What's more, the latest version of our ITIL-4-CDS study materials will be a good way for you to broaden your horizons as well as improve your skills.

Peoplecert ITIL 4 Specialist: Create, Deliver and Support Sample Questions (Q83-Q88):

NEW QUESTION # 83

A service operations team monitors a critical service. They receive thousands of events every day, and operators are trained, so they know which events require a response. Sometimes they miss an important event, and this causes service level targets to be breached. What is the BEST approach to resolve this issue?

- A. Improve operations team training
- B. Recruit and train additional operations staff
- C. Review and automate filtering of operations data
- D. Renegotiate service level targets

Answer: C

NEW QUESTION # 84

A service has been in use for a number of years, and is not being developed or updated. Customers are not happy because they think that the applications that support the service are missing important functionality. Which practice is most likely to identify this issue and initiate improvement actions?

- A. Service validation and testing
- B. Service desk
- C. Knowledge management
- **D. Service level management**

Answer: D

NEW QUESTION # 85

In a mature ITIL 4 practice environment, incidents are automatically generated from monitoring events, enriched with CI data from the CMDB, and routed through automated priority matrices. Major-incident teams must be alerted based on dynamic impact thresholds, and linked knowledge articles should surface during ticket resolution. Which ONE practice is accountable for defining and governing this entire ticket lifecycle from auto-creation and CI integration to automated escalations, major-incident protocols, and closure criteria?

- A. Service Request Management practice
- B. Problem Management practice
- C. Event Management practice
- **D. Incident Management practice**

Answer: D

Explanation:

The Incident Management practice owns the complete lifecycle of unplanned service disruptions.

It defines how incidents are captured whether via user reports or automated event triggers, how CI attributes inform categorization and impact assessment, and how dynamic priority matrices drive automated escalations. It also prescribes major-incident procedures, integrates knowledge- article recommendations into the resolution workflow, and enforces closure criteria once service restoration is verified.

NEW QUESTION # 86

To stay ahead of its competition, an organization's leadership team is focused on ensuring that product innovations reach customers quickly. A team is discussing how it can leverage value stream mapping in support of this goal. The team wants to improve the entire end-to-end value stream. Which improvement is MOST LIKELY to improve the entire value stream?

- A. Reducing the time spent assessing and approving changes
- **B. Designing a continuous integration/continuous delivery pipeline**
- C. Minimizing handoffs between specialists within a development team
- D. Reducing the time it takes to provide environments for projects

Answer: B

NEW QUESTION # 87

A managed service provider manages an organization's suppliers, provides some delivery functions to the organization, and coordinates service integration and management between the organization and its suppliers. Which model is this an example of?

- A. Single provider
- B. Retained service integration
- C. Service guardian
- **D. Service integration as a service**

Answer: D

NEW QUESTION # 88

.....
