

Certification JN0-351 Cost, Latest Braindumps JN0-351 Book

www.NWExam.com
Get complete detail on JN0-351 exam guide to crack Enterprise Routing and Switching Specialist. You can collect all information on JN0-351 tutorial, practice test, books, study material, exam questions, and syllabus. Firm your knowledge on Enterprise Routing and Switching Specialist and get ready to crack JN0-351 certification. Explore all information on JN0-351 exam with number of questions, passing percentage and time duration to complete test.

P.S. Free 2026 Juniper JN0-351 dumps are available on Google Drive shared by PrepAwayETE: https://drive.google.com/open?id=1Qyg6TqdHRjX_kbvaRVsM4O2M7z6fZyzY

You must want to know your scores after finishing exercising our JN0-351 study materials, which help you judge your revision. Now, our windows software and online test engine of the JN0-351 study materials can meet your requirements. You can choose from two modules: virtual exam and practice exam. Then you are required to answer every question of the JN0-351 Study Materials. In order to make sure you have answered all questions, we have answer list to help you check.

You may be busy in your jobs, learning or family lives and can't get around to preparing and takes the certificate exams but on the other side you urgently need some useful JN0-351 certificates to improve your abilities in some areas. So is there a solution which can kill two birds with one stone to both make you get the certificate and spend little time and energy to prepare for the exam? Our JN0-351 study materials provide a variety of functions to help the clients improve their learning. For example, the function to stimulate the exam helps the clients test their learning results of the JN0-351 study materials in an environment which is highly similar to the real exam.

Latest Braindumps JN0-351 Book & Visual JN0-351 Cert Exam

Our JN0-351 study materials have a high quality which is mainly reflected in the pass rate. Our product can promise a higher pass rate than other study materials. 99% people who have used our JN0-351 study materials passed their exam and got their certificate successfully, it is no doubt that it means our JN0-351 Study Materials have a 99% pass rate. So our product will be a very good

choice for you. If you are anxious about whether you can pass your exam and get the certificate, we think you need to buy our JN0-351 study materials as your study tool, our product will lend you a good helping hand.

Juniper JN0-351 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• BGP: This topic focuses on the operational and conceptual elements of BGP, a cornerstone in enterprise networks.
Topic 2	<ul style="list-style-type: none">• Spanning Tree: Networking professionals explore the principles and advantages of the Spanning Tree Protocol (STP) to ensure loop-free topologies in Layer 2 networks.
Topic 3	<ul style="list-style-type: none">• Protocol Independent Routing: An essential domain for understanding routing components outside protocol dependencies, this topic enhances expertise in configuring, monitoring, and troubleshooting critical elements.
Topic 4	<ul style="list-style-type: none">• Layer 2 Switching or VLANs: This topic deepens the understanding of Layer 2 switching operations within the Junos OS, including VLAN concepts and benefits. Experienced networking professionals gain insights into configuration, monitoring, and troubleshooting techniques essential for network segmentation and efficiency.
Topic 5	<ul style="list-style-type: none">• OSPF: The concepts and operational details of OSPF are explored, providing tools for routing efficiency. Configuration and troubleshooting mastery ensure readiness for both the exam and complex enterprise environments.
Topic 6	<ul style="list-style-type: none">• IS-IS: Aspiring Juniper networking professionals enhance their understanding of IS-IS routing protocols. This topic equips candidates with the knowledge to configure and monitor IS-IS systems, addressing specific exam challenges and practical applications.
Topic 7	<ul style="list-style-type: none">• Tunnels: The fundamentals of IP tunneling are emphasized, highlighting their requirements and functionalities. Mastery in configuring, monitoring, and troubleshooting tunnels equips professionals to meet the demands of the JN0-351 Exam.
Topic 8	<ul style="list-style-type: none">• Layer 2 Security: This topic introduces Layer 2 protection mechanisms and firewall filters to fortify network security. Practical skills in configuring, monitoring, and troubleshooting these features prepare candidates to address exam objectives and real-world challenges effectively.

Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q27-Q32):

NEW QUESTION # 27

You have deployed a Juniper EX Series switch in the network. The switch receives a unicast frame destined to a MAC address that is not registered in the bridging table.

Which statement describes the behavior of the switch?

- A. The frame is flooded out all ports that are part of the same VLAN, except the receiving port.
- B. The frame is flooded out all ports in all VLANs configured on the switch.
- C. The switch sends an error message to the sender declaring that the host is unreachable.
- D. The switch performs an ARP request to discover the MAC address of the destination host.

Answer: A

Explanation:

According to the Juniper documentation¹, when a switch receives a unicast frame destined to a MAC address that is not registered in the bridging table, it floods the frame out all ports that are part of the same VLAN, except the receiving port. This is the default behavior of a switch when it does not know the destination MAC address. The switch does not perform an ARP request, send an error message, or flood the frame to all VLANs. References: Understanding Unicast Flooding | Junos OS | Juniper Networks

NEW QUESTION # 28

What does the * indicate in the output shown in the exhibit?

```
{master: 0}
user@switch> show vlans brief
Routing instance      VLAN name      Tag      Interfaces
default-switch      default        1
                                                              ge-0/0/0.0*
                                                              ge-0/0/1.0*
                                                              ge-0/0/2.0*
                                                              ge-0/0/3.0*
                                                              ge-0/0/4.0*
                                                              ge-0/0/5.0*
```

- A. The interface is active.
- B. The interface is down.
- C. All interfaces have elected a root bridge.
- D. The switch ports have a router attached.

Answer: A

Explanation:

The exhibit shows the output of the command show vlans brief, which displays brief information about VLANs and their associated interfaces.

The output has four columns: Routing instance, VLAN name, Interfaces, and Tagging. The * symbol indicates that the interface is active, meaning that it is up and forwarding traffic. This can be verified by the command show interfaces terse, which displays the status of the interfaces.

NEW QUESTION # 29

What are two characteristics of RSTP alternate ports? (Choose two.)

- A. RSTP alternate ports provide an alternate higher cost path to the root bridge.
- B. RSTP alternate ports block traffic while receiving superior BPDUs from a neighboring switch.
- C. RSTP alternate ports provide an alternate lower cost path to the root bridge.
- D. RSTP alternate ports are active ports used to forward frames toward the root bridge.

Answer: A,B

Explanation:

A is correct because RSTP alternate ports block traffic while receiving superior BPDUs from a neighboring switch. An alternate port is a backup port for a root port, which means it receives better BPDUs from another bridge than the current root port¹. However, an alternate port does not forward any traffic, as it is in a discarding state². It only listens to BPDUs and waits for the root port to fail. If the root port fails, the alternate port can immediately transition to a forwarding state and become the new root port¹.

C is correct because RSTP alternate ports provide an alternate higher cost path to the root bridge. An alternate port is selected based on the same criteria as the root port, which are the lowest bridge ID, the lowest path cost, the lowest sender port ID, and the lowest receiver port ID³. However, an alternate port receives a higher cost BPDU than the root port, otherwise it would be the root port itself¹. Therefore, an alternate port provides an alternate higher cost path to the root bridge than the root port.

NEW QUESTION # 30

A new network requires multiple topology support. You decide to use IS-IS in this situation. Which three protocol topologies are supported in this scenario? (Choose three.)

- A. IPv6
- B. IPsec
- C. anycast
- D. multicast
- E. IPv4

Answer: A,D,E

Explanation:

IS-IS (Intermediate System to Intermediate System) is a routing protocol that is designed to move information efficiently within a computer network. It supports multiple protocol topologies, including IPv4, IPv6, and multicast.

NEW QUESTION # 31

You are asked to change the setting for the LSAs age out back to the default value. In this scenario, which time interval will accomplish this task?

- A. 300 seconds
- B. 1800 seconds
- C. 600 seconds
- D. 3600 seconds

Answer: D

NEW QUESTION # 32

.....

Generally speaking, you can achieve your basic goal within a week with our Enterprise Routing and Switching, Specialist (JNCIS-ENT) JN0-351 study guide. Besides, for new updates happened in this line, our experts continuously bring out new ideas in this Juniper JN0-351 Exam for you. The new supplemental updates will be sent to your mailbox if there is and be free.
