1^{ère} année Circuits électriques (série I) Année Universitaire : 2019/2020

Exercice 1 :
On considère le montage suivant :

On donne : $E_1=9V$; $r=0,5\Omega$; $R_1=6\Omega$; $R_2=4\Omega$; $R_3=8\Omega$; $R_4=10\Omega$; $R_5=5\Omega$ et $R_6=7\Omega$.

- 1) Calculer les résistances équivalentes : R_{CD} , R_{AD} et R_{BD} .
- 2) Déterminer l'intensité de courant I .
- 3) Calculer les tensions : U_r , U_{BD} , U_{AB} , U_{AD} , U_{AC} et U_{CD} .
- 4) Déduire les intensités de courant : I_1 et I_2 .

Exercice 2 :
Calculer la résistance équivalente R_{AB} vue entre A et B dans chaque cas. On donne :
 $R_1 = 2\Omega$, $R_2 = 3\Omega$, $R_3 = 5\Omega$, $R_4 = 7\Omega$, $R_5 = 10\Omega$, $R_6 = 15\Omega$ et $R_7 = 20\Omega$

Tableau Certified Data Analyst torrent pdf & TDA-C01 free dumps & TDA-C01 study torrent

We can promise that we are going to provide you with 24-hours online efficient service after you buy our Tableau Certified Data Analyst guide torrent. If you purchase our TDA-C01 test guide, we are going to answer your question immediately, because we hope that we can help you solve your problem about our TDA-C01 exam questions in the shortest time. We can promise that our online workers will be online every day. If you buy our TDA-C01 Test Guide, we can make sure that we will offer you help in the process of using our TDA-C01 exam questions. You will have the opportunity to enjoy the best service from our company.

Tableau Certified Data Analyst Sample Questions (Q139-Q144):

NEW QUESTION # 139

You have the following dataset.

Which formula calculates the percent difference in sales relative to the same quarter the previous year as shown in the Calculation field?

- A. $(\text{SUM}([\text{Sales}]) / (\text{LOOKUP}(\text{SUM}([\text{Sales}]), -4))$
- B. $(\text{SUM}([\text{Sales}]) - \text{LOOKUP}(\text{SUM}([\text{Sales}]), -4)) / (\text{LOOKUP}(\text{SUM}([\text{Sales}]), -4))$
- C. $(\text{SUM}([\text{Sales}]) - \text{LOOKUP}(\text{SUM}([\text{Sales}]), -4))$
- D. $(\text{ZN}(\text{SUM}([\text{Sales}]) - \text{LOOKUP}(\text{ZN}(\text{SUM}([\text{Sales}]), -4)))$

Answer: B

Explanation:

The formula in option B calculates the percent difference in sales relative to the same quarter the previous year. It subtracts the sales of the same quarter from the previous year from the current year's sales, and then divides this by the previous year's sales. This gives a percentage change, which aligns with what is shown in the Calculation field of your dataset. The LOOKUP function returns the value of a specified offset from the current row in the partition. In this case, the offset is -4, which means the value of the same measure four rows above the current row. This corresponds to the same quarter of the previous year, assuming the data is sorted by quarter. References:

NEW QUESTION # 140

You have the following box plot that shows the distribution of average profits made in every state by region.

Which region has the smallest distribution of profits?

- A. Cast
- B. West
- C. South
- D. Central

Answer: D

Explanation:

The central region has the smallest distribution of profits because it has the smallest interquartile range (IQR), which is the distance between the first and third quartiles of the box plot. The IQR measures the spread of the middle 50% of the data. The smaller the IQR, the less variation in the data. Reference: https://help.tableau.com/current/pro/desktop/en-us/buildexamples_boxplot.htm
<https://www.statisticshowto.com/probability-and-statistics/interquartile-range/>

NEW QUESTION # 141

You create the following story that contains two story point.

You want to change the story point format to show the current story point number out of the total number of story points.

Which Layout option should you use?

- A. Arrows only
- B. Caption boxes
- C. Dots
- D. Numbers

Answer: D

Explanation:

To change the story point format to show the current story point number out of the total number of story points, you should use the Numbers option in the Layout tab. This option will display the story points as numbers in a horizontal or vertical sequence, such as 1/2, 2/2. You can also choose to show or hide the next and previous arrows for navigation. The Numbers option will help you

indicate the progress and order of your story points more clearly than the other options. References:

NEW QUESTION # 142

Open the link to Book1 found on the desktop. Open the sales dashboard.

Add the Sales by State sheet in a Show/Hide button to the right side of the dashboard.

□

Answer:

Explanation:

Send us your feedback on it

NEW QUESTION # 143

You have a Tableau workbook.

You want to make the workbook available in Tableau Online.

What should you do?

- **A. From the Server menu, select Publish Workbook.**
- B. From the Server menu, select Tableau Public, and then select Save to Tableau Public.
- C. From the File menu, select Export Packaged Workbook.
- D. From the Server menu, select Publish Data Source.

Answer: A

Explanation:

To make a workbook available in Tableau Online, you need to publish it from Tableau Desktop to Tableau Online. You can do this by selecting Publish Workbook from the Server menu, signing in to your Tableau Online account, choosing a project and a name for your workbook, and clicking Publish. This will upload your workbook and its data sources to Tableau Online, where you can view, edit, and share it with others. References:
