Wherever you are in the world we will provide you with the most useful and effectively 1Y0-205 guide torrent in this website, which will help you to pass the exam as well as getting the related certification with a great ease.

Citrix Virtual Apps and Desktops Administration Sample Questions (Q58-Q63):

NEW QUESTION # 58

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a large number of Windows users running various locally attached client printers. No network printers are being used. The administrator has enabled the HDX printer mapping policy to 'Auto-create all client printers', which has resulted in a large number of drivers being loaded onto the Virtual Delivery Agent (VDA) machines. New standards are requiring the administrator to limit these Windows drivers on the VDA machines. Which printing feature can the administrator enable to meet the new standards?

- A. The Auto-create local (non-network) client printers only policy
- **B. The Citrix Universal Printer Driver**
- C. The Citrix Universal Print Server
- D. The Auto-create PDF universal printer policy

Answer: B

Explanation:

Enabling the Citrix Universal Printer Driver allows client printers to be auto-created without requiring individual printer drivers to be installed on the VDA machines. This standardizes printing, reduces driver sprawl, and meets compliance requirements by minimizing the number of Windows drivers on the VDAs.

NEW QUESTION # 59

Which components should be defined with the Resource Layer? (Choose three.)

- A. Citrix Virtual Apps and Desktop Sites
- B. StoreFront Stores
- C. Host Connections
- D. Citrix Virtual Apps and Desktop Zones
- E. NetScaler Gateway
- F. Virtual Delivery Agents
- G. Personalization settings
- H. Images

Answer: C,F,H

Explanation:

The Resource Layer in Citrix Virtual Apps and Desktops defines the components that provide compute and application resources to users. This includes Virtual Delivery Agents (VDAs) that deliver apps and desktops, host connections to the underlying hypervisor or cloud, and images that serve as the basis for machine provisioning.

NEW QUESTION # 60

Scenario: While using Citrix Studio to create a new Delivery Group, a Citrix Administrator does NOT see any machine catalogs listed, but does see an error message. The administrator successfully verified the presence of machine catalogs in the Machine Catalogs node of Citrix Studio. Which issue can cause this to happen?

- A. The administrator has insufficient permissions to create the Delivery Group.
- B. There are no unassigned machine catalog machines.
- C. The Virtual Delivery Agent (VDA) version is lower than 7.15 LTSR.
- D. No machine catalog machines have been started.

Answer: B

Explanation:

When creating a Delivery Group, Citrix Studio only displays machine catalogs that contain unassigned machines. If all machines in the catalog are already assigned, the catalog will not appear in the Delivery Group creation wizard, even though it is visible under the Machine Catalogs node.

NEW QUESTION # 61

After creating a new machine catalog using the Machine Creation Services (MCS) wizard in Citrix Studio, a Citrix Administrator determines that Windows activation fails for all new machines in that catalog.

Which two conditions can cause this to happen? (Choose two.)

- A. The version of Windows installed is Windows Server 2012 R2.
- B. The base image rearm count has been exceeded.
- C. The version of Windows installed uses Multiple Activation Key (MAK) licensing.
- D. The Microsoft License Server is unreachable.

Answer: B,C

Explanation:

Rearm count exceeded: If the base image has been sysprepped too many times, the rearm count may be exhausted, preventing Windows activation on cloned machines.

MAK licensing: MCS-provisioned machines are treated as newly deployed instances. MAK licensing is not suitable for this scenario because each clone would require its own activation, leading to failures.

NEW QUESTION # 62

A Citrix Administrator needs to create custom Filters within Citrix Director to better monitor the infrastructure. Which three values can the administrator choose to create the custom filters? (Choose three.)

- A. Sessions
- B. Desktops
- C. Users
- D. Connections
- E. Machines

Answer: A,C,E

Explanation:

In Citrix Director, administrators can create custom filters based on Users, Machines, and Sessions. These filters allow targeted monitoring and troubleshooting of specific areas within the Citrix environment.

NEW QUESTION # 63

.....

It's crucial to have reliable Citrix 1Y0-205 exam questions and practice test to prepare for the 1Y0-205 Exam. Test4Cram offers real Citrix 1Y0-205 exam questions with accurate answers in our 1Y0-205 practice exam format. Our 1Y0-205 Practice Questions and answers resemble the actual Citrix 1Y0-205 questions, and they have been verified by experts to ensure your success in the Citrix Virtual Apps and Desktops Administration Exam with ease.
