SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q29-Q34):

NEW QUESTION # 29

When deploying SAP S/4HANA Cloud, private edition using new implementation, which of the following is recommended to code custom developments? Note: There are 2 correct answers to this question.

- A. SAP ABAP Workbench
- B. SAP Support Portal
- C. SAP Business Technology Platform
- D. SAP Best Practices

Answer: C,D

NEW QUESTION # 30

In a new implementation of SAP S/4HANA Cloud Private Edition, what tool is used for the initial one-time deployment of SAP Best

Practices content?

- A. SAP Central Business Configuration
- **B. SAP Solution Builder**
- C. SAP SignaviProcess Navigator
- D. SAP Cloud ALM

Answer: B

Explanation:

Step 1 - Understanding the Question

The question asks which tool is used for the initial one-time deployment of SAP Best Practices content in a new implementation of SAP S/4HANA Cloud, Private Edition.

Step 2 - Explanation

* In SAP S/4HANA Cloud, Private Edition (similar to on-premise installations), SAP Best Practices are activated through the SAP Solution Builder.

* The Solution Builder imports and activates preconfigured business processes, master data, and configuration settings delivered by SAP.

* This activity is performed once during system setup by SAP during the Prepare or Explore phase.

Other options:

* SAP Cloud ALM- used for project execution and monitoring, not content deployment.

* SAP Signavio Process Navigator- process documentation and reference library.

* SAP Central Business Configuration- used for Public Edition, not Private Edition.

NEW QUESTION # 31

How should an implementation consultant customize SAP Best Practices business processes?

- A. Make edits to the original process
- B. Use SAP Cloud ALM to edit the process
- C. Use SAP Signavio Process Manager to edit the process
- **D. Make a copy of the original process and edit the copy**

Answer: D

Explanation:

Step 1 - Understanding the question

This question asks how an implementation consultant should customize SAP Best Practices business processes in SAP S/4HANA Cloud, Private Edition.

SAP Best Practices are pre-delivered standard processes that provide ready-to-run configurations.

To maintain a clean core, SAP discourages editing the original process directly.

Step 2 - Evaluate each option

Option A: Make a copy of the original process and edit the copy

This is correct.

The correct approach is to copy the original Best Practice process into a customer workspace (for example, within SAP Signavio or SAP Solution Manager) and make necessary adjustments there.

This preserves the original SAP content and ensures that future updates or upgrades remain compatible.

Example 1:

A company copies the "Standard Order-to-Cash" process, modifies one approval step, and saves it as a new variant under its own namespace.

Example 2:

A finance consultant copies the "Journal Entry Posting" process to adjust document approval rules without touching the original Best Practice template.

Option B: Use SAP Cloud ALM to edit the process

This is incorrect.

SAP Cloud ALM is used to manage and monitor project tasks and test execution, not to directly edit Best Practice process content.

Option C: Use SAP Signavio Process Manager to edit the process

This is partially true in concept but not correct in this question's context.

While SAP Signavio can model and document processes, editing SAP Best Practice processes directly in Signavio is not the recommended or typical customization method for implementation consultants.

Option D: Make edits to the original process

This is incorrect.

Editing the original Best Practice process would violate clean-core principles and risk losing SAP-provided updates.

NEW QUESTION # 32

Where can an implementation consultant find configuration information for each level in the configuration hierarchy?

- A. In the SAP Fiori apps reference library
- B. In the SAP Help Portal
- C. In the SAP Signavio Process Manager
- D. In the SAP GUI

Answer: A

NEW QUESTION # 33

What is the difference between the "New Implementation of SAP S/4HANA Cloud, public edition" and the "New Implementation of SAP S/4HANA, private edition" transition paths? Note: There are 2 correct answers to this question.

- A. SAP S/4HANA Cloud, public edition does NOT offer built-in capabilities for extensibility, while SAP S/4HANA Cloud, private edition offers a full development environment.
- B. Upgrades of SAP S/4HANA Cloud, public edition are based on SAP timelines, and upgrades of SAP S/4HANA Cloud, private edition are based on timelines agreed between SAP and the customer.
- C. SAP S/4HANA Cloud, private edition uses the Implementation Guide (IMG) and SAP S/4HANA Cloud, public edition uses SAP Central Business Configuration.
- D. SAP S/4HANA Cloud, private edition is only available through SAP Cloud services and with embedded implementation services from SAP.

Answer: B,C

NEW QUESTION # 34

.....

We all know that pass the C-S4PM2-2507 exam will bring us many benefits, but it is not easy for every candidate to achieve it. The C-S4PM2-2507 guide torrent is a tool that aimed to help every candidate to pass the exam. Our exam materials can installation and download set no limits for the amount of the computers and persons.
