VMCE_v12 Reliable Exam Materials, VMCE_v12 Learning Materials

Exam4PDF provides an opportunity for fulfilling your career goals and significantly ease your way to become VMCE_v12 Certified

professional. While you are going attend your VMCE_v12 exam, in advance knowledge assessment skips your worries regarding actual exam format. Groom up your technical skills with Exam4PDF practice test training that has no substitute at all. Get the best possible training through Exam4PDF; our practice tests particularly focus the key contents of VMCE_v12 Certification exams. Exam4PDF leads the VMCE_v12 exam candidates towards perfection while enabling them to earn the VMCE_v12 credentials at the very first attempt. The way our products induce practical learning approach, there is no close alternative.

Veeam VMCE_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	• Initial security considerations: This section defines ways and tools to secure the Veeam backup server.
Topic 2	• Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.
Topic 3	• Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.
Topic 4	• Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.
Topic 5	• Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Topic 6	• Moving or copying backups: This section of the exam covers use cases for backup processes using VeeaMover.
Topic 7	• Data protection strategies: This section of the exam covers an overview of data protection strategies.
Topic 8	• Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.
Topic 9	• Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Topic 10	• Incident Response Planning: This section of the exam covers integrating Veeam Backup and Replication into the incident response strategy.
Topic 11	• Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.
Topic 12	• Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.
Topic 13	• Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.
Topic 14	• Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.

Veeam Certified Engineer v12 Sample Questions (Q65-Q70):

NEW QUESTION # 65
A business has several remote sites that are backed up to the central Veeam infrastructure. After a few months, the amount of data has grown and backup copy jobs do not fit into the backup window. The current bandwidth is 20 Mbps. Management wants to avoid any additional investments.
Which option would improve backup duration?

- A. Deploy WAN accelerators for remote sites
- B. Add more RAM to central VBR Server
- C. Increase bandwidth to remote sites
- D. Upgrade all remote instances to V12

Answer: A

Explanation:
WAN accelerators are a feature in Veeam Backup & Replication that optimize data transfer over WAN connections. By deploying WAN accelerators at both the central VBR (Veeam Backup & Replication) server location and the remote sites, data transfer can be optimized to fit into the existing backup window without the need for additional bandwidth investment. WAN accelerators work by caching repetitive patterns of data, which significantly reduces the amount of data that needs to be transferred over the network after the initial job run. This makes it a cost-effective solution for improving backup duration when bandwidth is limited.

NEW QUESTION # 66
The director of a business needs a folder of files restored from the corporate shared drive. This drive sits on a Windows VM backed up by Veeam Backup & Replication. The director does not want the folder restored to its original location. Where can this folder be restored to using the Veeam Guest OS Restore wizard?

- A. An e-mail as an attachment
- B. An AWS S3 bucket
- C. A valid UNC path
- D. An Azure blob

Answer: C

Explanation:
Using the Veeam Guest OS File Restore wizard, files or folders can be restored to a valid UNC (Universal Naming Convention) path. This means that the director's folder can be restored to any network location that the Windows VM has access to, as long as it's specified in the UNC format, such as \\Server\SharedFolder.
This allows for the flexibility of restoring the data to a different location than the original one. References:

* Veeam Help Center: Restoring Guest OS Files

NEW QUESTION # 67
To suppress Veeam ONE alarms under specific conditions or when a specific event occurs, which of these options can be selected? (Choose three.)

- A. Storage snapshot deletion
- B. Snapshot deletion
- C. Veeam backup activity
- D. Storage snapshot creation
- E. Snapshot creation
- F. High CPU usage

Answer: B,C,E

Explanation:

NEW QUESTION # 68
Veeam ONE has been Installed and configured. It is necessary to monitor the three Veeam Backup & Replication servers in order to see how much backup storage is being used on the performance and capacity tiers of the backup repository server. How can this be achieved?

- A. Add each Veeam Backup & Replication server and monitor storage usage through the Data Protection view.
- B. Install the Veeam ONE Connector on each Veeam Backup & Replication server and the backup repository server. Approve the connection via the Data Protection View.

- C. Add Mm* virtual infrastructure and look up (he backup repository server to see the guest disk space.
- D. Add the three Veeam Backup & Replication servers and the backup repository server under Infrastructure view.

Answer: A

NEW QUESTION # 69

Which of the following actions generated the data recommended when raising a technical support case regarding a failed Veeam Backup & Replication job?

- A. Take a Veeam Zip of the VMs involved in the failed job
- B. Generate a zip of log files using the Support Information function
- C. Export the license file from the configuration options in Enterprise Manager
- D. Manually run a Veeam configuration backup to generate a new .bco file

Answer: B

NEW QUESTION # 70

......
