## Blueprint: Security, Associate (JNCIA-SEC) 100% Pass

To increase your chances of success, consider utilizing the JN0-232 Exam Questions, which are valid, updated, and reflective of the actual JN0-232 Exam. Don't miss the opportunity to strengthen your Juniper JN0-232 exam preparation with these valuable questions.

### Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q74-Q79):

#### NEW QUESTION # 74

What is transit traffic in the Junos OS?

- A. It is traffic that is processed by the control plane.
- B. It is traffic that is rate-limited to prevent denial-of-service attacks.
- C. It is traffic that requires special handling by the Routing Engine.
- **D. It is traffic that is processed solely through the forwarding plane.**

**Answer: D**

Explanation:

Transit traffic in Junos OS is handled entirely by the forwarding plane, meaning packets pass through the device without being processed by the control plane or Routing Engine.

#### NEW QUESTION # 75

What is the main purpose of using screens on an SRX Series device?

- A. to provide multiple ports for accessing security zones
- B. to provide an alternative interface into the CLI
- **C. to provide protection against common DoS attacks**
- D. to provide information about traffic patterns traversing the network

**Answer: C**

Explanation:

The main purpose of using screens on an SRX Series device is to provide protection against common Denial of Service (DoS) attacks. Screens help prevent network resources from being exhausted or unavailable by filtering or blocking network traffic based on predefined rules. The screens are implemented as part of the firewall function on the SRX Series device, and they help protect against various types of DoS attacks, such as TCP SYN floods, ICMP floods, and UDP floods.

#### NEW QUESTION # 76

Which two statements are correct about enabling the Avira Antivirus engine on an SRX Series Firewall? (Choose two.)

- **A. A reboot is not required.**
- **B. A license is required.**
- C. A reboot is required.
- D. A license is not required.

**Answer: A,B**

Explanation:

The Avira Antivirus engine requires a valid license to be enabled and function on SRX Series Firewalls. Enabling or switching to the Avira engine does not require a reboot; the change takes effect dynamically after committing the configuration.

#### NEW QUESTION # 77

What is the default timeout value for TCP sessions on an SRX Series device?

- A. 60 seconds

- B. 30 minutes
- C. 30 seconds
- D. 60 minutes

**Answer: B**

Explanation:

By default, TCP has a 30-minute idle timeout, and UDP has a 60-second idle timeout.

Additionally, known IP protocols have a 30-minute timeout, whereas unknown ones have a 60-second timeout. Setting the inactivity timeout is very useful, particularly if you are concerned about applications either timing out or remaining idle for too long and filling up the session table.

According to the Juniper SRX Series Services Guide, this can be configured using the 'timeout inactive' statement for the security policy.

#### NEW QUESTION # 78

Which two statements are correct about security zones? (Choose two.)

- A. Interfaces in the same security zone must share the same routing instance.
- B. An interface can exist in multiple security zones.
- C. A security zone can contain multiple interfaces.
- D. Interfaces in the same security zone must use separate routing instances.

**Answer: A,C**

Explanation:

\* Option B:Correct. Interfaces in the same security zone must belong to the same routing instance; zones cannot span multiple routing instances.

\* Option D:Correct. A security zone can contain multiple interfaces, allowing grouping of similar trust levels (e.g., multiple LAN subnets in a trust zone).

\* Option A:Incorrect. An interface can belong to only one zone at a time.

\* Option C:Incorrect. Interfaces within the same zone cannot be split across routing instances.

Correct Statements:Interfaces in the same zone must share the same routing instance, and a zone can contain multiple interfaces.

Reference:Juniper Networks -Security Zones and Routing Instances, Junos OS Security Fundamentals.

#### NEW QUESTION # 79
