Microsoft Power Platform Fundamentals Sample Questions (Q311-Q316):

NEW QUESTION # 311

A company uses Dynamics 365 Supply Chain Management.

When a sales order is created for one of the customers that a specific user manages, a Microsoft Outlook task must be created to remind the user to perform any follow up activities that are required.

You need to implement the functionality to create Outlook tasks.

Which two features should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Business Events
- B. AI Builder
- C. Common Data Service
- D. Power Apps
- E. Microsoft Flow

Answer: A,E

Explanation:

Section: Describe the business value of Power Automate

Explanation:

Business events in Microsoft Power Automate

Business events can be consumed in Microsoft Power Automate via the application connector. The connector has a trigger that is named when a business event occurs. This trigger can be used to subscribe to any of the business events that are available in the target instance of the application.

NEW QUESTION # 312

A company plans to use Power Platform to build apps which address specific business challenges.

You need to recommend the appropriate types of Power Apps to use.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Scenario	Tool
Field technicians need a mobile app to capture the location and the image of defective products.	<input type="text"/> Canvas app Power Apps portal Common Data Service
Sales representatives need to see different views and dashboards in the sales app.	<input type="text"/> Canvas app Model-driven app Power Apps portal
External customers need to view the progress of their service cases.	<input type="text"/> Model-driven app Power Apps portal Common Data Service

Answer:

Explanation:

Scenario	Tool
Field technicians need a mobile app to capture the location and the image of defective products.	<input type="text"/> Canvas app Power Apps portal Common Data Service
Sales representatives need to see different views and dashboards in the sales app.	<input type="text"/> Canvas app Model-driven app Power Apps portal
External customers need to view the progress of their service cases.	<input type="text"/> Model-driven app Power Apps portal Common Data Service

<https://docs.microsoft.com/en-us/powerapps/maker/portals/overview>

NEW QUESTION # 313

A company uses Power Apps.

You need to perform administrative tasks for the company.

Which admin centers should you use? To answer, drag the appropriate admin centers to the correct requirements. Each admin center may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Admin centers	Requirement	Admin center
<input type="text"/> Azure Active Directory <input type="text"/> Dynamics 365 Admin center <input type="text"/> Power Apps Admin center <input type="text"/> Power BI Admin portal	Create user accounts for Power Apps. Assign the Environment Maker role to a user.	<input type="text"/> Admin center <input type="text"/> Admin center

Answer:

Explanation:

Admin centers	Requirement	Admin center
<input type="text"/> Azure Active Directory <input type="text"/> Dynamics 365 Admin center <input type="text"/> Power Apps Admin center <input type="text"/> Power BI Admin portal	Create user accounts for Power Apps. Assign the Environment Maker role to a user.	<input type="text"/> Azure Active Directory <input type="text"/> Power Apps Admin center

Explanation:

Box 1: Azure Active Directory

Create the company users in the Azure Active Directory.

Box 2: Power Apps admin center

In the Power Apps Admin center, manage environments that you've created and those for which you have been added to the Environment Admin or System Administrator role. From the admin center, you can perform these administrative actions:

Create environments.

Rename environments.

Add or remove a user or group from either the Environment Admin or Environment Maker role.

Etc.

Incorrect Answers:

* Use the Dynamics 365 admin center to review the status of your apps and solutions, apply updates, and manage your Dynamics 365 instances, solutions, and apps.

* The Power BI admin portal enables you to manage a Power BI tenant for your organization. The portal includes items such as usage metrics, access to the Microsoft 365 admin center, and settings Note: You use the Microsoft 365 admin center to create user accounts for every user who needs access to model-driven apps in Dynamics 365, such as Dynamics 365 Sales and Customer Service.

Explanation

Purpose	Tool
Helps jumpstart application development by leveraging business logic, security, and integrations.	Microsoft Power Platform
A set of records used to store data.	Entities

Box 1: Microsoft Power Platform

Power Platform combines the robust power of PowerApps, PowerBI, and Microsoft Flow into one powerful business application platform - providing quick and easy app building and data insights. Each component of the Microsoft Power Platform is built on the Common Data Service for Apps. Each component is dynamic by itself, but brilliant and masterful when combined.

The Microsoft Power platform brings all your data together into a common data model.

Box 2: Entities

An entity is a set of records used to store data, similar to how a table stores data within a database.
