SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q23-Q28):

NEW QUESTION # 23

How do you assign roles to users in SAP S/4HANA Cloud Private Edition?

- A. SAP Fiori app "Launchpad Designer"
- B. Role maintenance in the SAP GUI
- **C. SAP Fiori app "Maintain Business Users"**
- D. SAP Fiori app "Maintain Business Roles"

Answer: C

NEW QUESTION # 24

In which tool can you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- **A. Custom Fields app**
- B. Custom CDS Views app
- C. Runtime Authoring mode (Adapt UI)
- D. Extensibility Inventory app

Answer: A

NEW QUESTION # 25

What has the SAP Business Workflow been designed for? Note: There are 3 correct answers to this question.

- **A. To create cross-product workflow procedures**
- **B. To create business processes with a high number of people involved in a pre-defined sequence**
- C. To create standard procedures from SAP Signavio Process Navigator
- D. To create complex, repeated work processes with iterative cycles
- **E. To create very simple release or approval procedures**

Answer: A,B,E

Explanation:

SAP Business Workflow is designed to automate and streamline various business processes. The following are key purposes of SAP Business Workflow:

Option A: To create cross-product workflow procedures

This option is correct. SAP Business Workflow facilitates the creation of workflows that span multiple products, enabling seamless integration across different systems.

Option B: To create complex, repeated work processes with iterative cycles This option is incorrect. While SAP Business Workflow can handle complex processes, it is not specifically designed for iterative cycles.

Option C: To create business processes with a high number of people involved in a pre-defined sequence This option is correct. SAP Business Workflow is ideal for processes that require the involvement of multiple participants in a predefined sequence, ensuring tasks are completed in the correct order.

Option D: To create very simple release or approval procedures

This option is correct. SAP Business Workflow can efficiently manage simple release or approval procedures, automating routine tasks to improve efficiency.

Option E: To create standard procedures from SAP Signavio Process Navigator This option is incorrect. SAP Business Workflow does not directly create procedures from SAP Signavio Process Navigator.

In summary, SAP Business Workflow is designed to create cross-product workflow procedures, manage business processes involving multiple participants in a predefined sequence, and handle simple release or approval procedures.

NEW QUESTION # 26

Where do you create test cases in SAP Cloud ALM to document formal tests?

- A. Test Plan app
- B. Test Execution app
- C. Manage Your Test Processes app
- **D. Test Preparation app**

Answer: D

Explanation:

SAP Cloud ALM supports test management for SAP S/4HANA Cloud Private Edition implementations, including the creation of test cases for formal testing. Let's analyze:

* A. Test Plan app: This is incorrect. The Test Plan app in SAP Cloud ALM is used to organize and assign test cases into plans, not to create them.

* B. Manage Your Test Processes app: This is incorrect. This app provides an overview of test processes and progress, but it's not where test cases are created.

* C. Test Execution app: This is incorrect. The Test Execution app is for running and logging results of test cases, not creating them.

* D. Test Preparation app: This is correct. The Test Preparation app in SAP Cloud ALM allows users to create, edit, and document test cases for formal testing (e.g., unit tests, integration tests). It's the designated tool for defining test cases during the Realize phase of SAP Activate.

In summary, test cases are created in the Test Preparation app in SAP Cloud ALM.

NEW QUESTION # 27

Which tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Business Application Studio
- B. SAP Cloud SDK
- **C. SAP Fiori extensibility apps**
- **D. SAP Build**

Answer: C,D

Explanation:

SAP provides tools that enable non-developers to create low-code/no-code extensions, facilitating customization without extensive programming knowledge.

Option A: SAP Business Application Studio

This option is incorrect. SAP Business Application Studio is a development environment designed for professional developers, offering comprehensive coding capabilities.

Option B: SAP Build

This option is correct. SAP Build is a suite of low-code/no-code tools that allow business users to create applications, automate processes, and design business sites with minimal coding. It includes SAP Build Apps, SAP Build Process Automation, and SAP Build Work Zone.

Option C: SAP Fiori extensibility apps

This option is correct. SAP Fiori extensibility apps are key user tools embedded in SAP S/4HANA that enable non-developers to adapt and extend SAP applications, such as adding custom fields or creating custom business objects, using a low-code/no-code approach.

Option D: SAP Cloud SDK

This option is incorrect. SAP Cloud SDK is intended for professional developers to build extensions and applications on SAP Cloud Platform, requiring coding expertise.

In summary, SAP Build and SAP Fiori extensibility appsempower non-developers to create low-code/no-code extensions within SAP S/4HANA Cloud Private Edition.

NEW QUESTION # 28

.....
