

Free PDF Quiz Juniper Marvelous Exam JN0-481 Answers

What's more, part of that SureTorrent JN0-481 dumps now are free: <https://drive.google.com/open?id=18ULeW-UK-Lv12E0NmaXD8eqi2EwgbWeW>

Don't let the Data Center, Specialist (JNCIS-DC) exam stress you out! Prepare with our JN0-481 exam dumps and boost your confidence in the JN0-481 exam. We guarantee your road toward success by helping you prepare for the JN0-481 exam. Use the best Juniper JN0-481 practice questions to pass your JN0-481 Exam with flying colors! In this way, the Data Center, Specialist (JNCIS-DC) certified professionals can not only validate their skills and knowledge level but also put their careers on the right track. By doing this you can achieve your career objectives.

The JN0-481 certificate enjoys a high reputation among the labor market circle and is widely recognized as the proof of excellent talents and if you are one of them and you want to pass the test smoothly you can choose our JN0-481 practice questions. Our JN0-481 Study Materials concentrate the essence of exam materials and seize the focus information to let the learners master the key points. You will pass the exam for sure if you choose our JN0-481 exam braindumps.

Free PDF 2026 High Hit-Rate JN0-481: Exam Data Center, Specialist (JNCIS-DC) Answers

No need to go after substandard JN0-481 brain dumps for exam preparation that has no credibility. They just make you confused and waste your precious time and money. Compare our content with other competitors like Pass4sure's dumps, you will find a clear difference in JN0-481 material. Most of the content there does not correspond with the latest syllabus content. It also does not provide you the best quality. Likewise the exam collection's brain dumps are not sufficient to address all exam preparation needs.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q49-Q54):

NEW QUESTION # 49

Which two statements are correct about the information shown in the exhibit? (Choose two.)

- A. The device shown is a generic system.
- B. The system is fully managed by Juniper Apstra.
- C. Four physical interfaces exist in a LAG facing the leaf pair.
- D. The physical ports are not part of the LAG.

Answer: A,C

Explanation:

A generic system is a device that is not managed by Juniper Apstra and does not have a specific role or type assigned to it. A generic system can be used to represent a server, a firewall, a load balancer, or any other device that is not part of the fabric. In the exhibit, the device shown is a generic system, as indicated by its role, system type, and management level. Therefore, the correct answer is B. The device shown is a generic system. A LAG is a link aggregation group that bundles multiple physical interfaces into a single logical interface. A LAG can provide increased bandwidth, redundancy, and load balancing for the network traffic. In the exhibit, the device shown has four physical interfaces that are part of a LAG, as indicated by their description and li_type. The LAG is facing the leaf pair, which are the two switches that connect to the device.

NEW QUESTION # 50

Which two statements are correct about repairing a Juniper Apstra cabling map before deploying your blueprint? (Choose two.)

- A. Apstra can use LLDP data from the spine-to-leaf fabric devices to update the connections in the cabling map.
- B. You must manually change the cabling map to update leaf-to-generic links.
- C. Apstra can use LLDP data from the leaf devices to update the leaf-to-generic connections in the cabling map.
- D. You must manually change the cabling map to update spine-to-leaf fabric links.

Answer: A,C

Explanation:

The cabling map is a graphical representation of the physical connections between the devices in the data center fabric. It shows the status of the cables, interfaces, and BGP sessions for each device. You can use the cabling map to verify and repair the cabling before deploying your blueprint. Based on the web search results, we can infer the following statements:

Apstra can use LLDP data from the spine-to-leaf fabric devices to update the connections in the cabling map. This is true because Apstra can collect LLDP data from the devices using the Generic Graph Collector processor and use it to update the cabling map automatically.

LLDP is a protocol that allows devices to exchange information about their identity, capabilities, and neighbors. Apstra can use LLDP data from the leaf devices to update the leaf-to-generic connections in the cabling map. This is true because Apstra can also collect LLDP data from the leaf devices and use it to update the connections to the generic devices, such as routers, firewalls, or servers. Generic devices are devices that are not managed by Apstra but are part of the data center fabric.

You must manually change the cabling map to update spine-to-leaf fabric links. This is false because Apstra can use LLDP data to update the spine-to-leaf fabric links automatically, as explained above. However, you can also manually change the cabling map to override the Apstra-generated cabling, if needed.

You must manually change the cabling map to update leaf-to-generic links. This is false because Apstra can use LLDP data to update the leaf-to-generic links automatically, as explained above.

However, you can also manually change the cabling map to override the Apstra-generated cabling, if needed.

NEW QUESTION # 51

In the Juniper Apstra UI, which two resource types would be created in the Resources menu?
(Choose two.)

- A. bridge domain identifier (BDI)
- B. ASN pools
- C. IP pools
- D. DHCP pools

Answer: B,C

Explanation:

The Resources menu in the Juniper Apstra UI allows you to create and manage various types of resources that are assigned to different elements of the network.

Resources include the following types:

- IPv4 (including Host IPv4)
- IPv6 (including Host IPv6)
- ASN (autonomous system number)
- VNI (virtual network identifier)
- VLAN (virtual local area network)

Integer (used for pool type VLAN in local pools in Freeform blueprints) Therefore, the correct answer is C and D. ASN pools and IP pools are two types of resources that can be created in the Resources menu. Bridge domain identifier (BDI) and DHCP pools are not applicable in this scenario, because they are not part of the resources types supported by Juniper Apstra.

NEW QUESTION # 52

You are adding a new switch to Juniper Apstra software. The Managed Devices page shows the "0 OS- Quarantined" status. What is the proper next step to make the device ready for use in a blueprint?

- A. Take the device out of maintenance mode.
- B. Take the device out of drain state.
- C. Acknowledge the device.
- D. Install the agent for the device.

Answer: C

Explanation:

When a new switch is added to Juniper Apstra software, it initially shows the "0 OS-Quarantined" status, which means that the device is not yet managed by Apstra and has not been assigned to any blueprint. The proper next step to make the device ready for use in a blueprint is to acknowledge the device, which is a manual action that confirms the device identity and ownership.

Acknowledging the device changes its status to "OOS-Ready", which means that the device is ready to be assigned to a blueprint and deployed.

NEW QUESTION # 53

IBA probes analyze telemetry data from specified devices within a blueprint. Which component identifies devices that supply data for a specific probe?

- A. graph query
- B. data selector
- C. processor
- D. search engine

Answer: A

Explanation:

A graph query is a component that identifies devices that supply data for a specific probe. A graph query is an expression that matches nodes in the Apstra graph database based on their attributes, such as device name, role, type, or tag. A graph query can be used to select the source devices for the input processors of a probe, as well as to filter the data by device attributes in the subsequent processors of a probe.

NEW QUESTION # 54

.....

You are desired to know where to get free and valid resource for the study of JN0-481 actual test. JN0-481 free demo can give you some help. You can free download the JN0-481 free pdf demo to have a try. The questions of the free demo are part of the Juniper JN0-481 Complete Exam Dumps. You can have a preview of the JN0-481 practice pdf. If you think it is valid and useful, you can choose the complete one for further study. I think with the assist of JN0-481 updated dumps, you will succeed with ease.
