

# EAEP2201 Latest Braindumps Pdf - Reliable EAEP2201 Test Online

## valid EAEP2201 Enterprise Administration Professional 2201 Practice Course

Please Get the Link of the Exam to proceed further - <https://www.educationry.com/?product=pass-eaep2201-enterprise-administration-professional-2201-certification-exam-educationry>

Most effective these exam dumps are routinely updated with usually precise and most current material by profoundly talented authorities, that have obtained authentication in their absolute very first attempt. Whenever you get your hands around the most current exam dumps preparation supply, then, at that point, you don't need to pressure over alluding to distinctive sources. These correct exam dumps pdf cover just about every single prospectus of this exam. You must merely concentrate on these exam questions cautiously and comprehend them well.

Using the assistance with the exam dumps you can quickly release your stress more than your exam readiness due to the deficiency. Prepare on time and get genuine exam dumps for efficient preparation. Get the additional weight due to the fact of it, you can get the itemized this exam questions connected along with your affirmation. These precise exams supply you using a belief of how to plan for the exam successfully. The genuine exams intended for operating on the expert abilities of the contender for the exam certification dumps who want to be able to cope with just about every one of the concerns impeccably.

Get prepared by means of the updated exam, you find out using the most current innovations, and any time you program by the most recent exam dumps 2022, you comprehend its significance and also the advantages in the executions. The part of the veritable exam dumps is coordinated appropriately by the endeavors of our topic matter experts. Carve out opportunities to perform it appropriately and afterward, you receive the greatest outcomes in your exam conclusion. Make your preparation in advance by taking the exam dumps.

Choose the major excellent exam dumps for the preparation of the exam which are checked by the exam dumps. The greatest exam questions and answers are finished by the precise exam dumps that happen to be in your schedule. Get ready with a compelling exam dumps pdf then you definitely will truly like to answer 90% from the exam certification dumps ideal. The fundamentals of the certified exam are investigated by professionals, so our refreshed exam questions will construct your capacity of inventiveness.

In the past ten years, our company has never stopped improving the EAEP2201 exam cram. For a long time, we have invested much money to perfect our products. At the same time, we have introduced the most advanced technology and researchers to perfect our EAEP2201 exam questions. At present, the overall strength of our company is much stronger than before. We are the leader in the market and master the most advanced technology. In fact, our EAEP2201 Test Guide has occupied large market shares because of our consistent renovating. We have built a powerful research center and owned a strong team. Up to now, we have got a lot of patents about the EAEP2201 test guide. In the future, we will continuously invest more money on researching.

The EAEP2201 Certification Exam is intended for GIS administrators, database administrators, system administrators, and other IT professionals who are responsible for deploying and maintaining GIS systems. It is also suitable for GIS analysts who want to advance their careers by proving their expertise in GIS administration.

Esri EAEP2201 (Enterprise Administration Professional 2201) Certification Exam is a professional certification that is designed to validate the knowledge and skills of individuals who are responsible for the administration of Esri's ArcGIS Enterprise software. Enterprise Administration Professional 2201 certification exam tests the knowledge and skills required to manage an ArcGIS Enterprise deployment, including the installation, configuration, and maintenance of the software.

**Reliable EAEP2201 Test Online, EAEP2201 Valid Exam Forum**

The above formats of PrepAwayTest are made to help customers prepare as per their unique styles and crack the Enterprise Administration Professional 2201 (EAEP2201) exam certification on the very first attempt. Our Enterprise Administration Professional 2201 (EAEP2201) questions product is getting updated regularly as per the original Enterprise Administration Professional 2201 (EAEP2201) practice test's content. So that customers can prepare according to the latest Enterprise Administration Professional 2201 (EAEP2201) exam content and pass it with ease.

Esri is a leading provider of Geographic Information System (GIS) software, which is used by millions of people around the world to make informed decisions about the world around them. To ensure that its users have the skills and knowledge necessary to work with its software, Esri offers a range of certification exams, including the Esri EAEP2201 (Enterprise Administration Professional 2201) Certification Exam.

## Esri Enterprise Administration Professional 2201 Sample Questions (Q65-Q70):

### NEW QUESTION # 65

An organization is implementing a disaster recovery strategy for an ArcGIS Enterprise deployment for custom cached basemaps. Which action should the organization perform?

- A. Run the webgisdr disaster recovery utility tool
- B. Use the ArcGIS Data Store backup utility
- C. Make backup copies of all cache folder directories

**Answer: C**

Explanation:

Custom cached basemaps are stored as tile cache files on disk and are not included in backups created by the webgisdr tool or the ArcGIS Data Store backup utility. Therefore, to ensure these basemaps can be restored in the event of a disaster, it's essential to manually back up the cache directories where these tiles are stored.

This involves copying the cache folders to a secure backup location and ensuring they are kept in sync with any updates made to the basemaps.

The webgisdr tool (Option A) is used for backing up and restoring the ArcGIS Enterprise configuration and content but does not include custom tile caches. The ArcGIS Data Store backup utility (Option C) is used for backing up hosted feature layers and other data managed by the ArcGIS Data Store, not custom cached basemaps.

### NEW QUESTION # 66

A GIS administrator receives reports from users about a map service that is slow to draw. The service has the following characteristics:

- \* Numerous detailed features
- \* Complex symbology
- \* Scale-dependent rendering
- \* Infrequently updated
- \* Query capability enabled
- \* Uses shared instances

Which action should the administrator perform?

- A. Configure the map service to use cached tiles
- B. Use dedicated instances instead of shared instances
- C. Eliminate scale-dependent rendering

**Answer: A**

Explanation:

For map services that are infrequently updated and contain numerous detailed features with complex symbology, configuring the service to use cached tiles is the most effective way to improve drawing performance. Cached map services pre-render map images at various scales and store them, allowing for faster display to users. This approach is particularly beneficial when the data does not change frequently, as it reduces the server's processing load during user interactions.

Eliminating scale-dependent rendering (Option B) may lead to performance degradation, as it could result in rendering all features at all scales, increasing the amount of data processed and displayed unnecessarily.

Switching to dedicated instances (Option C) can improve performance in some scenarios, but it also increases resource usage on the

server. Given that the service is infrequently updated and the primary concern is drawing performance, caching is the more efficient and scalable solution.

Reference Source: ArcGIS Enterprise documentation on optimizing map services for performance.

#### NEW QUESTION # 67

Some members of an ArcGIS Enterprise organization are unable to create web maps and web scenes. The users are only responsible for creating stories with ArcGIS StoryMaps.

What should the GIS administrator do to prevent confusion about non-accessible functionality to those users?

- A. Configure a maintenance notification to explain the access limitation in Portal for ArcGIS
- B. **Configure the ArcGIS Enterprise home page to show only items that are accessible to the signed-in user**
- C. Configure Page visibility settings to remove web maps and web scenes from the navigation bar

**Answer: B**

Explanation:

To prevent confusion among users who do not have access to certain functionalities, such as creating web maps and web scenes, the GIS administrator should configure the ArcGIS Enterprise home page to display only the items and tools that are accessible to the signed-in user. This customization ensures that users see a tailored interface that aligns with their permissions and responsibilities, reducing the likelihood of encountering inaccessible options.

Configuring a maintenance notification (Option A) is more appropriate for temporary service outages or updates, not for managing user interface elements. Adjusting Pagevisibility settings (Option B) affects the visibility of entire pages but does not provide the granular control needed to tailor the home page based on user roles and permissions.

Reference Source: ArcGIS Enterprise documentation on customizing the home page and user experience

#### NEW QUESTION # 68

A GIS administrator has a group of users who share maintenance responsibilities for a critical application.

The administrator needs to allow all users to edit the application without transferring ownership.

Which option should the administrator use?

- A. A public group
- B. **A shared update group**
- C. An administrative group
- D. A collaboration group

**Answer: B**

Explanation:

A shared update group allows group members to edit each other's items without needing to transfer ownership. This is ideal for collaborative editing and shared responsibility for applications, maps, or dashboards.

From Esri documentation:

"Shared update groups allow multiple members to update items shared with the group, even if they do not own the items."

\* Option B doesn't exist as a group type in ArcGIS Enterprise.

\* Option C allows viewing, but not editing others' content.

\* Option D applies to distributed collaboration, not shared editing.

Reference: ArcGIS Enterprise - Group Settings for Collaborative Management

#### NEW QUESTION # 69

A GIS analyst is running raster analysis in the ArcGIS Enterprise portal Map Viewer. The input data is an image layer, but the output of the raster analysis is a feature layer.

Which ArcGIS Server will host the output feature service?

- A. **ArcGIS Hosting Server site**
- B. ArcGIS Raster Analytics Server site
- C. ArcGIS Image Hosting Server site

**Answer: A**

### Explanation:

In ArcGIS Enterprise, when performing raster analysis that results in feature data (e.g., vector outputs), the ArcGIS Hosting Server is responsible for hosting the resulting feature services. The Raster Analytics Server processes the raster data, and the output is then stored in the ArcGIS Data Store associated with the Hosting Server, which subsequently serves the feature layer.

The Image Hosting Server is primarily used for hosting large imagery datasets and does not handle feature services. The Raster Analytics Server conducts the analysis but does not host the output services.
