UiPath (ADPv1) Automation Developer Professional Updated Torrent & UiPath-ADPv1 Training Vce & UiPath (ADPv1) Automation Developer Professional Pdf Exam

ActualtestPDF is professional platform to establish for compiling UiPath exam materials for candidates, and we aim to help you to pass the examination as well as getting the related certification in a more efficient and easier way. Our answers and questions are compiled elaborately and easy to be mastered. Because our UiPath-ADPv1 Test Braindumps are highly efficient and the passing rate is very high you can pass the exam fluently and easily with little time and energy needed.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q113-Q118):

NEW QUESTION # 113

A developer aims to employ the REFramework for automating a business process that Involves a TransactionData collection (DataTable) comprising vendor names and addresses.

Instructions: Choose the appropriate variable type for the TransactionItem from the provided drop-down list in the following exhibit.

□

Answer:

Explanation:

□

Explanation:

The REFramework (Robotic Enterprise Framework) in UiPath is designed to work with transactional data. For a process that involves iterating over a DataTable where each row represents a transaction item, the appropriate variable type for the TransactionItem would be a DataRow.

In the context of REFramework, a DataRow is typically used to represent a single transaction item when the transaction data is contained within a DataTable. This allows the framework to process each row (or transaction) one by one.

Therefore, the correct variable type for the TransactionItem from the drop-down list should be DataRow.

NEW QUESTION # 114

Based on the following exhibit, which output is displayed in the Output panel rt Step Out is clicked on the Debug ribbon tab of UiPath Studio?

□

- A. UiPath RPA
- B. Automation RPAUiPath RPA
- C. Automation
- **D. UiPath RPAAutomation**

Answer: D

NEW QUESTION # 115

Which one of the following expressions Is the equivalent of the If activity from the picture?

□

- **A. message = If(number mod 2 = 0. "Even number", "Odd number")**
- B. message = If(number mod 2 = 0. Odd number. Even number)

- C. message = If(number mod 2 = 0 then "Odd number" else "Even number")
- D. message = If(number mod 2 = 0 {"Odd number"} else {"Even number"})

Answer: A

Explanation:

This expression evaluates if the number modulo 2 equals 0, which would mean it is even. If true, it assigns the string "Even number" to the variable message. If false (meaning the number is odd), it assigns "Odd number" to message

NEW QUESTION # 116

In the context of the REFramework, if the OrchestratorQueueName key is present in both the Settings and Assets sheets, but an asset with the corresponding name is not present in Orchestrator, what will be the behavior at run time?

- A. The flow will use the value from the Settings sheets since the asset is missing.
- **B. The flow will throw an exception in InitAllSettings workflow.**
- C. The "OrchestratorQueueName" key is not added to the config dictionary and the flow will throw in Get Transaction Data workflow.
- D. An empty string will be saved for the "OrchestratorQueueName" key in the config dictionary.

Answer: B

Explanation:

In the Robotic Enterprise Framework (REFramework) for UiPath, the OrchestratorQueueName key is used to specify the name of the queue from which the robot will process transactions. If the OrchestratorQueueName key is specified in both the Settings sheet and the Assets sheet of the configuration, the REFramework will first attempt to get the value from the Orchestrator asset. If the asset with the corresponding name to OrchestratorQueueName is not found in Orchestrator, the behavior at runtime would depend on how the REFramework's InitAllSettings.xml is implemented. Generally, if an asset is expected but not found in the Orchestrator, an exception is thrown because the asset is typically considered a required component for the process to run correctly. Therefore, the most likely behavior at runtime would be:

B: The flow will throw an exception in the InitAllSettings workflow.

This would occur because the InitAllSettings workflow contains the logic to load configuration settings and assets, and if an expected asset is not found, an exception is usually thrown to prevent the process from continuing without required configuration.

NEW QUESTION # 117

Data from an Excel file is read into a data table named "dtEmployee", as displayed in the following graphic:

A developer needs to filter the data table to obtain all rows representing employees from the Finance and IT departments with a Salary under 30,000. Which expression yields the desired outcomes?

- A. dtEmployee.Select("[Department]='IT' OR [Department]='Finance' OR [Salary] < 30000")
- **B. dtEmployee.Select("([Department]='IT' OR [Department]='Finance') AND [Salary] < 30000")**
- C. dtEmployee.Select("[Department]='IT' OR [Department]='Finance' AND [Salary] < 30000")
- D. dtEmployee.Select("([Department]='IT' AND [Department]='Finance') AND [Salary] < 30000")

Answer: B

NEW QUESTION # 118

.....

In addition to the free download of sample questions, we are also confident that candidates who use UiPath-ADPv1 Test Guide will pass the exam at one go. UiPath (ADPv1) Automation Developer Professional prep torrent is revised and updated according to the latest changes in the syllabus and the latest developments in theory and practice. After you pass the exam, if you want to cancel your account, contact us by email and we will delete all your relevant information. Second, the purchase process of UiPath (ADPv1) Automation Developer Professional prep torrent is very safe and transactions are conducted through the most reliable guarantee platform.
