Sample FCSS_NST_SE-7.4 Questions Pdf, FCSS_NST_SE-7.4 Latest Braindumps Questions

Nowadays, the FCSS_NST_SE-7.4 certificate is popular among job seekers. After all, the enormous companies attach great importance to your skills. If you can obtain the FCSS_NST_SE-7.4 certificate, you will have the greatest chance to get the job. So you need to improve yourself during your spare time. Maybe you are always worrying that you are too busy to prepare for an exam, but our FCSS_NST_SE-7.4 Training Materials will help you obtain the certification in the least time for the advantage of high-efficiency.

Fortinet FCSS - Network Security 7.4 Support Engineer Sample Questions (Q37-Q42):

NEW QUESTION # 37

Refer to the exhibit, which a network topology and a partial routing table.

FortiGate has already been configured with a firewall policy that allows all ICMP traffic to flow from port1 to port3. Which changes must the administrator perform to ensure the server at 10.4.0.1/24 receives the echo reply from the laptop at 10.1.0.1/24?

- A. Change the configuration from strict RPF check mode to feasible RPF check mode.
- B. A firewall policy that allows all ICMP traffic from port3 to port1.
- C. Modify the default gateway on the laptop from 10.1.0.2 to 10.2.0.2.
- D. Enable asymmetric routing under config system settings.**

Answer: D

NEW QUESTION # 38

Which statement about protocol options is true?

- A. Protocol options allow administrators to configure which Layer 4 port numbers map to upper-layer protocols, such as HTTP, SMTP, FTP, and so on.**
- B. Protocol options allow administrators to configure a maximum number of sessions for each configured protocol.
- C. Protocol options allow administrators to configure the Any setting for all enabled protocols, which provides the most efficient use of system resources.
- D. Protocol options give administrators a streamlined method to instruct FortiGate to block all sessions corresponding to disabled protocols.

Answer: A

NEW QUESTION # 39

Refer to the exhibit, which shows the output of the BGP database.

```

# get router info bgp network
VRF 0 BGP table version is 3, local router ID is 1.1.1.1
Status codes: s suppressed, d damped, h history, * valid, > best, i - internal,
               S Stale
Origin codes: i - IGP, e - EGP, ? - incomplete

      Network          Next Hop      Metric  LocPrf  Weight  RouteTag  Path
* i0.0.0.0/0          100.64.2.254  0        100      0        0 ? <-/->
*->                   100.64.2.1      0        32768    0        0 ? <-/1>
*-> 4.2.2.1/32        100.64.2.1      0        32768    0        0 ? <-/1>
*->i8.8.8.8/32       100.64.2.254   0        100      0        0 ? <-/1>
*->i10.20.30.0/24     172.16.54.115  0        100      0        0 i <-/1>

```

Total number of prefixes **4**

Which two statements are correct? (Choose two.)

- A. The output shows all prefixes advertised by all neighbors as well as the local router.
- B. The first four prefixes are being advertised using a legacy route advertisement.
- C. The advertised prefix of 10.20.30.0/24 is being advertised through the redistribution of another routing protocol.
- D. The advertised prefix of 10.20.30.0/24 was configured using the network command.

Answer: A,D

Explanation:

get router info bgp network lists the BGP routing table - the valid (*) and best (>) prefixes learned from neighbors as well as those originated locally.

The 10.20.30.0/24 entry shows origin code i (IGP), which indicates it was injected with the network command, not via redistribution.

NEW QUESTION # 40

Which three common FortiGate-to-collector-agent connectivity issues can you identify using the FSSO real-time debug? (Choose three.)

- A. Inability to reach IP address of the collector agent.
- B. Refused connection. Potential mismatch of TCP port.
- C. Incompatible collector agent software version.
- D. Log is full on the collector agent.
- E. Mismatched pre-shared password.

Answer: A,B,E

Explanation:

When you enable FSSO real time debug you'll see explicit socket errors if the FortiGate can't reach the collector's IP (e.g. timeout or "no route to host"), which tells you the agent isn't reachable. If the TCP port is wrong or the listener isn't running, you'll see "Connection refused" in the debug output, pinpointing a port mismatch. And if the configured pre shared secret doesn't match, the logs show an authentication failure or "invalid key" message, clearly indicating a password mismatch. These three conditions - unreachable IP, refused connection, and bad PSK - are all directly diagnosable via the real time debug.

NEW QUESTION # 41

Refer to the exhibit, which shows one way communication of the downstream FortiGate with the upstream FortiGate within a Security Fabric.

```
# diagnose sniffer packet any "tcp port 8013 or udp port 8014" 4
Using Original Sniffing Mode
interfaces=[any]
filters=[tcp port 8013 or udp port 8014]
47.220358 port1 in 192.168.1.112.11234 -> 192.168.1.111.8013: syn 1204417526
48.215338 port1 in 192.168.1.112.11234 -> 192.168.1.111.8013: syn 1204417526
50.218552 port1 in 192.168.1.112.11234 -> 192.168.1.111.8013: syn 1204417526
54.222117 port1 in 192.168.1.112.11234 -> 192.168.1.111.8013: syn 1204417526
```

What three actions must you take to ensure successful communication? (Choose three.)

- A. Ensure the port for Neighbor Discovery has been changed.
- B. Ensure TCP port 8013 is not blocked along the way.
- C. FortiGate must not be in NAT mode.
- D. You must enable Security Fabric/FortiTelemetry on the receiving interface of the upstream FortiGate.
- E. You must authorize the downstream FortiGate on the root FortiGate.

Answer: B,D,E

NEW QUESTION # 42

.....

Do you think it is difficult to success? Do you think it is difficult to pass IT certification exam? Are you worrying about how to pass Fortinet FCSS_NST_SE-7.4 exam? I think it is completely unnecessary. IT certification exam is not mysterious as you think and we can make use of learning tools to pass the exam. As long as you choose the proper learning tools, success is a simple matter. Do you want to know what tools is the best? Dumpcollection Fortinet FCSS_NST_SE-7.4 Practice Test materials are your best learning tools. Dumpcollection exam dumps collect and analysis many outstanding questions that have come up in the past exam. According to the latest syllabus, the dumps add many new questions and it can guarantee you pass the exam at the first attempt.
