Free PDF Quiz CV0-004 - CompTIA Cloud+ (CV0-004) Certification Exam – Valid Valid Dumps

CV0-004 certifications establish your professional worth beyond your estimation. Procuring CV0-004 certification is to make sure an extensive range of opportunities in the industry and doubling your present earning prospects. Itcertking's CV0-004 Practice Test dumps provide you the best practical pathway to obtain the most career-enhancing, CV0-004 certification.

CompTIA Cloud+ (CV0-004) Certification Exam Sample Questions (Q83-Q88):

NEW QUESTION # 83

A newly configured VM fails to run application updates despite having internet access. The updates download automatically from a third-party network. Given the following output:

Which of the following troubleshooting steps would be best to take?

- A. Running a trace to the router
- B. Checking DNS configurations
- C. Reconfiguring routing protocols
- D. Testing the IP address configuration

Answer: B

Explanation:

The best troubleshooting step to take given the output is to check DNS configurations. The failure to resolve the "na.updateserver.net" domain suggests a DNS resolution issue, which could be due to incorrect DNS settings, a failure in the DNS service, or an issue with the DNS server itself.

Troubleshooting DNS issues is a crucial skill in cloud management, as DNS plays a fundamental role in network connectivity and access to resources. It is covered under Cloud Concepts in the CompTIA Cloud+ curriculum.

NEW QUESTION # 84

A cloud administrator needs to collect process-level, memory-usage tracking for the virtual machines that are part of an autoscaling group. Which of the following is the best way to accomplish the goal by using cloud-native monitoring services?

- A. Deploying the cloud-monitoring agent software
- B. Configuring page file/swap metrics
- C. Scheduling a script to collect the data
- D. Enabling memory monitoring in the VM configuration

Answer: A

Explanation:

To collect process-level, memory-usage tracking for virtual machines, deploying cloud-monitoring agent software is the best approach. The agent can gather detailed system metrics and send them to the cloud-native monitoring services for analysis and visualization. Reference: CompTIA Cloud+ Study Guide (Exam CV0-004) - Chapter on Cloud Monitoring

NEW QUESTION # 85

A systems administrator is using VMs to deploy a new solution that contains a number of application VMs. Which of the following would provide high availability to the application environment in case of hypervisor failure?

- A. Anti-affinity rules
- B. Cold migration
- C. Affinity rules
- D. Live migration

Answer: A

Explanation:

Anti-affinity rules help ensure high availability by preventing multiple application VMs from running on the same hypervisor host. In case of hypervisor failure, this reduces the likelihood of all application VMs being affected, as they would be running on separate hosts. This allows for increased redundancy and fault tolerance in the application environment.

NEW QUESTION # 86

Which of the following is the most cost-effective and efficient strategy when migrating to the cloud?

- A. Replatform
- B. Retain
- C. Refactor
- D. Retire

Answer: A

Explanation:

Replatforming is the process of making slight modifications to the existing container setup to take advantage of cloud-native services without completely rewriting the application. This strategy is cost-effective and efficient because it involves minimal changes while still allowing the application to benefit from the cloud's scalability, flexibility, and managed services. For containerized workloads, replatforming often involves adapting the deployment to run on managed container services provided by the cloud provider.

NEW QUESTION # 87

An IT manager needs to deploy a cloud solution that meets the following requirements:

- * Users must use two authentication methods to access resources.
- * Each user must have 10GB of storage space by default.

Which of the following combinations should the manager use to provision these requirements?

- A. SSO and external storage
- B. OAuth 2.0 and ephemeral storage
- C. OIDC and persistent storage
- **D. MFA and storage quotas**

Answer: D

NEW QUESTION # 88

.....

It is believe that employers nowadays are more open to learn new knowledge, as they realize that CompTIA certification may be conducive to them in refreshing their life, especially in their career arena. We attract customers by our fabulous CV0-004 certification material and high pass rate, which are the most powerful evidence to show our strength. We are so proud to tell you that according to the statistics from our customers' feedback, the pass rate among our customers who prepared for the exam with our CV0-004 Test Guide have reached as high as 99%, which definitely ranks the top among our peers. Hence one can see that the CompTIA Cloud+ (CV0-004) Certification Exam learn tool compiled by our company are definitely the best choice for you.

New CV0-004 Exam Testking: https://www.itcertking.com/CV0-004_exam.html

So do not capitulate to difficulties, because we will resolve your problems of the CV0-004 training materials, It will make practice and preparation for the CompTIA CV0-004 exam more intelligent, quick, and simple, Many candidates waste their time and money by studying outdated CompTIA Cloud+ (CV0-004) Certification Exam (CV0-004) practice test material, By adding all important points into practice materials with attached services supporting your access of the newest and trendiest knowledge, our CV0-004 preparation materials are quite suitable for you right now as long as you want to pass the CV0-004 exam as soon as possible and with a 100% pass guarantee.

This is a classic race condition, or more precisely, CV0-004 a data race, because, in this case, our problems are caused by a lack of data synchronization, If abeam weapon can be used to mine asteroids as well as New CV0-004 Exam Testking to destroy incoming nuclear missiles, then that versatility can make up for a disadvantage elsewhere.
