Valid Test SPLK-3002 Tutorial | SPLK-3002 Exam Materials

2026 Latest ActualVCE SPLK-3002 PDF Dumps and SPLK-3002 Exam Engine Free Share: https://drive.google.com/open?id=13FXfSte2RA-M4o3ONOhe9aTQB4mdtCd4

You will be able to assess your shortcomings and improve gradually without having anything to lose in the actual Splunk IT Service Intelligence Certified Admin exam. You will sit through mock exams and solve actual Splunk SPLK-3002 dumps. In the end, you will get results that'll improve each time you progress and grasp the concepts of your syllabus. The desktop-based Splunk SPLK-3002 Practice Exam software is only compatible with Windows.

The SPLK-3002 Exam covers a wide range of topics, including the use of ITSI for monitoring, alerting, and analyzing IT service performance, as well as the use of ITSI for incident management, event management, and problem management. SPLK-3002 exam also covers the use of ITSI for predictive analytics, capacity planning, and service level management. Candidates who pass the SPLK-3002 exam will have a deep understanding of how to use Splunk ITSI to monitor and analyze IT services, and will have the skills and knowledge to ensure that IT services are delivered at optimal levels. Splunk IT Service Intelligence Certified Admin certification is highly valued in the IT industry, and it is a testament to the skills and expertise of the IT professionals who hold it.

SPLK-3002 Exam Materials, SPLK-3002 Authorized Certification

Splunk SPLK-3002 certification exams are a great way to analyze and evaluate the skills of a candidate effectively. Big companies are always on the lookout for capable candidates. You need to pass the Splunk SPLK-3002 Certification Exam to become a certified professional. This task is considerably tough for unprepared candidates however with the right SPLK-3002 prep material there remains no chance of failure.

The best way to study for a Splunk SPLK-3002 Exam is by getting as many practice quizzes as possible

The SPLK-3002 Exam is not a difficult certification by any means and can be attained with the help of practice exams. However, if you know nothing about Splunk or Splunk IT Service Intelligence, then taking this exam will be quite challenging for you. The material that is covered in the SPLK-3002 Exam is not difficult to understand as such, it's just that there are some concepts that need to be fully understood in order to pass the exam. There are many ways to prepare for a certification like the SPLK-3002 Exam. You can go through books, online courses and study guides. But most effective way of studying is through **SPLK-3002 Dumps**. The best way to prepare for a certification exam is by taking as many practice exams as possible.

Splunk IT Service Intelligence Certified Admin Sample Questions (Q98-Q103):

NEW QUESTION # 98
What is the main purpose of the service analyzer?

- A. Allow Analysts to add comments to Alerts.
- B. Monitor overall Service and KPI status.
- C. Display a list of All Services and Entities.
- D. Trigger external alerts based on threshold violations.

Answer: A

NEW QUESTION # 99
There are two Smart Mode configuration settings that control how fields affect grouping. Which of these is correct?

- A. Text similarity and category similarity.
- B. Text deviation and category deviation.
- C. Text deviation and category similarity.
- D. Text similarity and category deviation.

Answer: A

Explanation:
In the context of Smart Mode configuration within Splunk IT Service Intelligence (ITSI), the two settings that control how fields affect grouping are "Text similarity" and "Category similarity." Smart Mode is a feature used in event grouping that leverages machine learning to automatically group related events. "Text similarity" refers to how closely the textual content of event fields must match for those events to be grouped together, taking into account commonalities in strings or narratives within the event data. "Category similarity," on the other hand, relates to the similarity in the categorical attributes of events, such as event types or source types, which helps in clustering events that are similar in nature or origin. Both of these settings are crucial in determining how events are grouped in ITSI, influencing the granularity and relevance of the event groupings based on textual and categorical similarities.

NEW QUESTION # 100
Which of the following accurately describes base searches used for KPIs in a service?

- A. All the KPIs in a service use the same base search.
- B. Base searches can be used for multiple services.
- C. A base search can only be used by its service and all dependent services.
- D. All the metrics in a base search are used by one service.

Answer: B

Explanation:
Explanation
KPI base searches let you share a search definition across multiple KPIs in IT Service Intelligence (ITSI).
Create base searches to consolidate multiple similar KPIs, reduce search load, and improve search performance.

NEW QUESTION # 101
Which of the following are deployment recommendations for ITSI? (Choose all that apply.)

- A. Deployments require a dedicated ITSI search head.
- B. Deployments should use fastest possible disk arrays for indexers.
- C. Deployments often require an increase of hardware resources above base Splunk requirements.
- D. Deployments may increase the number of required indexers based on the number of KPI searches.

Answer: A,C,D

Explanation:
You might need to increase the hardware specifications of your own Enterprise Security deployment above the minimum hardware requirements depending on your environment.
Install Splunk Enterprise Security on a dedicated search head or search head cluster.
The Splunk platform uses indexers to scale horizontally. The number of indexers required in an Enterprise Security deployment varies based on the data volume, data type, retention requirements, search type, and search concurrency.
Reference: https://docs.splunk.com/Documentation/ES/latest/Install/DeploymentPlanning A, B, and C are correct answers because ITSI deployments often require more hardware resources than base Splunk requirements due to the high volume of data ingestion and processing. ITSI deployments also require a dedicated search head that runs the ITSI app and handles all ITSI-related searches and dashboards. ITSI deployments may also increase the number of required indexers based on the number and frequency of KPI searches, which can generate a large amount of summary data. References: ITSI deployment overview, ITSI deployment planning

NEW QUESTION # 102
Which of the following can generate notable events?

- A. When two entity aliases have a matching value.
- B. Through ad-hoc search results which get processed by adaptive thresholds.
- C. Manually selected using the Notable Event Review panel.
- D. Through scheduled correlation searches which link to their respective services.

Answer: D

Explanation:
Notable events in Splunk IT Service Intelligence (ITSI) are primarily generated through scheduled correlation searches. These searches are designed to monitor data for specific conditions or patterns defined by the ITSI administrator, and when these conditions are met, a notable event is created. These correlation searches are often linked to specific services or groups of services, allowing for targeted monitoring and alerting based on the operational needs of those services. This mechanism enables ITSI to provide timely and relevant alerts that can be further investigated and managed through the Episode Review dashboard, facilitating efficient incident response and management within the IT environment.
