Valid JN0-224 Test Questions Exam Instant Download | Updated Valid JN0-224 Test Guide

It follows its goal by giving a completely free demo of real Juniper JN0-224 exam questions. The free demo will enable users to assess the characteristics of the Juniper JN0-224 Exam product. Actualtests4sure will provide you with free Juniper JN0-224 actual questions updates for 365 days after the purchase of our product.

Juniper Automation and DevOps, Associate (JNCIA-DevOps) Sample Questions (Q28-Q33):

NEW QUESTION # 28

Which statement is valid regarding YAML and JSON?

- A. Comments are available in YAML and JSON.
- B. YAML and JSON use indentation.
- C. **YAML and JSON are case-sensitive.**
- D. White space is ignored in YAML and JSON.

Answer: C

Explanation:

Both YAML and JSON are case-sensitive, meaning that the distinction between uppercase and lowercase characters matters. For example, in JSON or YAML, Key and key would be considered different.

Option D (case-sensitive) is correct because both YAML and JSON treat keys and values with different cases as distinct.

Option A is incorrect because, while JSON does not use indentation, YAML does rely on indentation to define structure. Option B is incorrect because whitespace can be significant in YAML for structure, and Option C is incorrect because JSON does not

support comments, while YAML does.

Supporting Reference:

YAML and JSON Documentation: The official specifications for both YAML and JSON emphasize their case sensitivity.

NEW QUESTION # 29

Which development model is the classic approach to software development?

- A. Waterfall
- B. Lean
- C. Scrum
- D. Kanban

Answer: A

NEW QUESTION # 30

Which two statements are correct about a Python list data type? (Choose two.)

- A. The data contained in a list data type can be modified.
- B. The data contained in a list data type is sequenced and indexed starting from 0.
- C. The data contained in a list data type is not sequenced or indexed.
- D. The data contained in a list data type cannot be modified.

Answer: A,B

Explanation:

Python lists have the following characteristics:

Modifiable Data (A): Lists are mutable, meaning you can change, add, or remove elements after the list has been created.

Sequenced and Indexed (B): Lists maintain the order of their elements and are indexed starting from 0. This means you can access elements by their position in the list.

Option C is incorrect because lists are mutable, allowing modifications. Option D is incorrect because lists are indeed sequenced and indexed, unlike dictionaries.

Reference:

Python Official Documentation: Covers the properties of lists, including mutability and indexing.

Python Data Structures Guide: Explains list operations and how to manipulate them.

NEW QUESTION # 31

Which two statements about NETCONF are correct? (Choose two.)

- A. The default port for NETCONF is port 930.
- B. NETCONF cannot use the default SSH port.
- C. The default port for NETCONF is port 830.
- D. NETCONF can use the default SSH port.

Answer: C,D

Explanation:

NETCONF (Network Configuration Protocol) is used for network device management and can operate over SSH. The following are true about NETCONF:

Default Port 830 (B): By default, NETCONF uses port 830 for communication over SSH. This is the standard port reserved for NETCONF sessions.

Use of Default SSH Port (D): NETCONF can also operate over the standard SSH port (port 22) if configured to do so. This allows flexibility in network management scenarios where port 830 might not be available or used.

Options A and C are incorrect because they refer to incorrect or non-applicable port numbers for NETCONF.

Reference:

IETF RFC 6241: Specifies the use of NETCONF over SSH, including port details.

Juniper Networks NETCONF Documentation: Discusses the configuration and operation of NETCONF on Junos devices, including port usage.

NEW QUESTION # 32

Exhibit.

Referring to the exhibit, which XML XPath expression will only show the IP address XML elements?

- A. /address/name
- **B. //address/name**
- C. //name
- D. /name

Answer: B

Explanation:

https://www.w3schools.com/xml/xpath_syntax.asp

NEW QUESTION # 33

.....
