

# Braindumpsqa Offers Data-Cloud-Consultant PDF Dumps With Refund Policy

## Refund policy

### Returns

Given that coffee is a perishable good, we do not accept returns. Your experience is a priority and we would love to hear from you if you are not pleased with your purchase. Please email us at [hello@bikandbold.com](mailto:hello@bikandbold.com) within 30 days of your purchase.

### Refunds

Gift cards are not refundable.

To complete a refund, we require a receipt or proof of purchase.

Please do not send your purchase back to the manufacturer.

If you are approved, then your refund will be processed, and a credit will automatically be applied to your credit card or original method of payment, within a certain amount of days.

### Late or Missing Refunds

If you haven't received a refund yet, first check your bank account again. Then contact your credit card company, it may take some time before your refund is officially posted. Next contact your bank. There is often some processing time before a refund is posted. If you've done all of this and you still have not received your refund yet, please contact us at [hello@bikandbold.com](mailto:hello@bikandbold.com).

And according to the three versions of the Data-Cloud-Consultant Study Guide, we have three free demos. The content of the three free demos is the same, and the displays are different accordingly. You can try them as you like.

## Salesforce Certified Data Cloud Consultant Sample Questions (Q17-Q22):

### NEW QUESTION # 17

Northern Trail Outfitters wants to implement Data Cloud and has several use cases in mind. Which two use cases are considered a good fit for Data Cloud?

Choose 2 answers

- A. To eliminate the need for separate business intelligence and IT data management tools
- **B. To ingest and unify data from various sources to reconcile customer identity**
- C. To create and orchestrate cross-channel marketing messages
- **D. To use harmonized data to more accurately understand the customer and business impact**

**Answer: B,D**

Explanation:

Data Cloud is a data platform that can help customers connect, prepare, harmonize, unify, query, analyze, and act on their data across various Salesforce and external sources. Some of the use cases that are considered a good fit for Data Cloud are:

\* To ingest and unify data from various sources to reconcile customer identity. Data Cloud can help customers bring all their data, whether streaming or batch, into Salesforce and map it to a common data model. Data Cloud can also help customers resolve identities across different channels and sources and create unified profiles of their customers.

\* To use harmonized data to more accurately understand the customer and business impact. Data Cloud can help customers transform and cleanse their data before using it, and enrich it with calculated insights and related attributes. Data Cloud can also help customers create segments and audiences based on their data and activate them in any channel. Data Cloud can also help customers use AI to predict customer behavior and outcomes.

The other two options are not use cases that are considered a good fit for Data Cloud. Data Cloud does not provide features to create and orchestrate cross-channel marketing messages, as this is typically handled by other Salesforce solutions such as Marketing Cloud. Data Cloud also does not eliminate the need for separate business intelligence and IT data management tools, as it is designed to work with them and complement their capabilities.

#### NEW QUESTION # 18

Cumulus Financial wants to create a segment of individuals based on transaction history data. This data has been mapped in the data model and is accessible via multiple container paths for segmentation.

What happens if the optimal container path for this use case is not selected?

- A. Alternate container paths will be suggested before the segment is published.
- B. The resulting segment will not be generated.
- **C. The resulting segment may be smaller or larger than expected.**
- D. Data Cloud segmentation will automatically select the optimal container path.

**Answer: C**

#### NEW QUESTION # 19

Which two steps should a consultant take if a successfully configured Amazon S3 data stream fails to refresh with a "NO FILE FOUND" error message?

Choose 2 answers

- **A. Check if the file exists in the specified bucket location.**
- B. Check if the Amazon S3 data source is enabled in Data Cloud Setup.
- C. Check if correct permissions are configured for the S3 user.
- **D. Check if correct permissions are configured for the Data Cloud user.**

**Answer: A,D**

Explanation:

A "NO FILE FOUND" error message indicates that Data Cloud cannot access or locate the file from the Amazon S3 source. There are two possible reasons for this error and two corresponding steps that a consultant should take to troubleshoot it:

The Data Cloud user does not have the correct permissions to read the file from the Amazon S3 bucket. This could happen if the user's permission set or profile does not include the Data Cloud Data Stream Read permission, or if the user's Amazon S3 credentials are invalid or expired. To fix this issue, the consultant should check and update the user's permissions and credentials in

Data Cloud and Amazon S3, respectively.

The file does not exist in the specified bucket location. This could happen if the file name or path has changed, or if the file has been deleted or moved from the Amazon S3 bucket. To fix this issue, the consultant should check and verify the file name and path in the Amazon S3 bucket, and update the data stream configuration in Data Cloud accordingly. Reference: Create Amazon S3 Data Stream in Data Cloud, How to Use the Amazon S3 Storage Connector in Data Cloud, Amazon S3 Connection

#### NEW QUESTION # 20

A consultant is troubleshooting a segment error.

Which error message is solved by using calculated insights Instead of nested segments?

- A. Segment is too complex.
- B. Segment population count failed.
- C. Segment can't be published.
- D. Multiple population counts are in progress.

**Answer: A**

#### NEW QUESTION # 21

Northern Trail Outfitters wants to use some of its Marketing Cloud data in Data Cloud.

Which engagement channel data will require custom integration?

- A. Mobile push
- B. CloudPage
- C. Email
- D. SMS

**Answer: B**

Explanation:

CloudPage is a web page that can be personalized and hosted by Marketing Cloud. It is not one of the standard engagement channels that Data Cloud supports out of the box. To use CloudPage data in Data Cloud, a custom integration is required. The other engagement channels (SMS, email, and mobile push) are supported by Data Cloud and can be integrated using the Marketing Cloud Connector or the Marketing Cloud API.
