Pass Guaranteed Quiz SAP - Updated C-TS422-2023 Reliable Exam Camp

The third format is desktop C-TS422-2023 practice exam software that can be accessed easily after installing it on your Windows PC or Laptop. These formats are there so that the students can use them as per their unique needs and prepare successfully for C-TS422-2023 the on first try. The C-TS422-2023 mock tests are specially built for you to evaluate what you have studied. These SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C-TS422-2023) practice exams (desktop and web-based) are customizable, which means that you can change the time and questions according to your needs. Our C-TS422-2023 practice tests teach you time management so you can pass the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C-TS422-2023) certification exam.

SAP C-TS422-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Demand Management in SAP S • 4HANA: This section covers a comparison of production methods in various manufacturing environments.
Topic 2	• Advanced Planning in SAP S • 4HANA: This section includes an overview of advanced planning fundamentals and master data. Explanation of key tools and processes. Discussion of planning evaluation concepts.
Topic 3	• Material Requirements Planning in SAP S • 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.
Topic 4	• Master Data in SAP S • 4HANA: This section covers the exploration of crucial production-related master data elements, with emphasis on bill of material, routing, and production version.

Topic 5	• Production Orders in SAP S • 4HANA: This section covers BOM item categorization, order status management, availability checks, routing selection, order type setup, and material handling processes.
Topic 6	• Introduction to SAP S • 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S • 4HANA, its main components, business applications, and user experience strategy.
Topic 7	• Capacity Planning in SAP S • 4HANA: This section covers a discussion of SAP S • 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.
Topic 8	• Managing Clean Core: This section covers the application of clean core principles to enhance business process agility, reduce adaptation efforts, and drive innovation in ERP systems.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q22-Q27):

NEW QUESTION # 22
You are trying to create a production order NO valid production version can be selected. What could be the reasons? Note: There are 2 correct answers to this question.

- A. NO production lines are assigned to the production versions.
- B. The order lot size is NOT within the validity range of a production version.
- C. All production versions for the material are locked.
- D. NO bills of material (BOMs) are assigned to the production versions.

Answer: B,C

NEW QUESTION # 23
What are the options if the Dispatched operation status is set for a production order operation? Note:
There are 2 correct answers to this question.

- A. You can reschedule the operation in the Manage Work Center Capacity app.
- B. You can reschedule the operation using infinite scheduling in a planning table.
- C. You can reschedule the operation using lead time scheduling.
- D. You can reschedule the operation using finite scheduling in a planning table.

Answer: A,D

NEW QUESTION # 24
For a production version to be valid consistent what requirements must be fulfilled? Note: There are 3 correct answers to this question.

- A. The consistency check must be performed.
- B. The assigned routing bill of material (BOM) must have the same validity period.
- C. The lot size range must be within the lot size range of the assigned routing.
- D. The assigned routing bill of material (BOM) must be valid in the entire validity period.
- E. The deletion flag must NOT be set for the bill of material (BOM) or the routing.

Answer: C,D,E

NEW QUESTION # 25
What are the prerequisites for a reporting point confirmation in repetitive manufacturing? Note: There are 2 correct answers to this question.

- A. Activating the reporting point backflush in the order dependent parameters
- B. Activating the reporting point backflush in the work centers
- C. Defining the relevant work centers in the routing
- D. Defining the operations as reporting points using the control key

Answer: D

NEW QUESTION # 26

Your project team decided to use a make-to-order planning strategy material in discrete manufacturing.
what is the impact of this decision?
Note: there are 2 correct answers to this question

- A. Storage Location MRP areas are required for sales-orders-specific stock.
- B. Both the reduction of make-to-order stock and requirements occur on delivery
- C. Sales orders have to be ATP-confirmed (available-to-promise) to saved.
- D. Net requirement calculation is carried out for every sales order individually.
- E. Production orders are created with sales order reference.

Answer: D,E

Explanation:

In make-to-order production, the production planning is initiated only when a sales order is received. The system does not perform a net requirements calculation between individual sales orders or with the make-to-stock warehouse stock1. Therefore, option B is correct. Additionally, production orders are created with sales order reference, which means that the costs and revenues of the sales order are settled at the end of the production process2. Therefore, option E is also correct. The other options are not valid for make-to-order production. Storage location MRP areas are not required for sales-order-specific stock, as the stock is managed at the sales order level3. The reduction of make-to-order stock and requirements does not occur on delivery, but on goods issue to the sales order1. Sales orders do not have to be ATP-confirmed to be saved, as the availability check is optional and can be performed later.
