It ensures that candidates know the value of cloud solutions, the key concepts of ERP in the cloud, and how SAP's offering supports digital transformation for businesses.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which activities does the consultant do before the first Fit-to-Standard workshop? Note: There are 2 correct answers to this question.

- A. Review the integration requirements collected from the Digital Discovery Assessment.
- B. Upload customer master data in the Starter system using migration templates.
- C. Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment.
- D. Evaluate the L2 Business-Driven Configuration Questionnaire responses.

Answer: A,C

Explanation:

Before the first Fit-to-Standard workshop, the consultant should do the following activities:

* Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment. This is to ensure that the Starter system reflects the agreed scope of the project and does not include any unnecessary or out-of-scope items. The consultant can use the Scope Item Management app to deactivate scope items¹.

* Review the integration requirements collected from the Digital Discovery Assessment. This is to understand the customer's integration needs and prepare for the integration topics that will be discussed in the Fit-to-Standard workshop. The consultant can use the Integration Solution Advisor tool to review the integration requirements and the recommended integration scenarios².

The consultant should NOT do the following activities before the first Fit-to-Standard workshop:

* Upload customer master data in the Starter system using migration templates. This is not required before the first Fit-to-Standard workshop, as the customer master data is not relevant for the process validation. The consultant should upload the customer master data in the Quality system after the Fit-to- Standard workshop, using the SAP S/4HANA Migration Cockpit³.

* Evaluate the L2 Business-Driven Configuration Questionnaire responses. This is not required before the first Fit-to-Standard workshop, as the L2 Business-Driven Configuration Questionnaire is not available at this stage. The consultant should evaluate the L2 Business-Driven Configuration Questionnaire responses after the Fit-to-Standard workshop, using the SAP Activate Methodology.

NEW QUESTION # 48

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. SAP Cloud ALM Processes app
- **B. Business Driven Configuration Questionnaire**
- C. Availability and Dependencies of Solution Processes Excel
- D. SAP Cloud ALM Requirements app

Answer: B

Explanation:

The Business Driven Configuration Questionnaire is a tool that helps you collect the values that are entered into the configuration activities in SAP Central Business Configuration. It is a web-based questionnaire that guides you through the configuration settings for each solution process. You can use the questionnaire to enter the values for the configuration activities, review the values, and export them to an Excel file. You can then import the Excel file to SAP Central Business Configuration and apply the values to the configuration activities. References = Business Driven Configuration Questionnaire, Importing Configuration Values from Business Driven Configuration Questionnaire, Using SAP Central Business Configuration to Activate Content in the SAP S/4HANA Cloud Starter System

NEW QUESTION # 49

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, where do you look next?

- A. SAP Discovery Center
- B. SAP Cloud ALM
- C. SAP Business Technology Platform
- **D. SAP Business Accelerator Hub**

Answer: D

Explanation:

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, you should look next at the SAP Business Accelerator Hub. The SAP Business Accelerator Hub is a central repository of integration content that can help you to connect SAP S/4HANA Cloud Public Edition with other SAP and non-SAP applications. You can browse, search, and filter the available integration packages, scenarios, and APIs, and access the relevant documentation and configuration guides¹. The SAP Business Accelerator Hub also provides links to the SAP Integration Suite tools, such as SAP Cloud Integration, SAP API Management, and SAP Cloud Integration Automation Service, that you can use to implement and manage the integrations².

The other options are not the correct places to look for integration requirements. SAP Discovery Center is a portal that helps you to discover, try, and buy SAP solutions and services³. SAP Business Technology Platform is a platform that enables you to extend, integrate, and build applications in the cloud⁴. SAP Cloud ALM is a cloud-based application lifecycle management tool that supports you in implementing, operating, and enhancing your cloud solutions⁵. References = SAP Business Accelerator Hub, SAP S/4HANA Cloud Public Edition - Integration, SAP Discovery Center, SAP Business Technology Platform, SAP Cloud ALM.

NEW QUESTION # 50

What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- **A. To create business processes with a high number of people involved in a pre-defined sequence**
- **B. To create complex, repeated work processes with iterative cycles**
- C. To create standard procedures from SAP Signavio Process Navigator
- **D. To create cross-product workflow procedures**
- E. To create very simple release or approval procedures

Answer: A,B,D

Explanation:

SAP S/4HANA Cloud Business Workflows are designed to enhance and automate business processes within the organization. They serve multiple purposes:

* To create complex, repeated work processes with iterative cycles: These workflows are designed to handle intricate processes that occur regularly within the business environment, allowing for automation and efficiency in tasks that require repetition and involve multiple steps or conditions.

* To create cross-product workflow procedures: This capability allows for the integration of various SAP products and services into a cohesive workflow, ensuring smooth and interconnected operations across different aspects of the business. It enables workflows that span across different SAP applications and solutions, providing a unified approach to managing business processes.

* To create business processes with a high number of people involved in a pre-defined sequence: SAP S/4HANA Cloud Business Workflows are capable of handling processes that involve many participants, orchestrating the sequence of tasks to be completed by different individuals or departments. This ensures that each step of the process is executed in the right order by the right person, enhancing collaboration and efficiency.

NEW QUESTION # 51

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. SAP Cloud ALM Processes app
- **B. Business Driven Configuration Questionnaire**
- C. Availability and Dependencies of Solution Processes Excel
- D. SAP Cloud ALM Requirements app

Answer: B
