We use the 99% pass rate to prove that our COF-C03 practice materials have the power to help you go through the exam and achieve your dream. Most candidates show their passion on our COF-C03 guide materials, because we guarantee all of the customers that you will pass for sure with our COF-C03 exam questions.

## Snowflake SnowPro® Core Certification (COF-C03) Sample Questions (Q101-Q106):

### NEW QUESTION # 101

Which commands can only be executed using SnowSQL? (Select TWO).

- A. PUT
- B. GET
- C. REMOVE
- D. LIST
- E. COPY INTO

**Answer: A,D**

Explanation:

The LIST and PUT commands are specific to SnowSQL and cannot be executed in the web interface or other SQL clients. LIST is used to display the contents of a stage, and PUT is used to upload files to a stage. References: [COF-C02] SnowPro Core Certification Exam Study Guide

### NEW QUESTION # 102

Which views are included in the data\_sharing\_usage schema? (Select TWO).

- A. ACCESS\_HISTORY
- B. WAREHOUSE\_METERING\_HISTORY
- C. MONETIZED\_USAGE\_DAILY
- D. DATA\_TRANSFER\_HISTORY
- E. LISTING\_TELEMETRY\_DAILY

**Answer: C,E**

Explanation:

<https://docs.snowflake.com/en/sql-reference/data-sharing-usage>

### NEW QUESTION # 103

What is one of the characteristics of data shares?

- A. Data shares utilize secure views for sharing view objects.
- B. Data shares support full DML operations.
- C. Data shares are cloud agnostic and can cross regions by default.
- D. Data shares work by copying data to consumer accounts.

**Answer: A**

Explanation:

Data sharing in Snowflake allows for live, read-only access to data across different Snowflake accounts without the need to copy or transfer the data. One of the characteristics of data shares is the ability to use secure views. Secure views are used within data shares to restrict the access of shared data, ensuring that consumers can only see the data that the provider intends to share, thereby preserving privacy and security.

### NEW QUESTION # 104

Which command can be used to list all network policies available in an account?

- A. SHOW SESSION POLICIES
- B. DESCRIBE NETWORK POLICY
- **C. SHOW NETWORK POLICIES**
- D. DESCRIBE SESSION POLICY

**Answer: C**

Explanation:

To list all network policies available in an account, the correct command is SHOW NETWORK POLICIES. Network policies in Snowflake are used to define and enforce rules for how users can connect to Snowflake, including IP whitelisting and other connection requirements. The SHOW NETWORK POLICIES command provides a list of all network policies defined within the account, along with their details.

The DESCRIBE SESSION POLICY and DESCRIBE NETWORK POLICY commands do not exist in Snowflake SQL syntax. The SHOW SESSION POLICIES command is also incorrect, as it does not pertain to the correct naming convention used by Snowflake for network policy management.

Using SHOW NETWORK POLICIES without any additional parameters will display all network policies in the account, which is useful for administrators to review and manage the security configurations pertaining to network access.

### NEW QUESTION # 105

What step can reduce data spilling in Snowflake?

- A. Using a common table expression (CTE) instead of a temporary table
- B. Increasing the virtual warehouse maximum timeout limit
- C. Increasing the amount of remote storage for the virtual warehouse
- **D. Using a larger virtual warehouse**

**Answer: D**

Explanation:

To reduce data spilling in Snowflake, using a larger virtual warehouse is effective because it provides more memory and local disk space, which can accommodate larger data operations and minimize the need to spill data to disk or remote storage.
