Salesforce Order-Management-Administrator 시험요강:

주제	소개
주제 1	• Advanced Topics: This topic challenges the Salesforce Order Management Administrator Consultant to diagnose and resolve configuration issues that hinder the launch or operation of Order Management processes. Proficiency includes troubleshooting integration problems and articulating how various processes interact to support successful deployments and system functionality.

주제 2	• Order Management Basics: In this topic, the Salesforce Order Management Administrator Consultant learns to position Order Management effectively within Salesforce's core architecture. By articulating the extensible platform capabilities, the ability to integrate with third-party systems, and the overall value proposition, this knowledge helps highlight Order Management's seamless adaptability and efficiency. These insights are crucial for demonstrating business value during client engagements.
주제 3	• Deployment and Debugging: In this area, aspiring order management administrator consultant demonstrates a deep understanding of deployment options, life cycles, and the configuration of supporting objects. This includes creating processes from scratch, leveraging pre-set data, and validating results in runtime scenarios.
주제 4	• User Experience and Customization: This section emphasizes leveraging Salesforce's Lightning UI to enhance user experiences. The Salesforce Order Management Administrator Consultant will customize experiences for users and managers through tools like the Lightning Page Editor, Report Builder, and out-of-the-box components. Success in this area ensures optimized workflows and improved operational efficiency.

Order-Management-Administrator퍼펙트 인증공부, Order-Management-Administrator퍼펙트 최신 덤프자료

Salesforce 인증 Order-Management-Administrator시험이 너무 어려워서 시험 볼 엄두도 나지 않는다구요? KoreaDumps 덤프만 공부하신다면 IT인증시험공부고민은 이젠 그만 하셔도 됩니다. KoreaDumps에서 제공해드리는Salesforce 인증 Order-Management-Administrator시험대비 덤프는 덤프제공사이트에서 가장 최신버전이여서 시험패스는 한방에 갑니다. Salesforce 인증 Order-Management-Administrator시험뿐만 아니라 IT인증시험에 관한 모든 시험에 대비한 덤프를 제공해드립니다. 많은 애용 바랍니다.

최신 Salesforce Order Management Order-Management-Administrator 무료 샘플문제 (Q98-Q103):

질문 # 98
Which data type is the Status field on an Order Summary object?

- A. Number
- B. Picklist
- C. Text
- D. String

정답：B

설명：
The Status field on an Order Summary object is a picklist data type. A picklist is a field that allows users to select one value from a predefined list of values. The Status field on an Order Summary object indicates the current state of the order, such as Draft, Activated, Completed, or Cancelled. The values for the Status field are defined in the OrderStatus picklist field on the Order object.

질문 # 99
Which two APIs can an admin suggest so that customers can initiate order cancellations and returns from the B2C Commerce storefront and have their action carry out the cancel and return operations in Order Management?

- A. Connect APIs
- B. Streaming APIs
- C. REST APIs

- D. Bulk APIs

정답：A,C

설명：
Explanation
Two APIs that an admin can suggest so that customers can initiate order cancellations and returns from the B2C Commerce storefront and have their action carry out the cancel and return operations in Order Management are:
Connect APIs. These are RESTful APIs that expose resources in Order Management, such as orders, payments, shipments, etc. They allow customers to perform CRUD (create, read, update, delete) operations on these resources from external systems, such as B2C Commerce.
REST APIs. These are HTTP-based APIs that enable developers to access data in Order Management using standard HTTP methods, such as GET, POST, PUT, PATCH, and DELETE. They allow customers to interact with Order Management resources using JSON or XML formats.

질문 #100
Which set of conditions is required for an Order Summary object to be created?

- A. An Order is created, the Create Order Summary Process is installed and the Create Order Summary Process is active
- B. An Order is created, its status is set to Draft, Create OrderSummary Flow is installed and Create OrderSummary Flow is activated.
- C. An Order is created, its status is set to Activated. Create OrderSummary Flow is installed and Create OrderSummary Flow is activated.
- D. An Order is created, its status is set to Activated. Create OrderSummary Flow is installed and the Create OrderSummary Process is installed.

정답：A

설명：
The Order Summary object is a custom object that stores information about an order, such as the total amount, the number of items, and the fulfillment status. The Order Summary object is created by a process called Create Order Summary Process, which runs whenever an order is created or updated. The process calls a flow called Create OrderSummary Flow, which calculates the order summary fields and creates or updates the order summary record. The process and the flow are part of the Order Management package and must be installed and activated for the order summary object to be created. 질문 #101
In which two ways can Order Management licenses be assigned?

- A. By User
- B. By Profile
- C. By Permission Set
- D. By Hole

정답：A,C

설명：
Two ways that Order Management licenses can be assigned are:
By Permission Set. A Permission Set is a collection of settings and permissions that give users access to various tools and functions in Salesforce. A Permission Set can be assigned to individual users or groups of users, regardless of their profile or role. An administrator can create a Permission Set that includes the Order Management User permission, which enables users to access Order Management features and data. The administrator can then assign this Permission Set to the users who need Order Management licenses.
By User. A User is a record that represents a person who can log in and access Salesforce. A User has various fields and settings that determine their access and permissions in Salesforce, such as profile, role, license type, etc. An administrator can assign an Order Management license to a user by editing the user record and selecting Order Management User from the License Type

picklist. The administrator can also enable the Order Management User permission on the user record.
Verified Reference: https://help.salesforce.com/s/articleView?id=sf.order_management_user_permission.htm&type=5
https://help.salesforce.com/s/articleView?id=sf.users_understanding_license_types.htm&type=5

질문 # 102

A customer wants to change the layout of the out of the box Order Summary Lightning Record Page to three columns instead of two. How can an administrator satisfy this requirement?

- A. Create a new Lightning Record Page and select the ThreeRegions template
- B. Change the page layout template to Three Regions in the layout editor
- C. Add another column component lo the existing Lightning Record Page
- D. Edit the Lightning Record Page and change the Template lo Three Regions

정답：D

설명：

The bestway for the administrator to satisfy this requirement is to edit the Lightning Record Page and change the Template to Three Regions. A Lightning Record Page is a type of page that displays details and related information about a specific record in Lightning Experience or Salesforce mobile app. A Lightning Record Page can be customized using the Lightning App Builder, which is a tool that allows administrators to drag and drop components onto a page layout. A Template is a predefined layout that determines how components are arranged on a page. A Three Regions template is a type of template that divides the page into three columns or regions. The administrator can edit the Lightning Record Page for the Order Summary object, and change the Template to Three Regions in the Lightning App Builder. Verified References: https://help.salesforce.com/s/articleView?id=sf.lightning_app_builder_customize_lex_pages.htm&type=5https://help.salesforce.com/s/articleView?id=sf.lightning_app_builder_templates.htm&type=5
