

High-quality Study Guide C-TS422-2023 Pdf | SAP C-TS422-2023 Hottest Certification: SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing

P.S. Free 2026 SAP C-TS422-2023 dumps are available on Google Drive shared by ITExamSimulator:
<https://drive.google.com/open?id=1JgTy7UoKVsh-Fe5rln0jgjLGE-LJBoCe>

ITExamSimulator is the ideal platform for you to prepare successfully for the SAP C-TS422-2023 certification. Recognize that it is a defining moment in your life as your prospects rest on making a mark in the sector. Do not delay pursuing the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing C-TS422-2023 Exam Certification with the help of our exceptional C-TS422-2023 dumps.

SAP C-TS422-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Production Orders in SAP S• 4HANA: This section covers BOM item categorization, order status management, availability checks, routing selection, order type setup, and material handling processes.
Topic 2	<ul style="list-style-type: none">• Introduction to SAP S• 4HANA Production Planning: This section covers an overview of production planning components, functions, and planning approaches. Exploration of emerging trends.
Topic 3	<ul style="list-style-type: none">• Introduction to SAP S• 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S• 4HANA, its main components, business applications, and user experience strategy.

Topic 4	<ul style="list-style-type: none"> • Material Requirements Planning in SAP S • 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.
Topic 5	<ul style="list-style-type: none"> • Lean Manufacturing in SAP S • 4HANA: This section covers repetitive manufacturing master data, line load planning, and Kanban systems.
Topic 6	<ul style="list-style-type: none"> • Capacity Planning in SAP S • 4HANA: This section covers a discussion of SAP S • 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.
Topic 7	<ul style="list-style-type: none"> • Process Orders in SAP S • 4HANA: This section covers an introduction to process order components, processing, and relevant master data objects. Overview of Good Manufacturing Practices (GMP) features.
Topic 8	<ul style="list-style-type: none"> • Advanced Planning in SAP S • 4HANA: This section includes an overview of advanced planning fundamentals and master data. Explanation of key tools and processes. Discussion of planning evaluation concepts.
Topic 9	<ul style="list-style-type: none"> • Demand Management in SAP S • 4HANA: This section covers a comparison of production methods in various manufacturing environments.

Free PDF Pass-Sure C-TS422-2023 - Study Guide SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Pdf

We update our SAP C-TS422-2023 exam dumps over time and mark the changes online. Enroll in the SAP C-TS422-2023 exam dumps and start your preparation with SAP C-TS422-2023 practice questions. We will provide you with the information covered in the current test and incorporate materials that originate from SAP C-TS422-2023 Exam Dumps. You will get a handful of knowledge about topics that will benefit your professional career.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q35-Q40):

NEW QUESTION # 35

Your project team decides to use a make-to-order planning strategy for a strategic material in discrete manufacturing. What are the impacts of this decision? Note: There are 3 correct answers to this question.

- A. Both the reduction of make-to-order stock and requirements occur on delivery.
- B. Storage location MRP areas are required for sales-order-specific stock.
- C. Net requirements calculation is carried out for every sales order individually.
- D. Production orders are created with sales order reference.
- E. Sales orders have to be ATP-confirmed (available-to-promise) to be saved.

Answer: C,D,E

NEW QUESTION # 36

You use planning strategy Finite Scheduling with Reverse and want to allow scheduling in the past. How can you parameterize this in the strategy profile?

- A. Specify a negative planning horizon.
- B. Specify a negative PP/DS horizon.

- C. Specify a negative offset time.
- D. Specify a negative opening period.

Answer: C

Explanation:

In SAP S/4HANA PP/DS, the Finite Scheduling with Reverse strategy (configured in the strategy profile, transaction /SAPAPO/CDPSC11) schedules operations backward from a fixed end date, respecting finite capacity. To allow scheduling in the past (e.g., before today's date):

* Specify a negative offset time(A): In the strategy profile (Detailed Scheduling tab, field: Scheduling Offset), a negative value (e.g., -2 days) shifts the scheduling reference point into the past. This allows operations to be scheduled before the current date, accommodating scenarios where late planning or historical adjustments are needed, while still respecting capacity constraints.

Negative opening period(B) isn't a standard PP/DS parameter-it's a production order term (MRP 2 view) for order start buffers, not scheduling control. Negative planning horizon(C) (Planning Horizon in /SAPAPO

/CDPSC11) defines the future planning scope, not past scheduling. Negative PP/DS horizon(D) refers to the PP/DS planning horizon (Customizing), which limits planning scope forward, not backward. This is per SAP's PP/DS scheduling configuration.

NEW QUESTION # 37

You want to insert an operation at a certain time on a work center in the graphical planning table. The planning direction is forward. The desired dispatching time coincides with an operation that has previously been dispatched.

How does the insertion take place?

- A. The new operation is inserted at the desired time; the previously dispatched operation is moved backward.
- B. The previously dispatched operation stays as is; the new operation is inserted after the dispatched operation.
- C. The new operation is inserted at the desired time; the previously dispatched operation is moved forward.
- D. The previously dispatched operation stays as is; the new operation is inserted before the dispatched operation.

Answer: A

NEW QUESTION # 38

What does forecasting in the demand planning cycle include?

Note: There are 3 correct answers to this question

- A. Market intelligence
- B. Past quotation quantities
- C. Past sales order quantities
- D. Past production planning quantities
- E. One-off events

Answer: A,C,E

Explanation:

One-off events: These are special events that affect the demand for a product, such as promotions, holidays, or product launches. You can use the one-off events function in SAP S/4HANA to create and maintain events and assign them to products. The system considers the events when generating the forecast and adjusts the demand accordingly.

Past sales order quantities: These are the historical data of the actual sales orders for a product. You can use the past sales order quantities as the basis for forecasting the future demand. The system applies statistical methods and algorithms to analyze the past sales order quantities and identify the trends, patterns, and seasonality of the demand.

Market intelligence: This is the external information that influences the demand for a product, such as market research, competitor analysis, or customer feedback. You can use the market intelligence function in SAP S/4HANA to import and integrate market data from various sources into the forecast. The system adjusts the demand based on the market intelligence data and the weighting factors that you define. Reference: Exploring the Steps of Supply Chain Planning; SAP S/4HANA Production Planning and Manufacturing II, Unit 2: Demand Management; [SAP S/4HANA Production Planning and Manufacturing Certification Guide], page 76.

NEW QUESTION # 39

Your project team decides to use a make-to-order planning strategy for a strategic material in discrete manufacturing. What are the impacts of this decision? Note: There are 3 correct answers to this question.

- A. Both the reduction of make-to-order stock and requirements occur on delivery.
- B. Storage location MRP areas are required for sales-order-specific stock.
- C. Net requirements calculation is carried out for every sales order individually.
- D. Production orders are created with sales order reference.
- E. Sales orders have to be ATP-confirmed (available-to-promise) to be saved.

Answer: C,D,E

Explanation:

Choosing a make-to-order (MTO) planning strategy (e.g., 20) in SAP S/4HANA discrete manufacturing has these impacts:

* Net requirements calculation is carried out for every sales order individually(A): In MTO (material master, MRP 3 view, Strategy: 20), MRP (MD02) calculates requirements separately for each sales order (VA01), creating individual dependent requirements and planned orders tied to the sales order number, ensuring traceability and isolation from other demands.

* Production orders are created with sales order reference(B): When converting planned orders (CO41) or creating orders directly (CO01), the system links them to the sales order (field: Sales Order in CO01), enabling cost tracking and stock assignment to that specific order.

* Sales orders have to be ATP-confirmed (available-to-promise) to be saved(E): In MTO, the system performs an ATP check (configured in OVZ9) during sales order entry to confirm component availability or procurement lead times. If not confirmed, the order cannot be saved unless availability is bypassed (based on settings), ensuring feasibility.

Storage location MRP areas(C) are optional for MTO stock segregation but not required-standard MTO uses sales order stock without MRP areas unless explicitly configured.Reduction on delivery(D) applies to stock reduction (VL01N), but requirements reduction occurs earlier (e.g., at goods issue), not strictly at delivery. This is per SAP's MTO process documentation.

NEW QUESTION # 40

.....

Your chances of passing the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C-TS422-2023) certification exam the first time around can be greatly improved if you attempt the ITEXAMSimulator SAP C-TS422-2023 practice exam. To help you succeed on your first try at the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C-TS422-2023) exam, ITEXAMSimulator has created three formats of SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C-TS422-2023) practice exam.
