We find methods to be success, and never find excuse to be failure. In order to provide the most authoritative and effective 156-587 exam software, the IT elite of our ActualCollection study 156-587 exam questions carefully and collect the most reasonable answer analysis. The 156-587 Exam Certification is an important evidence of your IT skills, which plays an important role in your IT career.

The passing rate of our 156-587 exam materials are very high and about 99% and so usually the client will pass the 156-587 exam successfully. If any questions or doubts on the 156-587 training material exist, the client can contact our online customer service or send mails to contact us and we will solve them as quickly as we can. We always want to let the clients be satisfied and provide the best 156-587 Test Torrent and won't waste their money and energy. As long as you bought our 156-587 practice guide, you will love it for sure.

## 156-587 Detailed Answers | Exam 156-587 Success

Closed cars will not improve, and when we are reviewing our qualifying 156-587 examinations, we should also pay attention to the overall layout of various qualifying examinations. For the convenience of users, our 156-587 learn materials will be timely updated information associated with the qualification of the home page. Our 156-587 Certification material get to the exam questions can help users in the first place. Users can learn the latest and latest test information through our 156-587 test preparation materials. What are you waiting for?

## CheckPoint 156-587 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Advanced Identity Awareness Troubleshooting: This section of the exam measures the skills of Check Point Security Consultants and focuses on troubleshooting identity awareness systems.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Advanced Gateway Troubleshooting: This section of the exam measures the skills of Check Point Network Security Engineers and addresses troubleshooting techniques specific to gateways. It includes methods for diagnosing connectivity issues and optimizing gateway performance.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Advanced Troubleshooting with Logs and Events: This section of the exam measures the skills of Check Point Security Administrators and covers the analysis of logs and events for troubleshooting. Candidates will learn how to interpret log data to identify issues and security threats effectively.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Advanced Firewall Kernel Debugging: This section of the exam measures the skills of Check Point Network Security Administrators and focuses on kernel-level debugging for firewalls. Candidates will learn how to analyze kernel logs and troubleshoot firewall-related issues at a deeper level.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Advanced Client-to-Site VPN Troubleshooting: This section of the exam measures the skills of CheckPoint System Administrators and focuses on troubleshooting client-to-site VPN issues.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Advanced Management Server Troubleshooting: This section of the exam measures the skills of Check Point System Administrators and focuses on troubleshooting management servers. It emphasizes understanding server architecture and diagnosing problems related to server performance and connectivity.</li> </ul>

## CheckPoint Check Point Certified Troubleshooting Expert - R81.20 Sample Questions (Q45-Q50):

### NEW QUESTION # 45

What process monitors, terminates, and restarts critical Check Point processes as necessary?

- A. CPVVD
- B. FWM
- C. FWD
- D. CPM

**Answer: A**

### NEW QUESTION # 46

In the Security Management Architecture, what port and process does SmartConsole use to communicate with the Security Management Server?

- A. CPM, 19009, and 18191
- B. FWM and 19009
- C. CPM and 18190
- D. CPM and 19009

**Answer: C**

Explanation:

In Check Point's Security Management Architecture, SmartConsole is the graphical user interface used to manage the Security Management Server. The communication between SmartConsole and the Security Management Server relies on specific processes and ports, which are critical for troubleshooting connectivity issues.

The CPM (Check Point Management) process is the primary process on the Security Management Server responsible for handling management operations, including interactions with SmartConsole. The default port for this communication is 18190 (TCP), used for the SIC (Secure Internal Communication) and management GUI connections.

Option A: Correct. SmartConsole communicates with the Security Management Server using the CPM process over port 18190.

This port is used for GUI client connections to the management server.

Option B: Incorrect. The FWM (Firewall Management) process is an older process used in earlier Check Point versions (pre-R80) for management tasks. In R81.20, CPM has largely replaced FWM for SmartConsole communications. Additionally, port 19009 is used for other purposes, such as the Check Point REST API, not SmartConsole.

Option C: Incorrect. While CPM is the correct process, port 19009 is not used for SmartConsole communication. Port 19009 is associated with the Check Point Management API (e.g., for `mgmt_cli` or REST API calls).

Option D: Incorrect. While CPM is involved, SmartConsole does not use both ports 19009 and 18191. Port 18191 is typically used for log server communications (e.g., SmartConsole to Log Server), not direct management server communication.

Reference:

The Check Point R81.20 Security Management Administration Guide explicitly details the ports used in the management architecture. According to the guide:

Port 18190/TCP is used for SmartConsole to Security Management Server communication via the CPM process.

The CCTE R81.20 course (as referenced in and) covers advanced management server troubleshooting, including understanding the CPM process and its associated ports.<https://www.koenig-solutions.com/ccte-r81-20-language-course>

<https://www.rededucation.com/events/1056-check-point-troubleshooting-expert-ccte-r81-20-spanish-language/region-US/> For exact extracts, refer to:

Check Point R81.20 Security Management Administration Guide, section on "Communication Ports" (available via Check Point Support Center).

CCTE R81.20 Courseware, which includes modules on management server diagnostics and communication protocols (available through authorized training partners).

### NEW QUESTION # 47

What information does the doctor-log script supply?

- A. Repair options, Logging Rates, Logging Directories
- B. Logging rates, Logging Directories, List of troubleshooting tips
- **C. Current and daily average logging rates. Indexing status, Size**
- D. Logging errors. Exceptions, Repair options

**Answer: C**

Explanation:

The doctor-log script is a tool that provides information about the logging system and helps to identify and troubleshoot common issues. The script runs automatically every night and generates a report that contains the following information:

Current and daily average logging rates: This shows how many logs are being generated and received by the log server per second. It can help to monitor the logging performance and identify any spikes or drops in the logging rate.

Indexing status: This shows the status of the log indexing process, which enables faster and more efficient log searches. It can help to identify any issues with the indexing system, such as delays, failures, or errors.

Size: This shows the size of the log files and the disk space used by the logging system. It can help to manage the disk space and plan for log rotation and backup.

The doctor-log script also provides some troubleshooting tips and repair options for common logging issues, such as corrupted log files, missing log indexes, or low disk space. The script can be run manually or scheduled to run at a specific time. The script output can be viewed in the SmartConsole or in the log server file system.

### NEW QUESTION # 48

What Check Point process controls logging?

- **A. CPD**
- B. FWD
- C. CPVVD
- D. CPM

**Answer: A**

Explanation:

The CPD process controls logging on the Security Management Server or the Log Server. It is responsible for receiving logs from the Security Gateways, storing them in the log files, and forwarding them to the SmartLog and SmartEvent servers. It also handles the communication with the SmartConsole clients and the CPM process. The CPD process runs on the Security Management Server or the Log Server as part of the Management High Availability module.

Reference:

1: Check Point Processes and Daemons - CPD

2: Troubleshooting Check Point logging issues when Security Management Server / Log Server is not receiving logs from Security Gateway Troubleshooting Expert R81.1 (CCTE) Course Outline) - Module 9: Logging and Status Troubleshooting

### NEW QUESTION # 49

Which process is responsible for the generation of certificates?

- A. cpa
- B. fwm
- C. dbsync
- D. cpm

**Answer: A**

Explanation:

The cpa process is responsible for the generation of certificates on the Security Management Server or the Multi-Domain Security Management Server. It is the Check Point Internal Certificate Authority (ICA) that issues certificates for internal use, such as for VPN, HTTPS Inspection, SmartConsole, and Secure Internal Communication (SIC). The cpa process runs on the Security Management Server or the Multi-Domain Security Management Server as part of the Management High Availability module.

References:

- \* 1: Check Point Processes and Daemons - cpa
- \* 2: How to generate and install a 3rd party IPSec Certificate
- \* 3: Automate certificate management on your firewall to find threats in encrypted HTTPS sessions
- \* Troubleshooting Expert R81.1 (CCTE) Course Outline) - Module 10: Certificate Management Troubleshooting

### NEW QUESTION # 50

.....

We have been developing faster and faster and gain good reputation in the world owing to our high-quality 156-587 exam materials and high passing rate. Since we can always get latest information resource, we have unique advantages on 156-587 study guide. Our high passing rate is the leading position in this field. We are the best choice for candidates who are eager to pass 156-587 Exams and acquire the certifications. Our 156-587 practice engine will be your best choice to success.
