

# 2V0-11.25 Exam Dumps Collection | 2V0-11.25 New Study Plan

**All in One**  
Focused Theory, Practice Exercises & CBQs

All in One builds strong concepts, offers ample practice, and ensures effective assessment for confident learning.

**Why Choose All in One?**

- Strengthens** strong conceptual clarity with well-structured theory and explanations.
- Boosts** exam readiness through extensive practice exercises and CBQs.
- Enhances** problem-solving skills with graded questions and real exam patterns.
- Encourages** self learning and continues assessment for better performance.

**Everything you need**

- Based on the latest CBSE syllabus and exam pattern.
- Interactive mind maps for quick and effective revision.
- For self-evaluation, assessment exercises included in every chapter.
- Sample paper based on latest exam pattern for practice.

The optimization of 2V0-11.25 training questions is very much in need of your opinion. If you find any problems during use, you can give us feedback. We will give you some benefits as a thank you. You will get a chance to update the system of 2V0-11.25 Real Exam for free. Of course, we really hope that you can make some good suggestions after using our 2V0-11.25 study materials. We hope to grow with you and help you get more success in your life.

## VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network</li> <li>storage design.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>• Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.</li> </ul>

## 2V0-11.25 New Study Plan - 2V0-11.25 Reliable Study Questions

Our 2V0-11.25 exam torrent is compiled by first-rank experts with a good command of professional knowledge, and our experts adept at this exam practice materials area over ten years' long, so they are terrible clever about this thing. They exert great effort to boost the quality and accuracy of our 2V0-11.25 study tools and is willing to work hard as well as willing to do their part in this area. The wording is fully approved in our 2V0-11.25 Exam Guide. They handpicked what the 2V0-11.25 exam torrent usually tests in exam recent years and devoted their knowledge accumulated into these 2V0-11.25 study tools. Besides, they keep the quality and content according to the trend of the 2V0-11.25 practice exam. As approved 2V0-11.25 exam guide from professional experts their quality is unquestionable.

### VMware Cloud Foundation 5.2 Administrator Sample Questions (Q125-Q130):

#### NEW QUESTION # 125

During a routine check, an administrator observes that several VMs are reporting high memory usage in VMware Aria Operations. They need to verify if the high memory usage is due to memory contention. What actions should be taken in VMware Aria Operations to verify this?

- A. Review the CPU ready time.B Look al the network throughput
- **B. Analyze the storage I/O performance.**
- C. Check the memory usage and ballooning metrics.

**Answer: B**

Explanation:

To verify if high memory usage is due to memory contention, the administrator should check the memory usage and ballooning metrics in VMware Aria Operations. Ballooning occurs when the hypervisor reclaims memory from a virtual machine due to memory contention, and monitoring these metrics can help identify whether the VMs are experiencing memory pressure or being forced to swap memory.

#### NEW QUESTION # 126

An administrator has been tasked with creating a real-time view of key performance indicators for their VMware Cloud Foundation private cloud and an automated monthly report that shows the capacity consumed by each development team who use the environment.

Which VCF component should the administrator configure to complete their objectives?

- A. VMware Aria Operations for Applications
- B. VMware Aria Operations for Logs
- C. VMware Aria Operations for Networks
- **D. VMware Aria Operations**

**Answer: D**

Explanation:

VMware Aria Operations provides comprehensive monitoring, analytics, and performance management for the entire VMware Cloud Foundation environment. It enables real-time views of key performance indicators (KPIs) and can be configured to generate automated reports on capacity consumption, which aligns with the administrator's objectives.

#### NEW QUESTION # 127

What is the primary purpose of configuring a Key Management Server (KMS) in vCenter for VM Encryption?

- A. To provide high availability for virtual machines.
- B. To monitor network traffic for VMs.
- **C. To manage encryption keys for securing VM data.**
- D. To optimize the performance of encrypted VMs.

**Answer: C**

Explanation:

The primary purpose of configuring a Key Management Server (KMS) in vCenter for VM Encryption is to manage and store the encryption keys that are used to secure virtual machine data. The KMS ensures that encryption keys are handled securely and provides a central management point for encrypting VMs in a VMware environment.

#### NEW QUESTION # 128

An administrator successfully removed a host from a VMware vSphere cluster and decommissioned it in SDDC Manager.

What must be done before the host can be recommissioned and added back to the SDDC Manager inventory?

- A. Manually uninstall the NSX VIBs on the host.
- **B. Log in to the host console and select "Reset System Configuration" from the ESXi DCUI.**
- C. Reinstall ESXi on the host.
- D. From the host console, use the /sbin/generate-certificates command to generate a new self-signed certificate.

**Answer: B**

Explanation:

Before the host can be recommissioned and added back to the SDDC Manager inventory, you must reset the system configuration. This can be done from the ESXi Direct Console User Interface (DCUI) by selecting the "Reset System Configuration" option. This will remove any previous configuration and allow the host to be re-added to the environment.

#### NEW QUESTION # 129

Which prerequisite task must be completed before deploying VMware Cloud Foundation (VCF) using VMware Cloud Builder?

id=1WAeuwS-H3XSXWsm4XDTUCjDEZvKRQEw6
