Qlik QSSA2021 Valid Test Dumps - Test QSSA2021 Engine

You may doubt about such an amazing data of our pass rate on our QSSA2021 learning prep, which is unimaginable in this industry. But our QSSA2021 exam questions have made it. You can imagine how much efforts we put into and how much we attach importance to the performance of our QSSA2021 Study Guide. We use the 99% pass rate to prove that our QSSA2021 practice materials have the power to help you go through the exam and achieve your dream.

Qlik Sense System Administrator Certification Exam - February 2021 Release Sample Questions (Q132-Q137):

NEW QUESTION # 132

Imagine a single server environment that has all services running. At some point users report that applications are very slow, all of them. The system administrator works remotely on support and realizes that there is actually a problem occurring.

Due to performance issues, the system administrator has difficulties accessing the QMC. Additionally you receive an email stating that the server's memory ram has reached its limit.

What step can the system administrator take to check what is happening in the environment?

- A. Send a request via API at <https://<server.domain.com>/engine/healthcheck>
- **B. Inspect logs in %ProgramData%\Qlik\Sense\Log\Engine**
- C. Send a request via API at <http://<server.domain.com>/engine/performancecheck>
- D. Access <https://<server.domain.com>/qmc/audit>

Answer: B

NEW QUESTION # 133

What is the primary purpose of load balancing rules in Qlik Sense?

- A. To allocate memory across multiple tasks
- B. To manage data flow between different Qlik applications
- C. To prioritize certain tasks during peak traffic
- **D. To distribute reload tasks and app sessions across multiple nodes**

Answer: D

NEW QUESTION # 134

A system administrator needs to monitor the availability of Qlik Sense services.

Which of the following tools can be used to check the status of Qlik Sense services?

- A. Qlik Sense Hub
- B. License Monitor
- **C. Windows Services**
- D. Log Monitor

Answer: C

NEW QUESTION # 135

A Qlik Sense Enterprise environment has been installed. Users mentioned that when they access the site there is information that the page is unsecure and something more related to the certificate.

Then the system administrator tests the site inside the server and does not notice the same problem. It makes contact with the IT team and performs some activities:

make sure that there is a certificate on the server (MMC), creates an easier access address (URL) to the site, opens all the necessary communication ports, adds the address to the trusted websites of the browsers of different machines and devices, and even installs OpenSSL. The problem remains.

What should be done to solve the problem?

- **A. - Acquire a third-party certificate from a trusted root certificate authority (CA)**

- B. 1. Acquire a third-party certificate from a trusted root certificate authority (CA) including private key
- C. - Acquire a third-party certificate from a trusted root certificate authority (CA)
- D. - Generate a certificate valid by OpenSSL

Answer: A

NEW QUESTION # 136

A system administrator adds RIM B to a two-node environment using the central node as the proxy. The system administrator is using the default virtual proxy for the central node to access the hub. The system administrator sets up a load balancing rule to have all apps served on both RIM A and RIM B.

The system administrator performs the following steps:

1. Disables the default load balancing rule, "ResourcesOnNonCentralNodes"
2. Creates a new rule with the Resource filter "App_*" and checks Load balancing
3. Sets the condition to ((node.name="RIM A" or node.name="RIM B"))

The rule is successfully verified. The system administrator has users log in to the hub and open apps to verify that they are opening on RIM B.

However, after multiple users open the same app, there is still NO report of activity on RIM B.

What is causing this issue?

- A. The filter should be ((node.name="RIM A") and (node.name="RIM B"))
- B. A network connection problem is occurring and the load balancing is NOT working
- **C. The RIM B Engine has NOT been added to the virtual proxy**
- D. There is a rule overlapping the custom load balancing rule

Answer: C

NEW QUESTION # 137

.....

Giving its customers real and updated Qlik Sense System Administrator Certification Exam - February 2021 Release (QSSA2021) questions is ITCertMagic's major objective. Another great advantage is the money-back promise according to terms and conditions. Download and start using our Qlik QSSA2021 Valid Dumps to pass the QSSA2021 certification exam on your first try.
