FCSS_SASE_AD-24 Latest Training, FCSS_SASE_AD-24 Official Practice Test

P.S. Free 2026 Fortinet FCSS_SASE_AD-24 dumps are available on Google Drive shared by Pass4training:
https://drive.google.com/open?id=1Ns-pe7Dwfa-jc9sddbtytQwjnFz9kmWi

Before the clients buy our FCSS_SASE_AD-24 guide prep they can have a free download and tryout before they pay for it. The client can visit the website pages of our exam products and understand our FCSS_SASE_AD-24 study materials in detail. You can see the demo, the form of the software and part of our titles. As the demos of our FCSS_SASE_AD-24 Practice Engine is a small part of the questions and answers, they can show the quality and validity. Once you free download the demos, you will find our exam questions are always the latest and best.

The FCSS_SASE_AD-24 PDF is the collection of real, valid, and updated FCSS - FortiSASE 24 Administrator (FCSS_SASE_AD-24) practice questions. The Fortinet FCSS_SASE_AD-24 PDF dumps file works with all smart devices. You can use the FCSS_SASE_AD-24 PDF questions on your tablet, smartphone, or laptop and start FCSS_SASE_AD-24 Exam Preparation anytime and anywhere. The FCSS_SASE_AD-24 dumps PDF provides you with everything that you must need in FCSS_SASE_AD-24 exam preparation and enable you to crack the final FCSS_SASE_AD-24 exam quickly.

Pass Guaranteed Quiz 2026 Fortinet FCSS_SASE_AD-24: FCSS - FortiSASE 24 Administrator – Valid Latest Training

Once you enter into our interface, nothing will disturb your learning the FCSS_SASE_AD-24 training engine except the questions and answers. So all you attention will be concentrated on study. At the same time, each process is easy for you to understand. There will have small buttons on the FCSS_SASE_AD-24 Exam simulation to help you switch between the different pages. It does not matter whether you can operate the computers well. Our FCSS_SASE_AD-24 training engine will never make you confused.

Fortinet FCSS - FortiSASE 24 Administrator Sample Questions (Q13-Q18):

NEW QUESTION # 13
What challenges might arise when deploying SD-WAN using FortiSASE?
Response:

- A. Integrating with existing network infrastructure
- B. Simplifying the network architecture
- C. Managing user expectations
- D. Reducing overall security measures

Answer: A

NEW QUESTION # 14

A customer needs to implement device posture checks for their remote endpoints while accessing the protected server. They also want the TCP traffic between the remote endpoints and the protected servers to be processed by FortiGate.

In this scenario, which three setups will achieve the above requirements? (Choose three.)

- A. Configure private access policies on FortiSASE with ZTNA.
- B. Configure ZTNA servers and ZTNA policies on FortiGate.
- C. Sync ZTNA tags from FortiSASE to FortiGate.
- D. Configure ZTNA tags on FortiGate.
- E. Configure FortiGate as a zero trust network access (ZTNA) access proxy.

Answer: B,D,E

Explanation:

To meet the requirements of implementing device posture checks for remote endpoints and ensuring that TCP traffic between the endpoints and protected servers is processed by FortiGate, the following three setups are necessary:

Configure ZTNA tags on FortiGate (Option A):

ZTNA (Zero Trust Network Access) tags are used to define access control policies based on the security posture of devices. By configuring ZTNA tags on FortiGate, administrators can enforce granular access controls, ensuring that only compliant devices can access protected resources.

Configure FortiGate as a zero trust network access (ZTNA) access proxy (Option B):

FortiGate can act as a ZTNA access proxy, which allows it to mediate and secure connections between remote endpoints and protected servers. This setup ensures that all TCP traffic passes through FortiGate, enabling inspection and enforcement of security policies.

Configure ZTNA servers and ZTNA policies on FortiGate (Option C):

To enable ZTNA functionality, administrators must define ZTNA servers (the protected resources) and create ZTNA policies on FortiGate. These policies determine how traffic is routed, inspected, and controlled based on device posture and user identity.

NEW QUESTION # 15

Refer to the exhibits. When remote users connected to FortiSASE require access to internal resources on Branch-2. how will traffic be routed?

- A. FortiSASE will use the AD VPN protocol and determine that traffic will be directed to Branch-2 directly, using a dynamic route
- B. FortiSASE will use the SD-WAN capability and determine that traffic will be directed to HUB-1, which will then route traffic to Branch-2.
- C. FortiSASE will use the AD VPN protocol and determine that traffic will be directed to Branch-2 directly, using a static route
- D. FortiSASE will use the SD-WAN capability and determine that traffic will be directed to HUB-2, which will then route traffic to Branch-2.

Answer: A

NEW QUESTION # 16

A customer has an existing network that needs access to a secure application on the cloud.

Which FortiSASE feature can the customer use to provide secure Software-as-a-Service (SaaS) access?

- A. zero trust network access (ZTNA)
- B. inline-CASB
- C. SD-WAN
- D. secure web gateway (SWG)

Answer: B

NEW QUESTION # 17

An organization needs to resolve internal hostnames using its internal rather than public DNS servers for remotely connected endpoints. Which two components must be configured on FortiSASE to achieve this? (Choose two.)

- A. DNS filter
- B. Split DNS rules
- C. SSL deep inspection
- D. Split tunnelling destinations

Answer: B,C

Explanation:
To resolve internal hostnames using internal DNS servers for remotely connected endpoints, the following two components must be configured on FortiSASE:
Split DNS Rules: Split DNS allows the configuration of specific DNS queries to be directed to internal DNS servers instead of public DNS servers. This ensures that internal hostnames are resolved using the organization's internal DNS infrastructure, maintaining privacy and accuracy for internal network resources.
Split Tunneling Destinations: Split tunneling allows specific traffic (such as DNS queries for internal domains) to be routed through the VPN tunnel while other traffic is sent directly to the internet. By configuring split tunneling destinations, you can ensure that DNS queries for internal hostnames are directed through the VPN to the internal DNS servers.

NEW QUESTION # 18
......

The Pass4training is one of the top-rated and renowned platforms that has been offering real and valid FCSS - FortiSASE 24 Administrator (FCSS_SASE_AD-24) exam practice test questions for many years. During this long time period countless FCSS - FortiSASE 24 Administrator (FCSS_SASE_AD-24) exam candidates have passed their dream FCSS_SASE_AD-24 certification and they are now certified Fortinet professionals and pursuing a rewarding career in the market.

FCSS_SASE_AD-24 Official Practice Test: https://www.pass4training.com/FCSS_SASE_AD-24-pass-exam-training.html

However it should be noted that this "Guarantee" is to make sure that Pass4training FCSS_SASE_AD-24 Official Practice Test products do not contain any flaws in them, and we deliver what is promised, Fortinet FCSS_SASE_AD-24 Latest Training How to get the certificate in limited time is a necessary question to think about for exam candidates, and with such a great deal of practice exam questions flooded in the market, you may a little confused which one is the best, As is known to all, the PDF version of our FCSS_SASE_AD-24 exam simulation: FCSS - FortiSASE 24 Administrator is very convenient for you.

John: I can look at source code and see the patterns identified, FCSS_SASE_AD-24 Official Practice Test You may be surprised to learn that you can create a lot of really cool designs with Photoshop right out of the box.
