Though the content of them are the same, the different layouts provide lots of conveniences out of your imagination. Just have a try and you will love our Integration-Architect Practice Engine.

Salesforce Certified Integration Architect Sample Questions (Q124-Q129):

NEW QUESTION # 124

A company that is a leading provider of training delivers courses to students globally. The company decided to use customer community in order to allow student to log in to the community, register for courses and pay course fees. The company has a payment gateway that takes more than 30 seconds to process the payment transaction. Students would like to get the payment result in real-time so in case an error happens, the students can retry the payment process.

What is the recommended integration approach to process payments based on this requirement?

- A. Use platform event to process payment to the payment gateway.
- B. Use request and reply to make an API call to the payment gateway.
- C. Use continuation to process payment to the payment gateway.

C Use change data capture to process payment to the payment gateway.

Answer: C

NEW QUESTION # 125

Northern Trail Outfitters is planning to perform nightly batch loads into Salesforce from an external system with a custom Java application using the and the CIO is curious about monitoring recommendations for the jobs from the Technical Architect Which two recommendations will help meet the requirements?

Choose 2 answers

- A. Set the Salesforce debug logs level to "finest" and add the user Id running the job to monitor in the "Debug Logs" in the setup menu.
- B. Write the error response from the Bulk API status to a custom error logging object in Salesforce using an Apex trigger and create reports on the object.
- C. Use the `getBatchInfo` method in the Java application to monitor the status of the jobs from the Java application.
- D. Visually monitor in the Salesforce UI using the "Bulk Data Load Jobs" in the setup menu.

Answer: C,D

Explanation:

Visually monitor in the Salesforce UI using the "Bulk Data Load Jobs" in Salesforce in the setup menu, and use the `getBatchInfo` method in the Java application to monitor the status of the jobs from the Java application. These two methods can help the Technical Architect to monitor the nightly batch loads into Salesforce from an external system with a custom Java application using the Bulk API. The "Bulk Data Load Jobs" page in Salesforce shows the status, progress, and results of each batch load job. The `getBatchInfo` method in the Java application returns a `BatchInfo` object that contains information about a batch, such as its ID, state, number of records processed, and number of errors. NEW QUESTION # 126

Given the diagram below, a Salesforce org, middleware, and Historical data store (with 20million records and growing) exists with connectivity between them

Historical records are archived from Salesforce and moved to Historical Data store (which houses 20M records and growing; fine-tuned to be performant with search queries).

Call center agents use Salesforce, when reviewing occasional special cases, have requested access to view the related historical case items that relate to submit cases.

Which mechanism and patterns are recommended to maximize declarative configuration?

- A. Use an ESB tool with Request-Reply pattern and then make a real-time Apex callout to the ESB endpoint to fetch and display component related to Case object
- B. Use an ETL tool with a Batch Data Synchronization pattern to migrate historical data into Salesforce and into a custom object (historical data) related to Case object.
- C. Use ESB tool with Data Virtualization pattern, expose OData endpoint, and then use Salesforce Connect to consume and display the External Object alongside with the Case object.
- D. C Use an ESB tool with a fire and forget pattern and then publish a platform event for the requested historical data.

Answer: C

NEW QUESTION # 127

An organization needs to integrate Salesforce with an external system and is considering authentication options. The organization already has implemented SAML, using a third-party Identity Provider for integrations between other systems.

Which use case can leverage the existing SAML integration to connect Salesforce with other internal systems?

- A. Make formula fields with `HYPERLINK()` to external web servers more secure.
- B. Make Apex SOAP outbound integrations to external web services more secure.
- C. Make an API inbound integration from an external Java client more secure.
- D. A Make Apex REST outbound integrations to external web services more secure.

Answer: A

NEW QUESTION # 128

A customer is migrating from an old legacy system to Salesforce. As part of the modernization effort, they would like to integrate all existing systems that currently work with their legacy application with Salesforce.

Which three constraints and pain-points should an integration architect consider when choosing the integration pattern/mechanism? Choose 3 answers

- A. Error handling mechanisms
- B. System types - APIs, File systems, Email
- C. Reporting and usability requirements
- D. Multi-language and multi-currency requirement
- E. Data Volume and Processing volume

Answer: A,B,E

NEW QUESTION # 129

.....

If you can get the certification for Integration-Architect exam, then your competitive force in the job market and your salary can be improved. We can help you pass your exam in your first attempt and obtain the certification successfully. Integration-Architect exam braindumps are high-quality, they cover almost all knowledge points for the exam, and you can master the major knowledge if you choose us. In addition, Integration-Architect Test Dumps also contain certain quantity, and it will be enough for you to pass the exam.
