.order",
3. 3. addresskey: "payload"
4. }
- D. 1. 1. {
2. 2. orderkey: "payload.order",
3. 3. addresskey: "vars.address"
4. 4. }

Answer: D

Explanation:

Correct answer is as below. In this case address will be stored in a variable. Hence payload will not be overwritten and will contain order details

```
{  
orderkey: "payload.order",  
addresskey: "vars.address"  
}
```

NEW QUESTION # 156

What execution model is used by For Each and Batch Job scopes?

- A. Both are multi-threaded
- B. For Each is single-threaded and Batch Job is multi-threaded
- C. Batch Job is single-threaded and For Each Is multi-threaded
- D. Both are single-threaded

Answer: B

NEW QUESTION # 157

A Mule project contains a DataWeave module called MyModule.dwl that defines a function named formatString. The module is located in the project's src/main/resources/modules folder.

What is the correct way in DataWeave code to import MyModule using a wildcard and then call the module's formatString function?

- A.
- B.

- C. □
- D. □

Answer: A

NEW QUESTION # 158

.....

With our Salesforce-MuleSoft-Developer-I exam materials, you will have more flexible learning time. With our Salesforce-MuleSoft-Developer-I practice prep, you can flexibly arrange your study time according to your own life. You don't need to be in a hurry to go to classes after work as the students who take part in a face-to-face class, and you also never have to disrupt your schedule for learning. Just use your computer, IPAD or phone, then you can study with our Salesforce-MuleSoft-Developer-I Practice Questions.
