

100% Pass Quiz Nutanix - Latest NCP-EUC - Official Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Study Guide

What's more, part of that Real4Prep NCP-EUC dumps now are free: <https://drive.google.com/open?id=1JWcdFRIC97cWn50bc7fdSzGl2CfKLTEI>

If you don't pass the Selling Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam, Real4Prep will refund the money. Some terms and conditions related to the refund are given on the guarantee page. You will not find such excellent offers anywhere else. Therefore, don't miss this golden opportunity and Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) practice test material today!

Nutanix NCP-EUC certification exam is an excellent way for IT professionals to demonstrate their expertise in the end-user computing field. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification will validate their skills in deploying, configuring, and managing Nutanix VDI solutions. By achieving this certification, professionals will enhance their knowledge and career prospects, and also gain the recognition and respect of their peers in the industry.

Nutanix NCP-EUC (Nutanix Certified Professional - End-User Computing) Certification Exam is a highly respected certification in the field of end-user computing. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification is designed to validate the skills and knowledge required to deploy, manage, and support Nutanix infrastructure for end-user computing solutions. NCP-EUC Exam includes a range of topics, such as desktop and application virtualization, end-user management, and endpoint security.

High Hit Rate Official NCP-EUC Study Guide for Real Exam

At Real4Prep, we are committed to providing our clients with the actual and latest Nutanix NCP-EUC exam questions. Our real NCP-EUC exam questions in three formats are designed to save time and help you clear the NCP-EUC Certification Exam in a short time. Preparing with Real4Prep's updated NCP-EUC exam questions is a great way to complete preparation in a short time and pass the NCP-EUC test in one sitting.

Earning the NCP-EUC Certification is a valuable achievement for IT professionals who want to expand their skills and knowledge in end-user computing and stay current with the latest industry trends. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification can help professionals stand out in the job market and open up new career opportunities. Additionally, Nutanix certification holders gain access to exclusive resources, such as training materials, webinars, and networking events, which can help them stay up-to-date with the latest developments in the field.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q71-Q76):

NEW QUESTION # 71

A company is planning to implement Citrix Virtual Apps and Desktops on Nutanix clusters running AHV.

The initial implementation will be sized for 1000 virtual desktops with Windows 11, Microsoft Office 2021 and Adobe Creative Cloud All Apps installed.

What is the correct prerequisite to implement a successful installation of the Nutanix AHV MCS Plug-in?

- A. The user running Nutanix AHV MCS installer must have administrator privileges on the Citrix Storefront.
- B. Nutanix cluster virtual IP address is reachable.
- C. Nutanix data services IP address is reachable.
- **D. The user running Nutanix AHV MCS installer must have administrator privileges on the Citrix Broker.**

Answer: D

Explanation:

The Nutanix AHV MCS Plug-in is a tool that enables Citrix Virtual Apps and Desktops Delivery Controllers (also called Brokers) to create and manage Citrix-provisioned VMs in a Nutanix AHV infrastructure environment. The plug-in is based on the Citrix-defined plug-in framework2.

To install the Nutanix AHV MCS Plug-in, you need to meet some prerequisites, such as:

The Delivery Controller version must be 7.15 LTSR CU3 or later.

The Delivery Controller must be able to communicate with Prism Element (PE) using HTTPS port 9440.

The Delivery Controller must have PowerShell 5.1 or later installed.

The user running the installer must have administrator privileges on the Delivery Controller2.

NEW QUESTION # 72

The administrator has checked the logs to see the below output:

The API call sent to the VM via XD Plugin at [CDF logs]:

□ Following that while the VM is being powered OFF, query for the current VM state results in ON (the administrator sees a number of these until the VM is marked as power OFF) logs]:

□ Upon further review the administrator notices in COF logs, after a number of queries for the machine state, one results in a conflicting state, reporting the Power state as ON and OFF [CDF logs] HCM should the administrator resolve the issue?

- A. Increase the distribution time in Machine Update Rollout
- B. Delete Scheduled reboot settings
- **C. Create a Scheduled reboot cycle.**
- D. Decrease the distribution time in Machine Update Rollout

Answer: C

NEW QUESTION # 73

An administrator is using Citrix Studio to configure policies for their existing CVAD environment on to a Nutanix Files share. The administrator would like to use Citrix Director to reset user profiles.

How should the user profiles be configured?

- **A. use Nutanix Files distributed shares. Deploy Citrix Profile Management user stores inside the user's top-level directory.**
- B. use Nutanix Files standard shares
Deploy Citrix Profile Management user stores inside the user's top-level directory
- C. Redirect user's Desktop, Documents and Favorites to a Nutanix Files home share.

- D. Redirect user's Desktop, Documents and Favorites to a Nutanix Files general share.

Answer: A

Explanation:

This is because this option will allow the administrator to use Citrix Director to reset user profiles on a Nutanix Files share that provides high performance, scalability, and resilience³.

Citrix Profile Management is a solution that allows administrators to manage user profiles and settings across different devices and sessions¹². Nutanix Files is a software-defined file storage solution that provides high performance and scalability for file data¹².

Nutanix Files supports all forms of profile management with efficient metadata caching techniques that optimize for faster VDI logon times¹². Nutanix Files offers two types of shares: standard shares and distributed shares³. Standard shares are hosted on a single file server, while distributed shares are hosted on multiple file servers for load balancing and high availability³.

NEW QUESTION # 74

Refer to the exhibit.

An administrator is configuring a virtual desktop gold master image with P40 NVIDIA vGPU. upon trying to add a vCPU assignment in Prism Element, the administrator noticed that it is not selectable and cannot proceed.

Which two actions are correct steps to resolve this issue? (Choose two.)

- A. Check if ECC Mode is turned on by running `nvidia-smi -q | grep "ECC Mode" -A2`
- B. Install the NVIDIA GPU drivers on the Gold Master.
- C. Install the NVIDIA GPU Manager Driver.
- D. Disable ECC by running `nvidia-smi -e 0`.

Answer: A,D

Explanation:

ECC (Error Correcting Code) mode is a feature of some NVIDIA GPUs that provides error detection and correction for memory errors. However, ECC mode can interfere with vGPU functionality and prevent vGPU-enabled VMs from being created or started¹. Therefore, two correct steps to resolve this issue are B (Disable ECC by running `nvidia-smi -e 0`) and D (Check if ECC Mode is turned on by running `nvidia-smi -q | grep "ECC Mode" -A2`).

NEW QUESTION # 75

A new large multisite environment is being designed with a requirement to focus on workload availability and failover while reducing the brokering infrastructure footprint and management. Infrastructure components that are deployed must follow vendor recommendations for high availability and redundancy.

Which Citrix control plane should be used and where should they be deployed in this scenario?

- A. Citrix DaaS with highly available cloud connectors on AHV infrastructure clusters in each resource location
- B. Citrix VAD with highly available delivery controllers on AHV workload clusters in each site
- C. Citrix VAD with highly available delivery controllers on AHV infrastructure clusters in each site
- D. Citrix DaaS with highly available cloud connectors on AHV workload clusters in each resource location

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Nutanix Validated Designs (NVD) for Citrix DaaS:

* Control Plane: The requirement to "reduce brokering infrastructure footprint" dictates the use of Citrix DaaS (formerly Citrix Cloud), which offloads the Delivery Controllers and SQL databases to the Citrix cloud service, leaving only the lightweight Cloud Connectors on-premises.

* Placement: In a large multisite architecture using the standard "Block and Pod" design, Nutanix recommends separating Management/Infrastructure functions from Workload functions.

* Best Practice: Cloud Connectors are critical infrastructure components. They should be deployed on the AHV Infrastructure Clusters (Management Clusters) in each resource location, rather than the Workload clusters, to ensure they are protected from resource contention caused by user desktops and to maintain a clean separation of duties.
