

# F5 F5CAB5 Questions To Gain Brilliant Result [2026]

P.S. Free & New F5CAB5 dumps are available on Google Drive shared by PrepPDF: [https://drive.google.com/open?id=1KZ0xuoWhfpXD\\_AkaekFne2jSEfq3gd2B](https://drive.google.com/open?id=1KZ0xuoWhfpXD_AkaekFne2jSEfq3gd2B)

PrepPDF F5 F5CAB5 certification training dumps have an advantage over any other exam dumps. Because this is the exam dumps that can help you pass F5CAB5 certification test at the first attempt. High passing rate of PrepPDF questions and answers is certified by many more candidates. PrepPDF F5 F5CAB5 Practice Test materials are the shortcut to your success. With the exam dumps, you can not only save a lot of time in the process of preparing for F5CAB5 exam, also can get high marks in the exam.

Our BIG-IP Administration Support and Troubleshooting test torrent has been well received and have reached 99% pass rate with all our dedication. As a powerful tool for a lot of workers to walk forward a higher self-improvement, our F5CAB5 certification training continued to pursue our passion for advanced performance and human-centric technology. Only 20-30 hours are needed for you to learn and prepare our F5CAB5 test questions for the exam and you will save your time and energy. No matter you are the students or the in-service staff you are busy in your school learning, your jobs or other important things and can't spare much time to learn. But you buy our F5CAB5 Exam Materials you will save your time and energy and focus your attention mainly on your most important thing. You only need several hours to learn and prepare for the exam every day.

## Quiz Fantastic F5 - Guide F5CAB5 Torrent

Do you often feel that your ability does not match your ambition? Are you dissatisfied with the ordinary and boring position? If your answer is yes, you can try to get the F5CAB5 certification that you will find there are so many chances wait for you. You can get a better job; you can get more salary. But if you are trouble with the difficult of F5CAB5 Exam, you can consider choose F5CAB5 guide question to improve your knowledge to pass F5CAB5 exam, which is your testimony of competence.

## F5 F5CAB5 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Given a scenario, review basic stats to confirm functionality: This section involves interpreting traffic object statistics and network configuration statistics to validate system functionality.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Identify the reason a pool is not working as expected: This domain focuses on troubleshooting pools including health monitor failures, priority group membership, and configured versus availability status of pools and members.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Determine resource utilization: This domain covers analyzing system resources including control plane versus data plane usage, CPU statistics per virtual server, interface statistics, and disk and memory utilization.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Identify the reason a virtual server is not working as expected: This section covers diagnosing virtual server issues including availability status, profile conflicts and misconfigurations, and incorrect IP addresses or ports.</li> </ul>

## F5 BIG-IP Administration Support and Troubleshooting Sample Questions (Q76-Q81):

### NEW QUESTION # 76

Plaintext

warning tmm[<pid>]: 011e0002:4: sweeper\_segment\_cb\_any: Aggressive mode /Common/default-eviction-policy activated (0) (global memory). (345209/690176 pages) warning tmm[<pid>]: 011e0003:4: Aggressive mode sweeper: /Common/default-eviction-policy (0) (global memory) 1 Connections killed What is happening when the BIG-IP Administrator sees the messages in the LTM log displayed above? (Pick the 2 correct responses below)

- A. The global eviction policy is triggered due to TMM memory exhaustion
- B. The BIG-IP system starts reaping connections, all the connections will be dropped
- C. The BIG-IP system starts reaping connections, some connections will be dropped
- D. The global eviction policy is triggered due to swap memory being used too high

**Answer: A,C**

### NEW QUESTION # 77

A BIG-IP Administrator uses backend servers to host multiple services per server. There are multiple virtual servers and pools defined, referencing the same backend servers. Which load balancing algorithm is most appropriate to have an equal number of connections on each backend server?

- A. Predictive (member)
- B. Least Connections (member)
- C. Predictive (node)
- D. Least Connections (node)

**Answer: D**

Explanation:

When load balancing is not working as expected and connections appear skewed across physical hardware, the administrator must distinguish between "member" and "node" level balancing. A

"member" refers to a specific IP and Port combination (e.g., 10.1.1.1:80), whereas a "node" refers to the underlying IP address (10.1.1.1) regardless of the port. If a single server hosts multiple services (Web, FTP, API) across different pools, using "Least Connections (member)" would only balance connections within each individual pool. This could lead to a scenario where one server is overwhelmed because it is winning the "least connections" count in three different pools simultaneously. By selecting "Least Connections (node)," the BIG-IP tracks the total number of concurrent connections to the physical IP address across all pools it belongs to. This ensures that the administrator can maintain an equal distribution of work across the hardware, preventing performance degradation on backend servers that host multiple application services.

### NEW QUESTION # 78

A Virtual Server uses an iRule to send traffic to pool members depending on the URI. The BIG-IP Administrator needs to modify the pool member in the iRule. Which event declaration does the BIG-IP Administrator need to change to accomplish this?

- A. SERVER\_CONNECTED
- B. CLIENT\_ACCEPTED
- C. HTTP\_REQUEST
- D. HTTP\_RESPONSE

**Answer: C**

Explanation:

In F5 TMOS administration, the traffic flow is processed through specific event huddles within iRules. To troubleshoot or modify traffic based on a URI (Uniform Resource Identifier), the BIG-IP system must first parse the application-layer data. The HTTP\_REQUEST event is triggered when the system has fully received and parsed the HTTP request headers from the client. This is the correct point to implement logic that selects a pool or pool member based on the path or file requested (e.g., /images or /api). Using CLIENT\_ACCEPTED would be too early in the troubleshooting process because that event triggers at the L4 (TCP) connection establishment phase, before any URI information is available. Conversely, HTTP\_RESPONSE occurs during the return traffic from the server, which is too late to make a load balancing decision. For troubleshooting virtual server behavior where URIs are involved, ensuring the iRule is attached to a Virtual Server with an HTTP profile and using the HTTP\_REQUEST event is essential for proper traffic steering and inspection.

#### NEW QUESTION # 79

A BIG-IP Administrator makes a configuration change to the BIG-IP device. Which file logs the message regarding the configuration change?

- A. /var/log/user.log
- B. /var/log/audit
- C. /var/log/secure
- D. /var/log/messages

**Answer: B**

Explanation:

The BIG-IP system uses the audit log to track administrative actions and configuration changes.

\* Audit Logging Functionality: When a user modifies the configuration via the Configuration Utility (GUI), the Traffic Management Shell (tmsh), or iControl, the system records the event in the audit log.

This includes the name of the user who made the change, the timestamp, and the specific command or object that was modified.

\* Log Location: The audit log is stored at /var/log/audit.

\* Evaluation of Other Options:

\* /var/log/messages (Option A) contains general system and kernel messages but is not the primary source for configuration change details.

\* /var/log/secure (Option B) primarily logs authentication and authorization attempts (logins and logouts).

\* /var/log/user.log (Option D) is a generic Linux log file for user-level applications and does not track BIG-IP LTM configuration changes.

#### NEW QUESTION # 80

Refer to the exhibit.

The image shows the status of a virtual server named application\_vs in the BIG-IP Configuration Utility.

What is the cause of the status shown? (Choose two answers)

- A. Node(s) administratively disabled
- B. Pool member(s) forced offline
- C. Virtual Server administratively disabled
- D. Pool member(s) administratively disabled

**Answer: A,D**

Explanation:

The exhibit shows the virtual server application\_vs with a status indicating it is offline but enabled. In BIG-IP terminology, this status

means the virtual server itself is administratively enabled, but it is unable to pass traffic because no usable pool members are available.

Two common and documented causes for this condition are:

Pool member(s) administratively disabled (Option A): When all pool members are administratively disabled, BIG-IP removes them from load-balancing decisions. Even though the virtual server remains enabled, it has no available pool members to send traffic to, resulting in an offline status.

Node(s) administratively disabled (Option C): Pool members inherit the status of their parent nodes. If a node is administratively disabled, all associated pool members are also marked unavailable. This condition causes the virtual server to show as offline, even though the virtual server configuration itself is correct.

The other options are incorrect:

Forced offline pool members (Option B) result in a different operational intent and are explicitly set for maintenance scenarios.

Virtual server administratively disabled (Option D) would show the virtual server as disabled, not enabled /offline.

This behavior is consistent with BIG-IP traffic management logic and is commonly verified by reviewing pool and node availability states when diagnosing virtual server availability issues.

## NEW QUESTION # 81

.....

You can enjoy 365 days free update after purchase of our F5CAB5 exam torrent. About the updated F5 study material, our system will send the latest one to your payment email automatically as soon as the F5CAB5 updated. So you can study with the latest F5CAB5 Study Material. In addition, PrepPDF offer you the best valid F5CAB5 training pdf, which can ensure you 100% pass. Try our F5CAB5 free demo before you buy, you will be surprised by our high quality F5CAB5 pdf vce.
