Salesforce Process Automation Accredited Professional Sample Questions (Q13-Q18):

NEW QUESTION # 13

A flow designer is considering using a record variable without marking "Allow multiple values" (unchecked). What is this type of variable?

- A. A set of field values for a single record that is marked as Global record inside a flow.
- **B. A set of field values for a single record.**
- C. A set of field values for multiple records that have multiple object types.
- D. A set of field values for multiple records that have the same object type.

Answer: B

NEW QUESTION # 14

How can a consultant use process automation tools to set up Salesforce Flow for Service?

- A. Add the Actions and Recommendations component to a process.
- B. Use Process Builder to create flows and quick actions.
- C. Use Flow Builder to add processes to the Actions and Recommendations component.
- **D. Use Flow Builder to create flows, and specify them in an Actions and Recommendations deployment or in a process.**

Answer: D

NEW QUESTION # 15

Northern Trail Outfitters (NTO) is looking to build an app for its logistics team where users will be able to submit inventory refill requests. The current manual process involves filling out a long form containing many fields. NTO is planning to replace the current process with Flows. Users frequently change field values as they are filling out the form. What should NTO keep in mind about letting users go backward in the Flow to make updates to field values?

- A. "Allow Navigation" needs to be set to TRUE on the Flow.
- B. Only users with "Navigate Flows" permission can navigate to previous screens.
- C. Letting users navigate from the later screen to the previous screen could result in duplicates.
- **D. Once the user navigates to previous screen, all field values on the current screen will be lost and will need to be repopulated.**

Answer: D

NEW QUESTION # 16

The Administrator at Universal Containers has received a requirement to create a one-click solution to update the Case status to Closed and send out a confirmation email (using an HTML Email Template) to the customer. Which standard feature can the Administrator leverage to accomplish this?

- **A. Use HTML email template from Flow and create an email alert.**
- B. Send an email from a process by using "Send an email" action.
- C. Use Workflow Rules with custom Apex to trigger email.
- D. Look for an ISV solution that can be deployed in the org.

Answer: A

NEW QUESTION # 17

The Administrator is creating a login flow for a new application that will be deployed on Salesforce. The Admin needs to create automation logic to help validate credentials and manage access. What is the correct design approach?

- A. Leverage Screen Flow for displaying the input fields and for handling the post-login process.
- B. Leverage Screen Flow for displaying the input fields and custom Apex triggers for the post-login process.
- C. Leverage Process Builder with Workflow Rules for displaying the input fields and for handling the post-login process.
- **D. Leverage Screen Flow for displaying the input fields and an autolaunched flow for handling the post-login process.**

Answer: D

NEW QUESTION # 18

.....
