

# Huawei H19-401\_V2.0 Exam Dumps - Right Preparation Method [2026]

Our product boosts varied functions to be convenient for you to master the H19-401\_V2.0 training materials and get a good preparation for the exam and they include the self-learning function, the self-assessment function, the function to stimulate the exam and the timing function. We provide 24-hours online on H19-401\_V2.0 Guide prep customer service and the long-distance professional personnel assistance to for the client. If clients have any problems about our H19-401\_V2.0 study materials they can contact our customer service at any time.

If you want to pass the exam in the shortest time, our study materials can help you achieve this dream. H19-401\_V2.0 learning quiz according to your specific circumstances, for you to develop a suitable schedule and learning materials, so that you can prepare in the shortest possible time to pass the exam needs everything. If you use our H19-401\_V2.0 training prep, you only need to spend twenty to thirty hours to practice our H19-401\_V2.0 study materials and you are ready to take the exam.

## Well Huawei H19-401\_V2.0 Prep | Simulations H19-401\_V2.0 Pdf

Prep4sureGuide provides thousands of examinations training materials especially for Huawei certifications. We not only provide key knowledge points and detailed questions answers and explanations but also excellent after-sale service. You purchase H19-401\_V2.0 latest practice exam online, you will not only get exam materials but also one year tracking service. We will always provide H19-401\_V2.0 latest practice exam online the first time for your free downloading within one year.

## Huawei H19-401\_V2.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Huawei iMaster NCE-Campus: Campus Network Management System: Introduces the iMaster NCE-Campus platform covering automated network planning, construction, O&amp;M, and its various deployment modes.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Huawei Campus SD-WAN Products and Solutions: Reviews WAN interconnection trends and introduces Huawei's SD-WAN solution along with the NetEngine AR product portfolio.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Key Technical Principles and Applications in Industrial Scenarios: Covers the development, key technologies, and sector-specific applications of high-performance industrial campus networks.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Huawei iMaster NCE-CampusInsight: Campus Network Analyzer: Presents Huawei's intelligent O&amp;M analytics platform offering network health, user experience, application experience views, and a campus digital map.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>• Huawei Xinghe Intelligent Campus Solution Overview: Introduces campus network fundamentals, evolving trends, challenges, and Huawei's Xinghe Intelligent Campus Solution as a response to modern enterprise needs.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Huawei Xinghe Intelligent Large-and Medium-Sized Campus Network Design Guide (VLAN Networking): Covers VLAN-based design for large and medium campuses including wired, wireless, access control, O&amp;M, and multi-campus interconnection.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Technical Fundamentals and Applications of WLAN: Covers the origin, core concepts, networking architectures, and key technologies behind wireless LAN deployments in campus environments.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Huawei Xinghe Intelligent Cloud Managed Campus Network Design Guide for Small and Midsize Enterprises: Provides design guidance for SME cloud-managed campus networks covering architecture, IP services, wireless, access control, and O&amp;M.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• Huawei Xinghe Intelligent Campus Solution for Large-and Medium-Sized Networks (Virtualization Scenario) Design Guide: Guides VXLAN-based fabric architecture and overlay network design for virtualized large and medium campus environments.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• Technical Fundamentals and Applications of Multi-Branch WAN Interconnection: Addresses enterprise WAN technologies including private lines, VPN, and SD-WAN for connecting distributed branch offices.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>• Huawei Xinghe Intelligent Campus Network Multi-Branch WAN Interconnection Solution Design Guide: Provides end-to-end SD-WAN design guidance for multi-branch WAN interconnection including architecture, services, deployment, and O&amp;M.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>• Technical Fundamentals and Applications of Office Campus Networks: Explores the full spectrum of office campus network design including routing, switching, security, reliability, virtualization, IPv6, and energy efficiency.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>• Huawei High-Quality Campus MSP Solution: Introduces Huawei's Managed Service Provider business model, solutions, product offerings, and industry-specific differentiators for campus networks.</li> </ul>

## Huawei HCSP-Presales-Campus Network Planning and Design V2.0 Sample Questions (Q32-Q37):

### NEW QUESTION # 32

On a large campus network, inter-WAC roaming must be avoided where possible to ensure the roaming experience.

- A. True
- B. False

**Answer: A**

Explanation:

Inter-WAC roaming involves moving a user's session information between two different physical or logical controllers. This process is inherently slower and more prone to packet loss or authentication delays than Intra-WAC roaming (where the user moves between APs managed by the same WAC). In the Xinghe Intelligent Campus design, Huawei recommends using Native WACs on core switches or stacking WACs to create a single large mobility domain, thereby minimizing the need for inter-WAC handovers.

### NEW QUESTION # 33

Which of the following is not included in the wireless network health evaluation model?

- A. Throughput experience
- B. Access experience
- C. Roaming experience

- D. Network status

**Answer: D**

Explanation:

Huawei's wireless health model in CampusInsight is specifically "Experience-Centric." It evaluates the network based on five dimensions of user experience: Access (A) , Throughput (C) , Roaming (D) , Capacity , and Interference . While the physical status of a device (on/off) is monitored, "Network Status" is not one of the metrics used to calculate the specific Experience Health Score in this evaluation model.

#### NEW QUESTION # 34

Which of the following packet priority queues are supported over the air interface?

- A. VO queue
- B. VI queue
- C. BE queue
- D. BK queue

**Answer: A,B,C,D**

Explanation:

Huawei's air interface scheduling follows the WMM (Wi-Fi Multimedia) standard, which maps data packets into four Access Categories (ACs) to ensure Quality of Service (QoS). These queues are:

- \* VO (Voice): Highest priority for low-latency voice traffic.
- \* VI (Video): High priority for video streaming.
- \* BE (Best Effort): Standard priority for general data traffic.
- \* BK (Background): Lowest priority for non-time-critical tasks like file downloads or print jobs.

#### NEW QUESTION # 35

MIMO technology enables multiple antennas to send and receive spatial streams (multiple signals) simultaneously and to differentiate the signals sent to or received from different spatial orientations. By leveraging technologies such as SM and SD, MIMO boosts the system capacity, coverage scope, and SNR without occupying extra bandwidth.

- A. True
- B. False

**Answer: A**

Explanation:

MIMO (Multiple-Input Multiple-Output) is a core pillar of modern WLAN planning. It utilizes two main techniques:

- \* Spatial Multiplexing (SM): Increases system capacity by transmitting different data streams over different antennas simultaneously.
- \* Spatial Diversity (SD): Improves coverage scope and SNR (Signal-to-Noise Ratio) by transmitting the same data stream over multiple paths to ensure reliability through redundancy (e.g., using MRC or STBC).

The statement is True because these benefits are achieved using the same frequency channel (no extra bandwidth) by exploiting the spatial dimension of the radio environment.

#### NEW QUESTION # 36

Which of the following is the main reason why SD-WAN requires high-specification devices?

- A. Encryption required
- B. Service orchestration
- C. Forwarding processing based on Layer 3 to Layer 7 applications
- D. Support for multiple automatic deployment scenarios

**Answer: C**

Explanation:

While encryption (IPsec) is important, the "Intelligence" in SD-WAN comes from Application-based Routing . To perform Intelligent

Traffic Steering, the gateway must identify traffic not just by IP/Port (L3/L4), but by the actual application (L7), such as distinguishing between Office 365 and YouTube. This requires DPI (Deep Packet Inspection) and complex signature matching, which is significantly more CPU and memory intensive than traditional destination-based routing, thus necessitating high-specification hardware.

## NEW QUESTION # 37

.....

First of all, we have the best and most first-class operating system, in addition, we also solemnly assure users that users can receive the information from the H19-401\_V2.0 learning material within 5-10 minutes after their payment. Second, once we have written the latest version of the H19-401\_V2.0 learning material, our products will send them the latest version of the H19-401\_V2.0 Training Material free of charge for one year after the user buys the product. Last but not least, our perfect customer service staff will provide users with the highest quality and satisfaction in the hours.
