# NCP-MCI-6.10 Exam Dumps Pdf & Trustworthy NCP-MCI-6.10 Practice

P.S. Free 2026 Nutanix NCP-MCI-6.10 dumps are available on Google Drive shared by TestKingIT: https://drive.google.com/open?id=1kstjhkAgQyF5KbOp_pYLBKJQpKwCdnU9

We provide NCP-MCI-6.10 Exam Torrent which are of high quality and can boost high passing rate and hit rate. Our passing rate is 99% and thus you can reassure yourself to buy our product and enjoy the benefits brought by our NCP-MCI-6.10 exam materials. Our product is efficient and can help you master the Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) guide torrent in a short time and save your energy. The product we provide is compiled by experts and approved by the professionals who boost profound experiences. It is revised and updated according to the change of the syllabus and the latest development situation in the theory and the practice.

To do this you just need to download the TestKingIT practice test questions and start preparation with complete peace of mind and satisfaction. The TestKingIT exam questions are designed and verified by experience and qualified Nutanix NCP-MCI-6.10 Exam experts so you do not need to worry about the top standard and relevancy of TestKingIT exam practice questions.

Unparalleled Nutanix Exam Dumps Pdf – Marvelous Trustworthy NCP-MCI-6.10 Practice

Please don't worry about the purchase process because it's really simple for you. The first step is to select the NCP-MCI-6.10 test guide, choose your favorite version, the contents of different version are the same, but different in their ways of using. The second step: fill in with your email and make sure it is correct, because we send our Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) learn tool to you through the email. Later, if there is an update, our system will automatically send you the latest Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) version. At the same time, choose the appropriate payment method, such as SWREG, DHpay, etc. Next, enter the payment page, it is noteworthy that we only support credit card payment, do not support debit card. Generally, the system will send the NCP-MCI-6.10 Certification material to your mailbox within 10 minutes. If you don't receive it please contact our after-sale service timely.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Sample Questions (Q58-Q63):

NEW QUESTION # 58
An administrator has been tasked by the company's leadership to justify and explain the decision to utilize the new Nutanix Disaster Recovery solution.
The environment contains:
* 100 workloads
* Workloads have varying boot orders
* Workloads span multiple subnets
* Workloads span across different business units
How should the administrator most efficiently organize and manage the workloads?

- A. Utilize RESTful APIs to script creation of Recovery Plans.
- B. Utilize Categories to organize VMs in Recovery Plans.
- C. Utilize a VM naming schema that allows sorting.
- D. Utilize a 1:10 ratio of Recovery Plan to VMs.

Answer: B

Explanation:
Nutanix Multicloud Infrastructure documentation explains that Recovery Plans and Protection Policies are designed to scale using Categories rather than per-VM assignments. Categories provide metadata that allows grouping of VMs by purpose, business unit, application tiers, boot order, and network requirements. The documentation states that Recovery Plans "consume categories so that VMs matching those categories are automatically included in the DR workflow." Categories also allow automatic updates so that when a VM is added, removed, or changed, the DR plan does not require modification. This method is specifically recommended for environments with numerous workloads and variable application tiers. Scripts, naming conventions, and static ratios do not provide the dynamic grouping and automation that categories provide.

NEW QUESTION # 59
Due to application requirements, an administrator needs to support a multicast configuration in an AHV cluster.
Which AHV feature can be used to optimize network traffic such that multicast traffic is only forwarded to the VMs that need to receive it?

- A. Network segmentation
- B. LACP
- C. IGMP Snooping
- D. LLDP

Answer: C

Explanation:
Nutanix AHV networking documentation describes IGMP Snooping as a feature that enables the AHV virtual switch to learn which VMs have joined specific multicast groups through IGMP membership reports. The documentation states that with IGMP Snooping enabled, multicast traffic is forwarded only to VMs that are registered members of a multicast group, preventing unnecessary flooding of multicast packets across all ports. LACP is for NIC bonding, network segmentation is for isolating networks, and LLDP is for link layer device discovery. None of these selectively deliver multicast traffic. Only IGMP Snooping provides the optimized

multicast forwarding described.

NEW QUESTION # 60
What would cause an LCM pre-check event with the test_esx_entering_mm_pinned_vms check during an AOS upgrade?

- A. Host has insufficient memory.
- B. VMs on the host have high CPU usage.
- C. HA priority settings are misconfigured.
- D. Affinity rules are configured to prevent VM migration.

Answer: D

Explanation:
The test_esx_entering_mm_pinned_vms check in an AOS upgrade validates whether there are any pinned VMs on ESXi hosts, which could prevent host maintenance mode transitions.
From the Nutanix Enterprise Cloud Administration (ECA) course materials:
"Affinity or anti-affinity rules that pin VMs to specific hosts prevent those VMs from migrating during host maintenance mode entry. This directly triggers a failure in the LCM precheck test_esx_entering_mm_pinned_vms check."

NEW QUESTION # 61
An administrator has received complaints about VM performance.
After reviewing the VM's CPU Ready Time data shown in the exhibit, which step should the administrator take to diagnose the issue further?

- A. Check the number of CPUs assigned to each CVM
- B. Enable VM memory oversubscription
- C. Assess cluster SSD capacity
- D. Review host CPU utilization

Answer: D

Explanation:
Nutanix performance troubleshooting guidelines highlight CPU Ready Time as a key indicator of CPU contention. The documentation explains:
"High CPU Ready Time indicates that vCPUs are waiting to be scheduled on physical cores due to host CPU saturation or CPU overcommitment." CPU Ready Time does not relate to storage issues or CVM sizing. Instead, it indicates that the hypervisor cannot schedule VM CPU operations promptly.
Internal extracts clearly describe the next diagnostic step:
"When CPU ready metrics rise, the first step is to check physical host CPU utilization to confirm whether the host is oversubscribed or running at high CPU usage." If the host is overloaded, remediation includes distributing VMs across hosts, reducing vCPU count on oversized VMs, or adding compute resources.
Other options are irrelevant:
* Memory oversubscription is unrelated to CPU Ready Time.
* SSD capacity affects storage latency, not CPU scheduling.
* CVM CPU counts do not cause VM CPU Ready Time; CVM resource misconfiguration affects cluster services, not guest VM scheduling.
Thus, reviewing host CPU utilization is the correct next step.

NEW QUESTION # 62
An administrator wants to enable application discovery on a Nutanix cluster to monitor applications.
An X-Large Prism Central instance is already configured and meets the licensing, CPU, and memory requirements.
Which two other prerequisites must be met before enabling application discovery? (Choose two.)

- A. Internet connection
- B. Network Controller is enabled
- C. Sufficient Prism Central VM resources
- D. API key and key ID

Answer: A,B

Explanation:
Nutanix Application Discovery relies on a combination of Prism Central services and in-guest sensors that collect application metadata, communication patterns, and dependency maps. The internal documentation lists these specific prerequisites before Application Discovery can be enabled:
"Prism Central must have access to the Internet for sensor downloads, signature updates, and metadata service communication."Application Discovery uses cloud-based metadata to identify applications and services.
Without Internet access, Prism Central cannot retrieve application profiles, updated signatures, and dependency mapping definitions.
"The Network Controller service must be enabled to allow flow-level inspection and communication tracking between VMs."Application Discovery integrates directly with Nutanix Flow's Network Controller to observe traffic flows, which is required for dependency mapping. Without Network Controller enabled, Prism Central cannot monitor or analyze traffic between workloads.
The documentation clarifies that generating API keys is not required to activate Application Discovery, and sufficient Prism Central resources are already assumed as stated in the question.
Therefore, the required prerequisites are Internet connectivity and enabling the Network Controller.

NEW QUESTION # 63

......

In the era of informational globalization, the world has witnessed climax of science and technology development, and has enjoyed the prosperity of various scientific blooms. In 21st century, every country had entered the period of talent competition, therefore, we must begin to extend our NCP-MCI-6.10 personal skills, only by this can we become the pioneer among our competitors. We here tell you that there is no need to worry about. Our NCP-MCI-6.10 Actual Questions are updated in a high speed. Since the date you pay successfully, you will enjoy the NCP-MCI-6.10 test guide freely for one year, which can save your time and money. We will send you the latest NCP-MCI-6.10 study dumps through your email, so please check your email then.

Trustworthy NCP-MCI-6.10 Practice: https://www.testkingit.com/Nutanix/latest-NCP-MCI-6.10-exam-dumps.html

So you can totally think of us as friends to help you by introduce our Trustworthy NCP-MCI-6.10 Practice - Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) exam study material, And you will be more confident to pass the exam since that you have experience the real NCP-MCI-6.10 exam, This NCP-MCI-6.10 certification assists you to put your career on the right track and helps you to achieve your career goals in a short time period, If you fail Nutanix NCP-MCI-6.10 exam with TestKingIT dumps, we will refund full payment fee to you after you send the score report to us.

It was nice to be able to sit next to my Dad, NCP-MCI-6.10 Instant Discount who was able to help me with a few obstacles that were unfamiliar to me, Empty Custom Tag Without Attributes, So you can totally NCP-MCI-6.10 think of us as friends to help you by introduce our Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) exam study material.

NCP-MCI-6.10 Exam Guide - NCP-MCI-6.10 Test Questions & NCP-MCI-6.10 Exam Torrent

And you will be more confident to pass the exam since that you have experience the real NCP-MCI-6.10 exam, This NCP-MCI-6.10 certification assists you to put your career on Test NCP-MCI-6.10 Guide Online the right track and helps you to achieve your career goals in a short time period.

If you fail Nutanix NCP-MCI-6.10 exam with TestKingIT dumps, we will refund full payment fee to you after you send the score report to us, Quality and Value for the Nutanix NCP-MCI-6.10 Exam.
