As long as you follow with our Experience-Cloud-Consultant Study Guide, you are doomed to achieve your success.

## Salesforce Certified Experience Cloud Consultant Sample Questions (Q158-Q163):

### NEW QUESTION # 158

Northern Trail Outfitters (NTO) is evaluating Experience Cloud for creating an onboarding app for new hires. Which two things should NTO consider when creating the onboarding app? Calculator Choose 2 answers

- A. Employee apps are only available in Unlimited Edition.

- B. Experience Cloud cannot be used for employee apps.
- C. Chatter posts related to a record will be available in the employee app as well as the main org.
- D. Not all Chatter posts inside Chatter groups within the employee app will be available in the main org.

**Answer: A,C**

#### NEW QUESTION # 159

Universal Containers (UC) has a B2C customer department that uses person accounts to track and manage all B2C customers. UC has set up a B2C site using Salesforce Experience Cloud. The VP of B2C business wants to enable self-registration on the portal so customers can create their own user accounts.

What should the Experience Cloud consultant at UC recommend so that the new users self-registering on the B2C site are captured as person accounts in Salesforce?

- A. Use the standard self-registration configuration under Experience Workspace that assigns users to a default business account, and then build a trigger on Account to create person accounts for each user.
- B. Use the standard self-registration configuration under Experience Workspace and leave the default Account field empty.
- C. Create a custom self-registration page and Apex handler that creates a person account for each user self-registering on the portal.
- D. Restrict the Account record type access to Person Account record type only for the Site Guest User, so any account created is by default a person account.

**Answer: C**

Explanation:

To capture the new users self-registering on the B2C site as person accounts in Salesforce, UC should create a custom self-registration page and Apex handler that creates a person account for each user. A custom self-registration page allows UC to customize the look and feel, fields, and logic of the self-registration process.

An Apex handler is a class that implements the Auth.RegistrationHandler interface and defines the logic for creating a user and an account. UC can use an Apex handler to create a person account for each user based on the information they provide on the self-registration page.

#### NEW QUESTION # 160

Which component informs support agents working in the Service Console what actions a customer has taken on an Experience site?

- A. Community View
- B. Einstein Customer
- C. Experience Tracker
- D. Customer Insights

**Answer: C**

Explanation:

Experience Tracker is a component that informs support agents working in the Service Console what actions a customer has taken on an Experience site. Experience Tracker shows information such as page views, searches, downloads, and case interactions that the customer has performed on the site. This helps agents understand the customer's context and provide better service.

#### NEW QUESTION # 161

Which three considerations should be made when using Criteria-Based Audiences? Choose 3 answers

- A. Salesforce must be contacted if you need to use the domain criteria in sandbox or Developer Edition orgs.
- B. Up to 2,000 audiences can be created.
- C. Record Type criteria cannot be assigned to a component.
- D. Domain criteria are not available in sandbox or Developer Edition orgs.
- E. Components in the template header and footer sections cannot be assigned to an audience.

**Answer: C,D,E**

### NEW QUESTION # 162

Cloud Kicks wants to allow site users to tag site content with custom tags or member-created topics.

Which two permissions must be enabled for site users in Setup to accomplish this?

Choose 2 answers

- A. Tags Allowed
- **B. Member Can Access Topics**
- **C. Create Topics**
- D. Assign Topics

**Answer: B,C**

Explanation:

To allow site users to tag site content with custom tags or member-created topics, you need to enable two permissions for site users in Setup:

**Create Topics.** This permission allows users to create new topics and assign them to content, such as posts, files, or articles. Users can also edit or delete the topics they created.

**Member Can Access Topics.** This permission allows users to access the topic management features on the site, such as viewing, following, or unfollowing topics. Users can also see the topics assigned to content and filter content by topics.

### NEW QUESTION # 163

.....
