

H19-308_V4.0 Download, Exam H19-308_V4.0 Torrent

P.S. Free & New H19-308_V4.0 dumps are available on Google Drive shared by BootcampPDF: https://drive.google.com/open?id=1IdgEqAS_aNvrDxt3VVHM5BvC5HUQu9y

We develop many reliable customers with our high quality H19-308_V4.0 prep guide. When they need the similar exam materials and they place the second even the third order because they are inclining to our H19-308_V4.0 study braindumps in preference to almost any other. Compared with those uninformed exam candidates who do not have effective preparing guide like our H19-308_V4.0 study braindumps, you have already won than them. Among wide array of choices, our products are absolutely perfect. Besides, from economic perspective, our H19-308_V4.0 Real Questions are priced reasonably so we made a balance between delivering satisfaction to customers and doing our own jobs. So in this critical moment, our H19-308_V4.0 prep guide will make you satisfied.

Huawei H19-308_V4.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• OceanStor New Hybrid Flash Storage: OceanStor Hybrid Flash combines flash and disk storage to balance performance and cost-effectiveness. This architecture optimizes resources by placing performance-sensitive data on flash and capacity-oriented data on disk.
Topic 2	<ul style="list-style-type: none">• Object Storage Basis: Object storage manages data as discrete units with metadata and unique identifiers for efficient retrieval. This scalable architecture suits unstructured data, cloud applications, and big data analytics requiring massive capacity.
Topic 3	<ul style="list-style-type: none">• Backup and Disaster Recovery: Backup and disaster recovery strategies protect organizations from data loss through redundant copies of critical information. Comprehensive backup solutions ensure business continuity and enable rapid recovery to minimize downtime.
Topic 4	<ul style="list-style-type: none">• OceanProtect Backup Storage: OceanProtect offers comprehensive data protection with efficient backup, recovery, and retention features. This solution ensures security through encryption and deduplication while reducing storage costs.
Topic 5	<ul style="list-style-type: none">• OceanStor Pacific: OceanStor Pacific is Huawei's distributed storage for massive-scale data management and cloud-native applications. It provides scalability, resilience, and performance for big data, AI workloads, and large-scale storage.
Topic 6	<ul style="list-style-type: none">• NAS Storage Basis: Network-Attached Storage delivers file-level storage over standard networks, accessible to multiple users simultaneously. NAS systems offer cost-effective solutions for file sharing, collaboration, and centralized data management.

Exam H19-308_V4.0 Torrent | H19-308_V4.0 Certification Exam Dumps

Despite the complex technical concepts, our H19-308_V4.0 exam questions have been simplified to the level of average candidates, posing no hurdles in understanding the various ideas. It is also the reason that our H19-308_V4.0 study guide is famous all over the world. We also have tens of thousands of our loyal customers who support us on the H19-308_V4.0 Learning Materials. Just look at the feedbacks on our website, they all praised our H19-308_V4.0 practice engine.

Huawei HCSA-Presales-Storage V4.0 Sample Questions (Q336-Q341):

NEW QUESTION # 336

Which of the following technologies are used in the OceanProtect ransomware protection solution to prevent data tampering and deletion? (Choose all that apply.)

- A. Secure snapshot
- B. WORM
- C. Air Gap
- D. Detection and analysis

Answer: A,B,C

Explanation:

The OceanProtect ransomware protection solution uses WORM (Write Once Read Many), secure snapshot, and Air Gap technologies to prevent data tampering and deletion, ensuring the integrity and safety of backup data. Detection and analysis focus on identifying threats, not preventing tampering or deletion.

NEW QUESTION # 337

If a customer has high requirements on service continuity (RPO = 0 and RTO as small as possible), which of the following DR solutions can be recommended to the customer?

- A. Active-passive DR data center solution
- B. Active-active data center solution
- C. Geo-redundant 3DC DR solution

Answer: B

Explanation:

An active-active data center solution is designed to provide the highest level of service continuity, meeting requirements for RPO (Recovery Point Objective) = 0 and a minimal RTO (Recovery Time Objective). In an active-active setup, both data centers operate simultaneously and continuously sync data, ensuring no data loss (RPO = 0) and near-instant recovery (low RTO). The other options do not guarantee an RPO of 0, as they typically involve a delay in synchronization or failover processes.

NEW QUESTION # 338

Dorado V3 supports adjusting the LUN granularity based on applications.

- A. FALSE
- B. TRUE

Answer: B

NEW QUESTION # 339

Which of the following components are included in a backup system? (Choose all that apply.)

- A. Backup media
- B. Backup policy
- C. Backup software
- D. Backup server

Answer: A,B,C,D

Explanation:

A complete backup system consists of backup media, a backup server, backup software, and defined backup policies to govern how data is protected and managed.

NEW QUESTION # 340

A customer wants to purchase an object storage system to be used by different departments. These departments are independent of each other and cannot access each other's data. Therefore, the data capacity of different departments needs to be limited. Which of the following object storage features will you recommend to the customer? (Select all that apply)

- A. Replication
- B. WORM
- C. Multi-tenancy
- D. Quota

Answer: C,D

Explanation:

To meet the customer's requirement for departmental isolation and resource control, Huawei recommends the combination of Multi-tenancy (Option C) and Quotas (Option D). Multi-tenancy is the foundational feature for isolation in Huawei object storage. It allows the physical storage system to be logically partitioned into multiple "Tenants". Each department can be assigned its own tenant environment with its own set of users, access keys, and buckets. Data is logically isolated, meaning one department cannot see or access the data of another unless explicitly permitted.

Quota management is then used to limit the capacity consumed by each department. In Huawei OceanStor Pacific, quotas can be applied at the Tenant level or the Bucket level. By setting a Tenant Quota, the administrator ensures that a specific department does not exceed its allocated budget of storage space, preventing one department from exhausting the resources of the entire system. While Replication (Option A) and WORM (Option B) are valuable for data protection, they do not address the specific needs of departmental isolation and capacity limiting.

NEW QUESTION # 341

.....

Choosing right study materials is key point to pass the Huawei certification exam. BootcampPDF is equipped with the latest questions and valid answers to ensure the preparation of H19-308_V4.0 exam easier. The feedback from our candidates showed that our H19-308_V4.0 Dumps PDF covers almost 90% questions in the actual test. So put our dumps to your shopping cart quickly.
