# Flexible PCI SSC QSA_New_V4 Learning Mode, Latest QSA_New_V4 Test Dumps

P.S. Free & New QSA_New_V4 dumps are available on Google Drive shared by ITPassLeader: https://drive.google.com/open?id=1-BbUN5wG2Ks2SAPCxsP30EddWPZE8ayx

Getting the PCI SSC QSA_New_V4 certification exam is necessary in order to get a job in your desired tech company. Success in the Qualified Security Assessor V4 Exam (QSA_New_V4) certification exam gives you an edge over the others because you will have certified skills. The PCI SSC QSA_New_V4 certification exam badge will make a good impression on the interviewer. Most of the people planning to attempt the QSA_New_V4 Exam are confused that how will they prepare and pass QSA_New_V4 exam with good grades. Many don't find real QSA_New_V4 exam questions and face loss of money and time.

PCI SSC QSA_New_V4 Exam Syllabus Topics:

Topic	Details
Topic 1	• PCI DSS Testing Procedures: This section of the exam measures the skills of PCI Compliance Auditors and covers the testing procedures required to assess compliance with the Payment Card Industry Data Security Standard (PCI DSS). Candidates must understand how to evaluate security controls, identify vulnerabilities, and ensure that organizations meet compliance requirements. One key skill evaluated is assessing security measures against PCI DSS standards.
Topic 2	• Real-World Case Studies: This section of the exam measures the skills of Cybersecurity Consultants and involves analyzing real-world breaches, compliance failures, and best practices in PCI DSS implementation. Candidates must review case studies to understand practical applications of security standards and identify lessons learned. One key skill evaluated is applying PCI DSS principles to prevent security breaches.
Topic 3	• PCI Reporting Requirements: This section of the exam measures the skills of Risk Management Professionals and covers the reporting obligations associated with PCI DSS compliance. Candidates must be able to prepare and submit necessary documentation, such as Reports on Compliance (ROCs) and Self-Assessment Questionnaires (SAQs). One critical skill assessed is compiling and submitting accurate PCI compliance reports.

Topic 4	• PCI Validation Requirements: This section of the exam measures the skills of Compliance Analysts and evaluates the processes involved in validating PCI DSS compliance. Candidates must understand the different levels of merchant and service provider validation, including self-assessment questionnaires and external audits. One essential skill tested is determining the appropriate validation method based on business type.
Topic 5	• Payment Brand Specific Requirements: This section of the exam measures the skills of Payment Security Specialists and focuses on the unique security and compliance requirements set by different payment brands, such as Visa, Mastercard, and American Express. Candidates must be familiar with the specific mandates and expectations of each brand when handling cardholder data. One skill assessed is identifying brand-specific compliance variations.

Analyze Your Progress With Desktop QSA_New_V4 Practice Exam Software

Our company is professional brand established for compiling QSA_New_V4 exam materials for candidates, and we aim to help you to pass the examination as well as getting the related certification in a more efficient and easier way. Owing to the superior quality and reasonable price of our QSA_New_V4 Exam Materials, our company has become a top-notch one in the international market. Our QSA_New_V4 exam torrents are not only superior in price than other makers in the international field, but also are distinctly superior in the following respects.

PCI SSC Qualified Security Assessor V4 Exam Sample Questions (Q25-Q30):

NEW QUESTION # 25
What process is required by PCI DSS for protecting card-reading devices at the point-of-sale?

- A. Devices are physically destroyed if there is suspicion of compromise.
- B. Device identifiers and security labels are periodically replaced.
- C. The serial number of each device is periodically verified with the device manufacturer.
- D. Devices are periodically inspected to detect unauthorized card skimmers.

Answer: D

Explanation:
Requirement 9.9.2 of PCI DSS v4.0.1 mandates that entities regularly inspect POS devices to detect signs of tampering or skimming. This includes physical inspections to identify unexpected additions, unauthorized stickers, broken seals, etc.
* Option A: Correct. Regular inspection for skimming/tampering is required.
* Option B: Incorrect. There is no mandate for manufacturer serial number verification.
* Option C: Incorrect. PCI DSS does not require routine replacement of device identifiers or labels.
* Option D: Incorrect. Devices may be investigated if compromised, but not necessarily destroyed.
Reference: PCI DSS v4.0.1 - Requirement 9.9.2.

NEW QUESTION # 26
An entity wants to use the Customized Approach. They are unsure how to complete the Controls Matrix or TRA. During the assessment, you spend time completing the Controls Matrix and the TRA, while also ensuring that the customized control is implemented securely. Which of the following statements is true?

- A. You can assess the customized control, but another assessor must verify that you completed the TRA correctly.
- B. You must document the work on the customized control in the ROC, but you can not assess the control or the documentation.
- C. Assessors are not allowed to assist an entity with the completion of the Controls Matrix or the TRA.
- D. You can assess the customized control and verify that the customized approach was correctly followed, but you must document this in the ROC.

Answer: D

Explanation:
Customized Approach Overview:
* Under PCI DSS v4.0, entities can use a Customized Approach to meet requirements by implementing controls tailored to their environment. This allows flexibility while still achieving the intent of the security requirement.
Role of Assessors:
* Assessors (QSAs) are responsible for evaluating both the implementation of customized controls and ensuring these controls fulfill the security objectives of the PCI DSS requirements.
* QSAs must document the evaluation, evidence reviewed, and results in the Report on Compliance (ROC).
Controls Matrix and Targeted Risk Analysis (TRA):
* The Controls Matrix and TRA are key components of the Customized Approach. QSAs assist in verifying the accuracy and completeness of these tools during assessments.
Documenting in the ROC:
* The ROC must include a narrative explaining the assessor's findings regarding the customized control, validation methods, and any evidence collected.
Relevant PCI DSS v4.0 Guidance:
* Appendix D and E of the PCI DSS v4.0 ROC Template emphasize that QSAs can evaluate and confirm adherence to the Customized Approach provided this is documented comprehensively in the ROC.

NEW QUESTION # 27
Which scenario meets PCI DSS requirements for critical systems to have correct and consistent time?

- A. Each Internal system Is configured to be Its own time server.
- B. Access to time configuration settings is available to all users of the system.
- C. Central time servers receive time signals from specific, approved external sources.
- D. Each internal system peers directly with an external source to ensure accuracy of time updates.

Answer: C

Explanation:
Time Synchronization Standards:
* PCI DSS Requirement 10.4 mandates that all critical systems use a centralized time server to ensure time accuracy across systems. Approved external sources provide a reliable and consistent time signal.
Correctness and Consistency of Time:
* Using a central time server ensures uniformity of timestamps, which is critical for forensic analysis, log correlation, and monitoring activities.
Invalid Options:
* A: Internal systems acting as their own servers could lead to inconsistent timestamps.
* B: Allowing all users access to time settings poses a security risk.
* D: Peering directly with external sources bypasses centralized control, violating consistency requirements.

NEW QUESTION # 28
Which statement about PAN is true?

- A. It does not require protection for transmission over public wired networks.
- B. It must be protected with strong cryptography tor transmission over private wired networks.
- C. It must be protected with strong cryptography for transmission over private wireless networks.
- D. It does not require protection for transmission over public wireless networks.

Answer: C

Explanation:
PAN Transmission Protection
* PCI DSS Requirement 4.1 mandates strong cryptography for PAN during transmission over both public and private wireless networks to prevent unauthorized interception.
Incorrect Options
* Options B and D: PAN protection is not required for private wired networks.
* Option C: PAN must be protected during transmission over public wireless networks.

NEW QUESTION # 29

Which of the following meets the definition of "quarterly" as indicated in the description of timeframes used in PCI DSS requirements?

- A. On the 1st of each fourth month.
- B. At least once every 95-97 days.
- C. Occurring at some point in each quarter of a year.
- D. On the 15th of each third month.

Answer: C

Explanation:

According toSection 7 - Description of Timeframes Used in PCI DSS Requirements, the PCI DSS defines
"quarterly" as:
"An activity performed once per calendar quarter (i.e., one time in each three-month period), or as close as reasonably possible to the calendar quarter."
* Option A:#Correct. This aligns precisely with PCI DSS's definition -once in each three-month calendar quarter.
* Option B:#Incorrect. PCI DSS doesnotdefine quarterly by a fixed number of days.
* Option C & D:#Incorrect. Specific dates or months are not prescribed.

NEW QUESTION # 30

......

The PCI SSC QSA_New_V4 test materials are mainly through three learning modes, Pdf, Online and software respectively. The QSA_New_V4 test materials have a biggest advantage that is different from some online learning platform which has using terminal number limitation, the Qualified Security Assessor V4 Exam QSA_New_V4 Quiz torrent can meet the client to log in to learn more, at the same time, the user can be conducted on multiple computers online learning, greatly reducing the time, and people can use the machine online of Qualified Security Assessor V4 Exam QSA_New_V4 test prep more conveniently at the same time.
