

New Plat-Dev-301 Dumps Book - Plat-Dev-301 Dump File

Plat-Dev-301

Correct Answer: D

QUESTION: 7

An environment has two Apex Triggers: an after-update trigger on Account and an after-update trigger on Contact. The Account after-update trigger fires whenever an Account's address is updated, and it updates every associated Contact with that address. The Contact after-update trigger fires on every edit, and it updates every Campaign Member record related to the Contact with the Contact's state. Consider the following: A mass update of 200 Account records' addresses, where each Account has 50 Contacts. Each Contact has 1 Campaign Member. This means there are 10,000 Contact records across the Accounts and 10,000 Campaign Member records across the contacts. What will happen when the mass update occurs?

- Option A : The mass update will fail, since the two triggers fire in the same context, thus exceeding the number of records processed by DML statements.
Option B : There will be no error, since each trigger fires within its own context and each trigger does not exceed the limit of the number of records processed by DML statements.
Option C : There will be no error, since the limit on the number of records processed by DML statements is 50,000.
Option D : The mass update of Account address will succeed, but the Contact address updates will fail due to exceeding number of records processed by DML statements.

Correct Answer: B

QUESTION: 8

Which type of controller is best suited when you want all of the basic DML functions from an object's normal new/edit page and want to include multiple records?

- Option A : Standard Controller
Option B : Standard List/Set Controller
Option C : Controller Extensions
Option D : Custom Controller

Correct Answer: B

QUESTION: 9

A company wants to implement a new call center process for handling customer service calls. It requires service reps to ask for the caller's account number before proceeding with the rest of their call script. Following best practices, what should a developer use to meet this requirement?

- Option A : Approvals
Option B : Flow Builder
Option C : Apex Trigger
Option D : Process Builder

If you have some doubts about the accuracy of Plat-Dev-301 top questions. There are free demo of latest exam cram for you to download. Besides, you can free updating Salesforce braindumps torrent one-year after you purchase. We adhere to the principle of No Help, Full Refund, if you failed the exam with our Plat-Dev-301 Valid Dumps, we will full refund you.

The content system of Plat-Dev-301 exam simulation is constructed by experts. After-sales service of our study materials is also provided by professionals. If you encounter some problems when using our Plat-Dev-301 study materials, you can also get them at any time. After you choose Plat-Dev-301 Preparation questions, professional services will enable you to use it in the way that suits you best, truly making the best use of it, and bringing you the best learning results.

Famous Plat-Dev-301 exam questions grant you pass-guaranteed learning brain dumps - CramPDF

Our specialists check daily to find whether there is an update on the Plat-Dev-301 study tool. If there is an update system, we will automatically send it to you. Therefore, we can guarantee that our Plat-Dev-301 test torrent has the latest knowledge and keep up with the pace of change. Many people are worried about electronic viruses of online shopping. But you don't have to worry about our products. Our Plat-Dev-301 Exam Materials are absolutely safe and virus-free. If you encounter installation problems, we have professional IT staff to provide you with remote online guidance. We always put your needs in the first place.

Salesforce Certified Platform Developer II - Multiple Choice Sample Questions (Q29-Q34):

NEW QUESTION # 29

A company has a native iOS order placement app that needs to connect to Salesforce to retrieve consolidated information from many different objects in a JSON format.

Which is the optimal method to implement this in Salesforce?

- A. Apex REST callout
- B. Apex SOAP web service
- C. Apex REST web service
- D. Apex SOAP callout

Answer: C

Explanation:

Apex REST web services are the best method for creating custom endpoints that return data in a specific format, such as JSON, which is perfect for a native iOS application that needs to integrate with Salesforce for retrieving data.

NEW QUESTION # 30

A developer created a JavaScript library that simplifies the development of repetitive tasks and features and uploaded the library as a static resource called rsutils in Salesforce. Another developer is coding a new Lightning web component (LWC) and wants to leverage the library. Which statement properly loads the static resource within the LWC?

- A. `<lightning-require scripts="{${Resource.jaUtils}"}">`
- B. `import jsUtilities from '@salesforce/resourceUrl/jaUtils';`
- C. `const jsUtiliviy = SA.get('${SResource.isUtils}');`
- D. `import {jsUtilities} from '@salasforce/resourceUrl/jsUtils';`

Answer: D

Explanation:

To load a static resource within a Lightning web component, you should use an import statement with the `@salesforce/resourceUrl` module. This statement correctly refers to the static resource by its name.

NEW QUESTION # 31

Consider the above trigger intended to assign the Account to the manager of the Account's region. Which two changes should a developer make in this trigger to adhere to best practices?

- A. Use a Map to cache the results of the Region__c query by Id.
- B. Move the Region__c query to outside the loop.
- C. Remove the last line updating accountList as It Is not needed.
- D. Use a Map accountMap instead of List accountList.

Answer: B,C

Explanation:

Moving the SOQL query outside the loop prevents it from being executed multiple times, which can lead to hitting governor limits. The last line updating the accountList is indeed needed to save the changes made to the Account records, so removing it is not recommended. Instead, the query should be moved outside the loop and records should be collected in a map for efficiency, which is not one of the provided options. Reference:
Apex Developer Guide - Best Practices for Apex

NEW QUESTION # 32

When developing a Lightning web component, which setting displays lightninglayout-items in one column on small devices, such as mobile phones, and in two columns on tablet-size and desktop-size screens?

- A. Set size="12" tablet-device-size="6"
- B. Set size="6" mobile-device-size="12"
- C. Set size="12" medium-device-size="6"
- D. Set size="6" small-device-size="12"

Answer: C

Explanation:

To display lightning-layout-items in one column on small devices and in two columns on larger devices, you should set the size attribute to "12" for small devices and the medium-device-size attribute to "6". This ensures that on small devices each item takes the full width, and on medium or larger devices, items take up half the width.

NEW QUESTION # 33

Consider the following code snippet:

□ A developer created the following test class to provide the proper code coverage for the snippet above:

□ However, when the test runs, no data is returned and the assertion fails. Which edit should the developer make to ensure the test class runs successfully?

- A. Implement the setFixedSearchResult= method in the test class.
- B. Implement the seeAllData=true attribute in the @IsTest annotation.
- C. Enclose the method call within Test.startTest() and @Test.stopTest().
- D. Implement the without sharing keyword in the searchFeatures Apex class.

Answer: A

Explanation:

To ensure that the test class for a search functionality in Salesforce runs successfully, the developer should use the Test.setFixedSearchResults() method. This allows the test to specify the records that are returned by the search, ensuring that the search behavior is predictable and that the assertion can be properly evaluated.

NEW QUESTION # 34

.....

Our Plat-Dev-301 study braindumps are comprehensive that include all knowledge you need to learn necessary knowledge, as well as cope with the test ahead of you. With convenient access to our website, you can have an experimental look of free demos before get your favorite Plat-Dev-301 prep guide downloaded. You can both learn useful knowledge and pass the exam with efficiency with our Plat-Dev-301 Real Questions easily. We are on the way of meeting our mission and purposes of helping exam candidates to consider the exam as a campaign of success and pass the exam successfully.
