Therefore, the CCFH-202b practice materials can give users more advantages in the future job search, so that users can stand out in the fierce competition and become the best.

CrowdStrike Certified Falcon Hunter Sample Questions (Q47-Q52):

NEW QUESTION # 47

When performing a raw event search via the Events search page, what are Event Actions?

- A. Event Actions are pivotable workflows including connecting to a host, pre-made event searches and pivots to other investigatory pages such as host search
- B. Event Actions contains an audit information log of actions an analyst took in regards to a specific detection
- C. Event Actions contains the summary of actions taken by the Falcon sensor such as quarantining a file, prevent a process from executing or taking no actions and creating a detection only
- D. Event Actions is the field name that contains the event name defined in the Events Data Dictionary such as ProcessRollup, SyntheticProcessRollup, DNS request, etc

Answer: A

Explanation:

When performing a raw event search via the Events search page, Event Actions are pivotable workflows that allow you to perform

various tasks related to the event or the host. For example, you can connect to a host using Real Time Response, run pre-made event searches based on the event type or name, or pivot to other investigatory pages such as host search, hash search, etc. Event Actions do not contain audit information log, summary of actions taken by the Falcon sensor, or the event name defined in the Events Data Dictionary.

NEW QUESTION # 48

How do you rename fields while using transforming commands such as table, chart, and stats?

- A. By specifying the desired name after the field name eg "stats count totalcount by ComputerName"
- B. By using the "renamed" keyword after the field name eg "stats count renamed totalcount by ComputerName"
- C. You cannot rename fields as it would affect sub-queries and statistical analysis
- D. **By renaming the fields with the "rename" command after the transforming command e.g. "stats count by ComputerName | rename count AS total_count"**

Answer: D

Explanation:

The rename command is used to rename fields while using transforming commands such as table, chart, and stats. It can be used after the transforming command and specify the old and new field names with the AS keyword. You can rename fields as it would not affect sub-queries and statistical analysis, as long as you use the correct field names in your queries. The renamed keyword and the desired name after the field name are not valid ways to rename fields.

NEW QUESTION # 49

Event Search data is recorded with which time zone?

- A. UTC
- B. EST
- C. PST
- D. GMT

Answer: A

Explanation:

Event Search data is recorded with UTC (Coordinated Universal Time) time zone. UTC is a standard time zone that is used as a reference point for other time zones. PST (Pacific Standard Time), GMT (Greenwich Mean Time), and EST (Eastern Standard Time) are not the time zones that Event Search data is recorded with.

NEW QUESTION # 50

Which SPL (Splunk) field name can be used to automatically convert Unix times (Epoch) to UTC readable time within the Falcon Event Search?

- A. time
- B. **_time**
- C. utc_time
- D. conv_time

Answer: B

Explanation:

_time is the SPL (Splunk) field name that can be used to automatically convert Unix times (Epoch) to UTC readable time within the Falcon Event Search. It is a default field that shows the timestamp of each event in a human-readable format. utc_time, conv_time, and time are not valid SPL field names for converting Unix times to UTC readable time.

NEW QUESTION # 51

Refer to Exhibit.

What type of attack would this process tree indicate?

- A. Brute Forcing Attack
- B. Man-in-the-middle Attack
- **C. Phishing Attack**
- D. Web Application Attack

Answer: C

Explanation:

This process tree indicates a phishing attack, as it shows a user opening an email attachment (outlook.exe) that launches a malicious macro (cmd.exe) that downloads and executes a payload (powershell.exe) that connects to a remote server (svchost.exe). A phishing attack is a type of social engineering attack that uses deceptive emails or messages to trick users into opening malicious attachments or links that can compromise their systems or credentials.

NEW QUESTION # 52

.....
