

Latest Test HP HPE7-J02 Simulations & Exam HPE7-J02 Course

DOWNLOAD the newest DumpsActual HPE7-J02 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1d-o7Y35MkDGXZHbFVz7-om6qMdBFVCKb>

We have prepared our HP HPE7-J02 Training Materials for you. They are professional practice material under warranty. Accompanied with acceptable prices for your reference, all our materials with three versions are compiled by professional experts in this area more than ten years long.

HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.
Topic 2	<ul style="list-style-type: none">Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.
Topic 3	<ul style="list-style-type: none">Planning and Validating Storage Solutions: This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively.
Topic 4	<ul style="list-style-type: none">Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.
Topic 5	<ul style="list-style-type: none">HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.
Topic 6	<ul style="list-style-type: none">Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.

Exam HPE7-J02 Course | Exam HPE7-J02 Cram Review

Countless Advanced HPE Storage Integrator Solutions Written Exam HPE7-J02 exam candidates have already passed their HPE7-J02 certification exam and they all got help from top-notch HPE7-J02 pdf questions and practice tests. You should not ignore it and must try real HPE7-J02 exam questions today. The DumpsActual is committed to making the Advanced HPE Storage Integrator Solutions Written Exam HPE7-J02 exam preparation process simple, quick, and smart in all aspects. To avail this objective the DumpsActual is offering valid, updated, and real HPE7-J02 practice test questions in three easy-to-use and high-in-demand formats. These formats are HP PDF Questions files, desktop practice test software, and web-based HPE7-J02 Practice Test software. All these three Advanced HPE Storage Integrator Solutions Written Exam HPE7-J02 exam question formats are designed and verified by experienced and qualified HP HPE7-J02 certification exam trainers. So you can trust Advanced HPE Storage Integrator Solutions Written Exam HPE7-J02 practice test questions and start HPE7-J02 exam preparation without wasting further time.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q13-Q18):

NEW QUESTION # 13

Your customer has 2 Alletra 6000 arrays configured for asynchronous replication. The facilities team is planning grid maintenance in the datacenter hosting the source array. They want to proactively move all host I/O to the target array.

Which action needs to be done on the Alletra group level to move the host I/O to the other datacenter?

- A. Handover
- **B. Failover**
- C. Demote
- D. Promote

Answer: B

NEW QUESTION # 14

Which statement is correct when deploying an HPE Zerto DR solution where an Extended Journal Copy is required with a one-year retention period?

- A. An additional license is required to enable the Extended Journal Copy feature.
- B. Extended Journal Copies always come from the target site to avoid impact on the production site.
- **C. HPE Zerto integrates with HPE StoreOnce to enable long-term retention for Extended Journal Copies.**
- D. HPE Zerto supports a maximum of 30-day retention and cannot exceed this period.

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Zerto Extended Journal allows retention up to one year by integrating with secondary storage like HPE StoreOnce. Short-term journals (seconds to days) reside on primary replication storage, while long-term copies (weeks/months/years) are offloaded to StoreOnce for cost-efficient retention.

Distractors:

A: No separate license is required - it is a standard Zerto feature when integrated.

C: Extended Journals can be sourced from production or target, depending on setup; not "always" target.

D: Incorrect - Zerto supports >30 days retention with Extended Journal.

Key Concept: Zerto + HPE StoreOnce for long-term DR retention.

Reference: HPE Zerto with StoreOnce White Paper.

NEW QUESTION # 15

Exhibit shows HPE StoreOnce Catalyst Store Security Settings:

Server Controlled Data Immutability enabled (7 days).

Maximum ISV Controlled Data Immutability Retention (90 days).

Which statement is correct?

- A. Server-Controlled and ISV-Controlled Data Immutability values do not need to match when both are configured.
- B. The Maximum ISV Controlled Data Immutability Retention parameter must be set to 0 for optimal Veeam v12 support.
- C. Server-Controlled Data Immutability is required to achieve the highest immutability with Veeam v12 backups.
- D. Maximum ISV Controlled Data Immutability Retention allows the ISV backup application to manage item-level immutability.

Answer: D

NEW QUESTION # 16

A local startup company has grown rapidly and now needs block storage for enterprise workloads. They are virtualized with VMware and have a small IT staff. They are evaluating an HPE Alletra MP and a Pure FlashArray //X90R4.

Environment:

VMware 8.0

Cisco switches

Dell servers

HPE servers

What statement about HPE should you point out as a differentiator?

- A. HPE has the ability to disable garbage collection and overhead to meet workload requirements.
- B. HPE has live workload migration via the ActiveWorkload feature, based on a stretch cluster.
- C. HPE provides full-stack visibility up to the app layer with prescriptive, actionable recommendations.
- D. HPE can natively tier data on a software-only deployment.

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Alletra with InfoSight provides end-to-end visibility from infrastructure through to virtual machines and applications. It offers prescriptive, AI-driven recommendations to simplify management - a key differentiator for startups with small IT staff. Pure arrays do not offer the same level of integrated, cross-stack predictive analytics.

Distractors:

B: "ActiveWorkload" is not an HPE feature - HPE uses Peer Persistence for stretch clusters.

C: Garbage collection is managed automatically in HPE arrays; disabling it is not supported.

D: Data tiering is not natively provided as "software-only" - HPE uses GreenLake and Alletra services.

Key Concept: InfoSight = predictive analytics and app-to-infra visibility differentiator.

Reference: HPE InfoSight for Alletra Datasheet.

NEW QUESTION # 17

A pool of Microsoft SQL servers started to use the Alletra 6000 family array six months ago. The data growth has been higher than expected, and the performance of the databases is facing some latency issues.

Which method would allow both capacity and performance to grow when expanding the array, while keeping the management simple?

- A. By initially selecting the timeless storage option for the array.
- B. By adding more arrays and capacity to a single scale-out group.
- C. By including more NIC cards to load balance host traffic.
- D. By selecting more flash to cache ratio on the expansion shelves.

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Alletra 6000 is a scale-out architecture array. Adding more arrays to a single scale-out group increases both performance (IOPS, throughput) and capacity, while maintaining single-pane management via HPE Data Services Cloud Console. This is the most

efficient way to address both capacity growth and latency reduction for SQL workloads.

Distractors:

B: Adding NICs may help with throughput but not backend latency or capacity scaling.

C: Flash-to-cache ratios can optimize read caching but don't fundamentally increase system-wide performance.

D: Timeless storage is a procurement/licensing option, not a performance/capacity scaling method.

Key Concept: Alletra 6000 scale-out clustering for balanced growth of capacity and performance.

Reference: HPE Alletra 6000 Technical Architecture Guide.

NEW QUESTION # 18

If you purchase our HPE7-J02 preparation questions, it will be very easy for you to easily and efficiently find the exam focus. More importantly, if you take our products into consideration, our HPE7-J02 study materials will bring a good academic outcome for you. At the same time, we believe that our HPE7-J02 training quiz will be very useful for you to have high quality learning time during your learning process. Your success is 100% guaranteed with our HPE7-J02 learning guide!
