Most effective these exam dumps are routinely updated with usually precise and most current material by profoundly talented authorities, that have obtained authentication in their absolute very first attempt. Whenever you get your hands around the most current exam dumps preparation supply, then, at that point, you don't need to pressure over alluding to distinctive sources. These correct exam dumps pdf cover just about every single prospectus of this exam. You must merely concentrate on these exam questions cautiously and comprehend them well.

Using the assistance with the exam dumps you can quickly release your stress more than your exam readiness due to the deficiency. Prepare on time and get genuine exam dumps for efficient preparation. Get the additional weight due to the fact of it, you can get the itemized this exam questions connected along with your affirmation. These precise exams supply you using a belief of how to plan for the exam successfully. The genuine exams intended for operating on the expert abilities of the contender for the exam certification dumps who want to be able to cope with just about every one of the concerns impeccably.

Get prepared by means of the updated exam, you find out using the most current innovations, and any time you program by the most recent exam dumps 2022, you comprehend its significance and also the advantages in the executions. The part of the veritable exam dumpsis coordinated appropriately by the endeavors of our topic matter experts. Carve out opportunities to perform it appropriately and afterward, you receive the greatest outcomes in your exam conclusion. Make your preparation in advance by taking the exam dumps.

Choose the major excellent exam dumps for the preparation of the exam which are checked by the exam dumps. The greatest exam questions and answers are finished by the precise exam dumps that happen to be in your schedule. Get ready with a compelling exam dumps pdf then you definitely will truly like to answer 90% from the exam certification dumps ideal. The fundamentals of the certified exam are investigated by professionals, so our refreshed exam questions will construct your capacity of inventiveness.

EAEP2201 Certification Exam Infor - Quiz 2026 Esri Enterprise Administration Professional 2201 Realistic Exam Answers

It is believe that employers nowadays are more open to learn new knowledge, as they realize that Esri certification may be

conducive to them in refreshing their life, especially in their career arena. We attract customers by our fabulous EAEP2201 certification material and high pass rate, which are the most powerful evidence to show our strength. We are so proud to tell you that according to the statistics from our customers' feedback, the pass rate among our customers who prepared for the exam with our EAEP2201 Test Guide have reached as high as 99%, which definitely ranks the top among our peers. Hence one can see that the Enterprise Administration Professional 2201 learn tool compiled by our company are definitely the best choice for you.

Esri Enterprise Administration Professional 2201 Sample Questions (Q17-Q22):

NEW QUESTION # 17

A GIS administrator has a group of users who share maintenance responsibilities for a critical application. The administrator needs to allow all users to edit the application without transferring ownership. Which option should the administrator use?

- A. A public group
- **B. A shared update group**
- C. A collaboration group
- D. An administrative group

Answer: B

Explanation:

A shared update group allows group members to edit each other's items without needing to transfer ownership. This is ideal for collaborative editing and shared responsibility for applications, maps, or dashboards.

From Esri documentation:

"Shared update groups allow multiple members to update items shared with the group, even if they do not own the items."

* Option B doesn't exist as a group type in ArcGIS Enterprise.

* Option C allows viewing, but not editing others' content.

* Option D applies to distributed collaboration, not shared editing.

Reference: ArcGIS Enterprise - Group Settings for Collaborative Management

NEW QUESTION # 18

An ArcGIS analyst is curating a series of basemaps for field crews editing utility infrastructure in the field. The analyst must ensure optimal performance. Which type of service should be published?

- **A. Vector tile service**
- B. Dynamic map service
- C. Cached map service

Answer: A

Explanation:

For field operations, Vector Tile Services are highly efficient and suitable for basemaps. They offer fast rendering, smaller file sizes, and are easily scalable across various devices, including those with limited bandwidth or processing capabilities. Vector tiles also support dynamic styling and are ideal for offline use, which is often necessary for field crews working in areas with limited connectivity.

Cached map services (Option A) are raster-based and can be larger in size, making them less optimal for mobile use. Dynamic map services (Option C) require real-time data rendering, which can be resource-intensive and may not perform well in field conditions with limited connectivity.

Reference Source: ArcGIS Enterprise documentation on customizing basemaps

NEW QUESTION # 19

A user must create groups, edit features, and create web apps. This user will also create print layouts, charts, and animations using ArcGIS Pro. The organization has no additional add-on licenses.

Which user type should be configured for this user?

- **A. GIS Professional**

- B. Editor
- C. Creator

Answer: A

Explanation:

The Professional user type includes access to ArcGIS Pro, which is required for creating print layouts, charts, animations, and conducting advanced analysis. It also includes capabilities such as creating groups, editing features, and creating web apps within the ArcGIS Enterprise portal without needing additional add-on licenses.

The Creator user type supports most web GIS tasks but does not include ArcGIS Pro unless an add-on license is assigned.

The Editor user type is the most limited and is intended for editing existing content only, not for creating or managing groups or web applications.

Reference Source: ArcGIS Enterprise documentation - User types, capabilities, and included applications

NEW QUESTION # 20

An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.

Which action should the administrator perform?

- A. Batch delete users with ArcPy
- **B. Use command line utilities**
- C. Delete users using the Member tab

Answer: B

Explanation:

The most efficient and supported method for managing and removing multiple users after a Portal for ArcGIS upgrade is by using command line utilities, specifically the deleteusers utility included with Portal for ArcGIS. This tool allows administrators to batch delete user accounts by referencing a file that lists usernames. This method is especially useful when needing to quickly reduce the number of named users to comply with licensing restrictions.

Deleting users individually via the Member tab (Option B) is time-consuming and inefficient when dealing with large numbers of accounts. Using ArcPy (Option C) is not supported for managing Portal users in bulk.

NEW QUESTION # 21

A GIS analyst is running raster analysis in the ArcGIS Enterprise portal Map Viewer. The input data is an image layer, but the output of the raster analysis is a feature layer.

Which ArcGIS Server will host the output feature service?

- **A. ArcGIS Hosting Server site**
- B. ArcGIS Image Hosting Server site
- C. ArcGIS Raster Analytics Server site

Answer: A

Explanation:

In ArcGIS Enterprise, when performing raster analysis that results in feature data (e.g., vector outputs), the ArcGIS Hosting Server is responsible for hosting the resulting feature services. The Raster Analytics Server processes the raster data, and the output is then stored in the ArcGIS Data Store associated with the Hosting Server, which subsequently serves the feature layer.

The Image Hosting Server is primarily used for hosting large imagery datasets and does not handle feature services. The Raster Analytics Server conducts the analysis but does not host the output services.
