- B. Select an appropriate access switch model based on whether PoE support is required and the number of access APs.
- C. When selecting a switch, you need to calculate the number of connected APs * AP power < the power the POE switch can provide. Therefore, you need to choose a POE switch with an appropriate power supply based on the specific model and number of APs.
- D. For medium-sized supermarkets and general education scenarios with large network scales, a stacked network is recommended for the access layer.
