Lower price with higher quality, that's the reason why you should choose our CAD prep guide.

ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q207-Q212):

NEW QUESTION # 207

Which one of the following is NOT a debugging strategy for client-side scripts?

- A. Field Watcher
- B. jslog()
- C. **gs.log()**
- D. g_form.addInfoMessage()

Answer: C

Explanation:

https://developer.servicenow.com/dev.do#!/learn/learning-plans/rome/new_to_servicenow/app_store_learnv2_scripting_rome_debugging_client_scripts The following are debugging strategies for client-side scripts, which run in the web browser and manipulate the user interface:

g_form.addInfoMessage(). This is a client-side API that displays an information message at the top of the form.

Field Watcher. This is a debugging tool that displays the current and previous values of one or more fields on a form.

jslog(). This is a client-side API that writes a message to the browser console.

The following is not a debugging strategy for client-side scripts, but for server-side scripts, which run on the ServiceNow platform and manipulate the database:

gs.log(). This is a server-side API that writes a message to the system log. Reference: Client-Side Scripting APIs, Debugging Client Scripts

NEW QUESTION # 208

When configuring the content of an Email Notification, which syntax should be used to reference the properties of an event triggering the Notification?

- A. \${gs.<property name>}
- B. \${current. <property name>}
- C. **\${event. <property name>}**
- D. \${<property name>.getDisplayValue()}

Answer: C

Explanation:

<https://www.servicenow.com/community/it-service-management-forum/email-notification/m-p/695221> Reference:

https://community.servicenow.com/community? id=community_QUESTION NO: &sys_id=e017cbe5db1cdbe01dcaf3231f9619a3

When configuring the content of an Email Notification, the following syntax should be used to reference the properties of an event triggering the Notification:

event.<propertyname>.

This is the correct syntax to access the properties of the event record that triggered the Email Notification, such as event.name, event.parm1, or event.parm2. For example, {event.parm1} will display the value of the first parameter of the event.

The following syntaxes are not correct for referencing the properties of an event triggering the Notification:

current.<propertyname>. This is the syntax to access the properties of the current record that is associated with the event, such as current.number, current.shortdescription, or current.state. For example, {current.short_description} will display the short description of the current record.

\${<property name>.getDisplayValue()}. This is the syntax to access the display value of a property of the current record, such as current.state.getDisplayValue(), current.assigned_to.getDisplayValue(), or current.category.getDisplayValue(). For example, current.state.getDisplayValue() will display the state of the current record in a human-readable format, such as New, In Progress, or Closed.

\${gs.<property name>}. This is the syntax to access the properties of the GlideSystem (gs) object, which provides methods for performing system operations, such as gs.now(), gs.getUserID(), or gs.getProperty().

For example, gs.now() will display the current date and time of the system. References: Email Notifications, Email Notification Variables

NEW QUESTION # 209

When creating new application files in a scoped application, cross scope access is turned on by default in which of the following?

- A. REST messages
- B. Script Include
- C. Workflow

- **D. Table**

Answer: D

Explanation:

Explanation/Reference: <https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/set-RCA-level.html>

NEW QUESTION # 210

What plugin enables the Guided Application Creator?

- A. com.glide.service_creator
- B. com.snc.apps_creator_template
- C. com.glide.snc.apps_creator
- **D. com.glide.sn-guided-app-creator**

Answer: D

Explanation:

"Guided Application Creator is enabled via the Guided Application Creator (com.glide.sn-guided-app-creator) plugin, which is active by default in the Now Platform." Located under "Activation Information" section at this URL:

<https://docs.servicenow.com/en-US/bundle/tokyo-application-development/page/build/guided-app-creator/concept/guided-app-creator.html>

NEW QUESTION # 211

Which one of the following is part of the client-side scripting API?

- A. GlideUser object (g_user)
- **B. current and previous objects**
- C. workflow.scratchpad
- D. GlideSystem object (gs)

Answer: B

NEW QUESTION # 212

.....

The clients only need 20-30 hours to learn the CAD exam questions and prepare for the test.
